#### II.1. Animal health attestation

I, the undersigned official veterinarian, hereby certify that the day-old chicks<sup>(1)</sup> described in this certificate:

- meet the provisions of Directive 90/539/EEC; II.1.1
- II.1.2 have been hatched on:

(2)(3) either [the territory of code.....;]

[compartment(s).....;]

where the flocks from which the hatching eggs come were imported into the country, territory, zone or compartment of origin, this took place in accordance with veterinary conditions at least as strict as the relevant requirements of Directive 90/539/EEC and any subsidiary Decisions;

- II.1.3 come from:
  - (2)(3) either [the territory of code.....;]

 $^{(3)(4)}or$ [compartment(s).....;]

- which, at the date of issue of this certificate, was (were) free from Newcastle disease as defined in Regulation (EC) No 798/2008;
- where a surveillance programme for avian influenza according to Regulation (EC) (b) No 798/2008 is carried out;
- II.1.4 come from:

(2)(3) either [the territory of code.....;]

 $^{(2)(3)(12)}or$  [the territory of code....., excluding any area under official restrictions in relation to low pathogenic avian influenza as defined in Regulation (EC) No 798/2008;]

 $^{(3)(4)}or$ [compartment(s).....;]

(3)or

 $^{(3)}$ either [II.1.4.1 which, at the date of issue of this certificate was (were) free from highly pathogenic and low pathogenic avian influenza as defined in Regulation (EC) No 798/2008;] <sup>(3)</sup>or

[II.1.4.1 which, at the date of issue of this certificate was (were) free from highly pathogenic avian influenza as defined in Regulation (EC) No 798/2008, and

(3)either [(a) were derived from parent flocks which have been kept in an establishment in which avian influenza surveillance has been carried out with negative results within 21 days prior to the time of collection of eggs from which the day-old chicks were hatched;]

> [(a) were derived from parent flocks which have been kept in an establishment in which during the past 21 days prior to the collection of the eggs from which the day-old chicks were hatched a virus detection test with negative testing results for avian influenza has been carried out on a random sample of cloacal and tracheal/or oropharyngeal swabs taken from at least 60 poultry in the establishment or from all poultry if less than 60 are present in the establishment;]

- (b) the day-old chicks come from an establishment:
  - around which within a 1 km radius low pathogenic avian influenza has not been present within the last 30 days on any establishment:
  - where there has been no epidemiological link to an establishment where avian influenza has been detected within the last 30 days:1
- II.1.5 (a) have not been vaccinated against avian influenza;
  - were derived from parent flocks which: (b)
  - (3) either [have not been vaccinated against avian influenza;]
  - [have been vaccinated against avian influenza in accordance with a vaccination plan under Regulation (EC) No 798/2008 using:

----------	-----------------	-------	--------------------	-----------	-------

#### (11)**II.5. Animal transport attestation**

I, the undersigned official veterinarian, further certify that:

- II.5.1 the day-old chicks described in this certificate are transported in disposable boxes used for the first time and:
  - contain only day-old chicks of the same species, category and type coming from the same establishment:
  - (b) bear the following information:
    - the name of the country, territory, zone or compartment of consignment,
    - the species of poultry concerned,
    - the number of chicks,
    - the category and type of production for which they are intended,
    - the name, address and approval number of the production establishment,
    - the approval number of the establishment of origin,
    - the Member State of destination:
  - (c) are closed in accordance with the instructions of the competent authority to avoid any possibility of substitution of the contents;

The containers and vehicles in which the boxes mentioned above have been transported have been cleansed and disinfected before loading in accordance with the instructions of the competent authority.

## Notes

## Part I:

- Box I.8: provide the code for the zone or the compartment of origin, if necessary, as defined under code in column 2 of Part 1 of Annex I to Regulation (EC) No 798/2008.
- Box I.11: Name, address and approval number of hatcheries and the breeding establishment.
- Box I.15: Indicate the registration number(s) of railway wagons and lorries, the names of ships and, if known, the flight numbers of aircraft. In the case of transport in containers or boxes, the total number of these and their registration and where there is a serial number of the seal it has to be indicated in box I.23.
- Box I.19: use the appropriate Harmonised System (HS) code of the World Customs Organisation: 01.05 or 01.06.39.
- Box I.28: (Category): select one of the following: Pure line/grandparents/parents/laying stock/broilers/others.

#### Part II:

- "Day-old chicks" as defined in Regulation (EC) No 798/2008. (1)
- Code of the territory as it appears in column 2 of Part 1 of Annex I to Regulation (EC) No (2)798/2008.
- (3) Keep as appropriate.
- Insert the name of compartment(s). (4)
- (5) Keep if appropriate.
- (6) This guarantee applies only for day-old chicks belonging to the species of Gallus gallus.
- (7) If any of the results were positive for the serotypes below during the life of the flock, indicate as positive:
  - flocks of breeding poultry: Salmonella Hadar, Salmonella Virchow and Salmonella
  - flocks of productive poultry: Salmonella Enteritidis and Salmonella Typhimurium.
- (8)Keep if appropriate: indicate the name and active substance of antimicrobials used.
- (9)To delete if consignment is not intended for Finland and Sweden.
- (10)This guarantee is required only for poultry coming from countries, territories, zones or
