

Integrated Safety Management

BEHAVIOR (SAFETY CULTURE)

- principles of behavior (values)
- align motivations

PLAN WORK

- define project scope
- define facility functional requirements
 - define and analyze hazards
 - mitigate hazards
 - develop & implement controls
 - authorize work
 - assess & improve work execution
 - reaction to changed conditions

LEVELS

- **INSTITUTIONAL**
 - site wide programs
 - DOE directives & requirements, cultural values
 - DOE/contractor interface
- **FACILITY OR PROJECT**
 - Documented Safety Analysis (DSR, old SAR)
 - facility or project hazards
- **ACTIVITY**
 - **ENHANCED WORK PLANNING**
 - **WORKER EXECUTION**
