Introduction

The *Processing Passenger Baggage* information presented in this section is a supplement to the guidelines, directions, and policy in the *Manual for Agricultural Clearance (MAC)*, and the general procedures for clearing regulated cargo in this manual.

Materials Needed

You will need the following items to clear regulated animal importations in passenger baggage:

- ♦ Animal Product Manual (APM)
- **♦** Bolt cutters
- Brochure handouts
- ◆ Can opener
- ◆ Container or receptacle with a tight fitting lid for placing contraband
- **♦** Disinfectants for footwear
- Disposable gloves
- ♦ Hand lens
- Luggage keys
- Paper or plastic bags for separating and identifying contraband
- **♦** Paper towels
- ♦ Pocket knife
- ◆ Tape or twine for resealing and safeguarding packages
- ♦ Various forms (VS Forms 10-4, 16-78, 17-8; PPQ Form 277; Customs Form 6059B; and APHIS Form 7091)

Step 1: Classify the Importation

When reviewing the written Customs Declaration (Customs Form 6059B), interviewing the passenger¹, inspecting passenger's baggage, or screening baggage using a detector dog or an X-ray system, consider the following criteria. Use these criteria when determining if an importation is of animal origin or related to an animal.

If when interviewing the passenger, you discover that the individual doesn't speak English, use a Customs Declaration Form (Customs Form 6059B) and point to the appropriate text to ask the questions. See Customs Form 6059B, Customs Declaration on page 2-3-16 for samples of the form in Arabic, Chinese, English, French, German, Italian, Japanese, Korean, Portuguese, Russian, and Spanish.

Overview of Criteria to Use to Determine if an Importation Is of Animal Origin or Related to an Animal

- Described using the name of an animal
- ◆ From an animal
- ◆ Is a live animal
- ◆ Likely to have come in contact with animals or parts of an animal

FIGURE 2-3-1 Criteria to Use for Determining Whether an Importation Is of Animal Origin or Related to an Animal

Step 2: Refer the Importation

After you determine the importation is of animal origin or related to an animal, refer the passenger to secondary inspection where a more detailed interviewing of the passenger and a visual examination of the baggage will be done.

In secondary inspection, further classify the importation as a live animal, animal product, animal by-product, or related animal product using Table 2-3-1. Use other sections of this manual to help clarify the information you receive from interviewing the passenger and examining the importation. See the *List of Animal Names and Their Classes* (Appendix B), Guide to Animal Product and By-Product Labels (Appendix D), Dictionary of Spanish Words (Appendix F), the Glossary, and the Index.

TABLE 2-3-1 Classify an Importation as Live Animal, Animal Product, Animal By-Product, or Related Animal Product

If the importation is:	And its purpose is for:	Then classify as:
◆ Pet birds		Live animals
◆ Semen, embryos		
◆ Organisms or vectors		
From an animal	Human consumption such as:	Animal products
	◆ Casings	
	◆ Edible bird nests	
	◆ Eggs	
	◆ Meat

◆ Straw and hay		

Handling Passengers in Transit

See *Handling Passengers That Are In Transit* on page A-1-2.

Step 3: Determine the Entry Requirements

Veterinary Services **prohibits** the hand carrying of certain biological agents such as those moving in contradiction of the permit. Therefore, follow these directions in handling such hand-carried biological agents:

- 1. Review the accompanying VS Form 16-6A, Import Permit.
- 2. Check if the agent is moving in contradiction¹ of the permit.
- 3. If the biological agent is moving in contradiction of the permit, then confiscate the biological agent, and contact the National Center for Import and Export at 301/734-3277, for directions on proper storage, transport, and destruction of the materials.
- 1 For example, the VS Form 16-6A, Import Permit, specifies that "imported materials must be shipped by a commercial carrier," yet the biological agent is being hand carried. The biological agent would be moving in contradiction of the permit.

Before continuing, find out if a VS permit covers the importation authorizing the importation's entry. A VS permit takes precedence over the entry requirements listed in this manual.

TABLE 2-3-2 Determine if the Importation Is Admissible Using Information Collected

If the importation is:	And the animal product is:	Then for the regulatory action:
Covered by a VS permit		GO to Processing Importations Authorized Entry by a VS Permit on page 2-4-32
Not covered by a VS permit	Meat or eggs	Go to Appendix A, Guide to Entry Status of Animal Products in Passenger Baggage or Mail on page A-1-1
	Other than meat or eggs	GO to the Reference chapter REGULATE the same as for a commercial entry

Investigate the importation by looking at accompanying documents or labels, and by interviewing the passenger. Officers are **not** required to translate and validate labels. The importer is responsible for satisfying entry requirements which includes providing the proper documents in the proper format and language. If an officer or other capable source

cannot confidently translate a label, then take the most restrictive action which may be to refuse entry. Collect the following information to help you determine if there are entry requirements:

- ◆ Name and description of the importation
- **♦** Animal class
- ◆ Country of origin and the country's disease status
- **♦** Intended use
- **♦** Degree of processing
- ◆ Certificate statements

Name and Description of the Importation

If the item is commercially packaged, the name and description will be identified on the container. If the item is **not** commercially packaged, the name and description **must** come from the passenger. To be enterable, the importation **must** have adequate proof of origin (see **page A-1-19**). Use other sections of this manual to help clarify the name and description. See the *List of Animal Names and Their Classes* (*Appendix B*), *Guide to Animal Product and By-Product Labels* (*Guide to Animal Product and By-Product Labels*), *Dictionary of Spanish Words* (*Appendix F*), the *Glossary*, and the *Index*.

Your investigative techniques will prove valuable in determining the contents of containers and cans. Be particularly suspicious of canned products from Taiwan. The labels on products regularly sold by some supermarkets and food companies state the product's name in English, but **do not** mention meat. However, on the label in a block about 1 inch square appears the Chinese character for meat (see **Figure 2-3-2**). Also, containers and cans labeled as preserved fruit and tea often contain meat (see **Appendix D**, A Guide to Animal Product and By-Product Labels).

FIGURE 2-3-2 Chinese Character for Meat

Animal Class

Animal class is the kind of animal from which the product was derived. If you **cannot** determine the animal class from the collected information, use *List of Animal Names and Their Classes*.

Country of Origin

Unless identified on the package label or documented on an official certificate, company-issued statement, or invoice, consider the country of origin as the country from which the carrier has arrived. If more than one country is involved, consider the most restricted country as the country of origin.

Disease Status of the Country of Origin

The disease status of the country of origin is identifying the exotic animal diseases that are known to exist in that country. Use the *List of Foreign Countries and Their Disease Status* on page C-1-1 to identify the disease related to animal importations that occur or **do not** occur in a foreign country. If the country of origin is **not** known, use the most restrictive disease status for the importation.

Destination

Some restricted importations are consigned to a final destination for further processing or treatment. In such cases, the final destination **must** be an approved establishment, plant, or warehouse that is listed in *List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products* on page E-1-1 (*Appendix E*).

Degree of Processing

Degree of processing **only** pertains to importations of animal products and by-products. At the beginning of the *Procedures* chapter, information is given on how the degree of processing correlates with disease risk. The information presented on determining shelf stability has been repeated here.

When products have been made shelf stable by heating in a hermetically sealed container (i.e., retorted), then the products may be released **except** for ruminant products or ruminant material from a country or region that is affected with BSE or poultry products or poultry material from a country or region that is affected with HPAI (H5N1).

Determining shelf stability of meat in containers that accompany passengers is a professional judgement. You **cannot** adequately determine the degree of processing if **no** certificate accompanies the importation. You **must** be confident that the meat or meat products were commercially cooked in the container. If you are **not** sure, then seize the product.

Historically, PPQ, VRS has supported the restrictive actions taken by individual officers based on the lack of evidence necessary to take the proper regulatory action.

Use the following guidelines to determine if meat was cooked sufficiently enough in the containers thereby rendering the meat to be hermetically sealed and shelf stable. Keep in mind that containers vary in appearance. Rely on your practical experience and professional judgement. Take the following steps:

1. Determine if the container is acceptable.

TABLE 2-3-3 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on How the Meat Was Cooked in the Container

If the container is a:	Then:	
◆ Can	Examine the container using Figure 2-3-3

◆ Flexible plastic container		
◆ Flexible plastic tray		
◆ Jar		
◆ Pop-top can		
◆ Transparent plastic pouch	1. JUDGE the contents as not shelf stable	
◆ Container labeled as sterile filling or pasteurized	2. TAKE appropriate action	

2. Examine the container. Match the properties of the container with those listed in Figure 2-3-3. Then follow Table 2-3-4.

Properties of containers that are hermetically sealed and shelf stable:	Properties of containers that are not hermetically sealed and shelf stable:
The ends or lid of the container is concave, inwardly curved, flat, and smooth	The ends or lid is swelled, bulged, or outwardly curved
If the container is a can, the seal is seamless with no evidence of soldering	The seal shows evidence of soldering
When you press the ends or lid of the container, the ends or lid gives only slightly	When the container lid is pressed, you feel the lid move inward or you hear the lid click
If the container is a foil pouch, there is liquid inside surrounding the meat and the meat	◆ The foil pouch is molded snugly around the meat, with little or no liquid inside

	◆ There may be instructions on the pouch to further cook the meat beyond warming up
There is no odor	There is an objectionable odor
The container is dry and clean	The container shows evidence of leaking
The label is commercially printed	The label is handwritten
If the container is a flexible plastic container or flexible plastic tray, the container or tray is accompanied by proof (commercially printed label statement, government certification) that the product was hermetically sealed and then cooked by a true retort process	The flexible plastic container or tray is not accompanied by proof (commercially printed label statement, government certification) that the product was hermetically sealed and then cooked by a true retort process

If:	Then:
One or more of the Properties of Containers that Are Not Hermetically Sealed and Shelf Stable, as listed in Figure 2-3-3 applies	JUDGE the contents as not hermetically sealed and shelf stable TAKE appropriate action
All of the Properties of Containers that Are Hermetically Sealed and Shelf Stable, as listed in Figure 2-3-3 apply	CONSIDER that, in most probability, the contents are hermetically sealed and shelf stable CONTINUE to 3., and OPEN a container, if you are still unsure

3. Open a container. Follow Table 2-3-5.

TABLE 2-3-5 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Inspection of the Contents

If the contents:		Then:	
Appear proces melted by coo	ssed and any fat present was king	JUDGE the contents as hermetically sealed and shelf stable	
EXAMPLE	The fat will be greasy, gelatinous, or lard-like in appearance. Think of what bacon fat looks like after frying and the grease has congealed in the pan.		
Are unprocess	sed or you see pieces of fat	JUDGE the contents as not hermetically sealed and shelf stable.	
EXAMPLE The fat will be more intact. Think of what fat looks like in a can of pork and beans.		TAKE appropriate action	

The dry-pack, canned chorizo or sausage **does not** meet the requirements of cooking or sealing. Chorizos are sealed **after** heating and are **not** commercially cooked in the container. Home produced or small butcher shop produced cans are **not** always sterile or completely shelf stable. Therefore, you need to look at labels and markings on the cans that will indicate whether the product was commercially processed.

Intended Use

Determining the intended use of the importation will help you identify the correct entry requirements. An example of an intended use would be a small quantity of milk for personal use from a country free from FMD.

Certificate Statements

Statements that are entered on an accompanying certificate may attest to entry requirements. You need to know what the statements are in order to match and to verify them against established entry requirements.

Step 4: Inspect the Importation

If a certificate, permit, or invoice accompanies the importation, then match the information collected with the actual importation. Identify and validate the following:

- ◆ The importation is what the documents state the importation is, including the degree of processing, quantity, weight, and packaging
- ◆ An appropriate permit or certificate accompanies the importation
 - When reviewing permits, verify the identifying number, expiration date, and destination address
 - When reviewing foreign certificates, verify origin, destination, product description, and statements
 - Examples and further information about foreign certificates and permits are detailed under the appropriate animal product or by-product in the Reference chapter and under Appendix G, Certificates and Permits
- ◆ All conditions are being met that will allow entry of the importation

Look at the packaging and containers for possible breaks, leaks, and spills. All importations of restricted animal products or by-products **must** be in sturdy, leakproof containers. They **must** be intact and **must not** be leaking or damaged in any way that could provide the possibility of contamination. Additional cleaning and disinfecting **must** occur when contamination is found during your inspection. Check the article (like footwear) for animal contamination.

TABLE 2-3-6 Determine Action Based on Results of Inspection

As a result of your inspection you find:	Then:	
Restricted animal products or by-products packed in a leaking, damaged, or	SEIZE the restricted animal products or by-products; and/or,

If the contamination is associated with:	And the article was used in:	Then:
A live animal importation	-	CONSULT local VS who is responsible for cleaning and disinfecting
Adhering to any of the following: ◆ Farm machinery ◆ Footwear ◆ Vehicle	Canada, but not Newfoundland or that portion of Central Saanich on Vancouver Island in the province of British Columbia east of the West Saanich Road	GO to "Step 5: Take Final Regulatory Action" on page 2-3-12
	A country other than Canada, or if Canada, Newfoundland or that portion of Central Saanich on Vancouver Island in the province of British Columbia east of the West Saanich Road ¹	HAVE the individual REMOVE the plant debris, hay and straw, soil or manure DISINFECT the article according to the <i>Special Procedures</i> for <i>Disinfection</i> on page 2-4-13

¹ Countries or regions where harmful, cyst-forming nematodes are found.

Step 5: Take Final Regulatory Action

Given the results of your inspection and determination of the entry requirements, you **must** take final regulatory action on the importation. Take **one** of the following four regulatory actions:

- ♠ Release
- **♦** Refuse entry
- Authorize shipment to an approved establishment or warehouse (including approved defrost facilities)
- ◆ Give the importer the opportunity to get a permit

In specific situations, the final regulatory action will be to hold the importation and contact PPQ, VRS, who will make the final decision. Occasionally, PPQ will hold an importation until a permit can be obtained from VS. These situations may be as follows:

- ◆ Importer of a costly importation objects to a determination that the importer **does not** meet the entry requirements
- ◆ Importation is intended for scientific research

Clearing passengers and their baggage is a high priority of PPQ since this represents an avenue of risk for an animal disease outbreak. Unless you are clearing an importation that is accompanied by the required certificate or permit, most of your final regulatory actions will be to release or to refuse entry.

Document your final regulatory action by doing the following:

- 1. Write the action taken, along with your initials, on the Customs Form 6059B. Customs Declaration.
- 2. Fill in PPQ Form 277, Baggage Information Data.

Release

When you release an importation, you are allowing entry of the importation because the importation complies with APHIS agricultural requirements.

Refuse Entry

When you refuse entry, seize the importation and safeguard the importation to disposition because the importation is **not** eligible for entry according to APHIS' agricultural requirements. Refuse entry to the animal product or by-product for any of the following reasons:

- You could **not** determine shelf stability
- ◆ You could **not** identify the product, the product's animal class, or the product's origin
- ◆ The product was packed in a leaking, damaged, or unacceptable container
- ◆ The product was **not** accompanied by the required VS permit.

Authorize Shipment to an Approved Establishment or Warehouse When you authorize shipment to an approved establishment or warehouse, you are allowing entry of the importation, but restricting the importation's movement to a final destination within the United States for further processing or treatment.

Refer to **Table 2-3-8** when authorizing shipment to an approved establishment.

TABLE 2-3-8 Action to Take on Passenger Baggage When Authorizing a Shipment to an Approved Establishment

If the product is:	Then:
Consigned to an approved establishment or warehouse	GO to Action to Take on Importations Consigned to an Approved Establishment or Warehouse on page 2-3-14

Not consigned to an establishment, but needs to be consigned to an approved one	GO to Action to Take on Importations Not Consigned to an Establishment or Warehouse, but Needs to Be on page 2-3-15

Action to Take on Importations Consigned to an Approved Establishment or Warehouse Take the following steps for importations consigned to an approved establishment or warehouse:

- 1. Safeguard the importation.
- 2. Stamp Customs' entry documents and shipping forms or update PPQ Form 212 or ACS to show the importation is authorized to a specific destination.
- 3. Examine the containers to make sure that they are intact and **not** leaking or damaged in any way. If the containers are flimsy, broken, or leaking, then require that they be repackaged in sturdy, clean leakproof containers. Clean and disinfect.
- 4. Ensure that all package labels and accompanying documents show the address of the approved establishment or warehouse. Require labels and documents to be rewritten if **not** accurate.
- 5. Complete VS Form 16-78. Refer to the procedures for completing and distributing forms in *Appendix K*.
- 6. Ensure that the importation is moving under a bonded carrier or under Customs' bond.
- 7. Seal the importation.

Give the importer of importations of animal products or by-products consigned to an **unapproved** establishment or warehouse the following options:

- 1. Redirect the consignment to an approved establishment. Follow the directions listed under *Action to Take on Importations*Consigned to an Approved Establishment or Warehouse listed above.
- 2. Apply to VS for approval of the designated establishment. Follow the directions listed under Step 1.
- 3. Export immediately. Follow the directions under the regulatory action *Refuse Entry* on page 2-3-13.

Options to Give Importer on Importations Consigned to an Unapproved Establishment or Warehouse

4. Destroy the importation under APHIS supervision. Follow the directions under the regulatory action *Refuse Entry*.

Take the following steps on importations **not** consigned to an establishment or warehouse, but needs to be:

- 1. Explain to the importer why the importation **must** go to an approved establishment.
- 2. Use Appendix E, List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products, to help the importer choose an approved establishment. When the importation is consigned to an approved establishment, follow the directions under Step 1.

PPQ never recommends one establishment over another.

3. Refuse entry if the importer chooses to immediately export the importation under APHIS supervision. Follow the directions under the regulatory action *Refuse Entry* on page 2-3-13.

Assessing Civil Penalties

If you judge the passenger intentionally tried to smuggle animal products or by-products that are prohibited or have restrictions that cannot be met, then issue a civil penalty if all the following criteria are met:

- ◆ The passenger made a negative declaration (oral or written)
- You gave the passenger an opportunity to amend their declaration
- You have the legal authority to assess the civil penalty (see **Table 2-3-9**)

If you have the authority to refuse entry to an article, then you have the legal authority to assess a civil penalty. You have authority to issue a civil penalty for articles that are outright prohibited, that require treatment as a condition of entry, that require foreign certification, but lack that certification, or that require a written permit, but lack such a permit. Go to the procedures on assessing civil penalties and completing PPQ Form 591, Notice of Alleged Violation, in Manual for Agricultural Clearance.

Use **Table 2-3-9** to identify your authority when documenting violations.
