

Joint HSEP/TWC Meeting Transcribed Flipcharts
May 10, 2012

Thoughts along the Way

1. Emphasize desire for WTP to be successful
2. HAB not serving as a “cop” to the process
3. Keep advice concise/succinct
4. Frame advice with optimism/confidence for success

Page 1

Mike’s Potential Advice Framing

1. DOE capabilities
2. Contractor interface
3. Values - employee concerns
ISM – values, system
4. System – integration, technical issues

Page 2

TC & WM EIS Advice

- Question about financial investment (Kosten Report)
- Add Dirk & Dick to IM call
- Removed bullet re: connection w/RCRA Permit
- Ask for public workshop during 90 days
- “High level waste & low activity waste”

Page 3

Potential Advice Points – Grouping

1. There needs to be a technical basis for the plant design
2. Start advice points with: (for example)
“The Board wants the WTP to be successful, and offers the following advice...”
3. (Jean) Advise DOE/Ecology not to proceed until design is complete. Delay further actions for pretreatment at WTP

Page 4

Potential Advice Points – Grouping

4. Don’t let milestones make artificial constraints on quality/safety

Follow Up

1. Find out how many asbestos sites were “discovered”
IMs → Asbestos Report
2. Posters at WTP Open House available electronically, if people want them
3. Consider involving PIC in getting input/feedback on open houses
4. Provide info on how open houses funded (Pamela – DOE)
Bechtel, DOE, etc.
5. Track the relationship between RCRA permit conditions & safety culture commitments
