

# Remember

Shouldn't they be building the foundation first?  
Proving it works on a smaller scale, before trying  
to apply it to all of NOAA (*OAR, ESRL*)? Providing  
the tools to do what they're planning, and showing  
how those tools will improve our lives?

(I'm thinking we need an Infomercial here.)

*Italics Mine*

# Prophecy

- Prophets in the Old Testament were stoned (when they were right)!
- 20 years ago in a place far, far away.....

# What's in our Future?

- Denser Cores
- High-Speed Interconnects
- Simple/Consistent Configurations
- Automated Maintenance
- Network Integrated Security
- Power & A/C
