Abstract	1
Introduction	1
Purpose and Scope	4
Acknowledgments	5
NEWUDS Conceptual Model	5
System	6
Owner	6
Address	7
Location	7
Site	7
DataSources	8
Resource	8
Conveyance	9
Transaction/Rate	9
Alias	10
User-Defined Detail	10
Modeling Water-Use Activities	10
Withdrawal Networks	12
Withdrawal and Use by a Single User (Network 1)	12
Withdrawal and Use by an Aggregate of Users (Network 2)	12
Withdrawal and Distribution by a Simple Community-Water System (Network 3)	12
Return Networks	16
Use and Return by a Single User (Network 4)	16
Use and Return by an Aggregate of Users (Network 5)	16
Collection and Return by a Simple Community-Wastewater System (Network 6)	16
User Networks	20
Withdrawal, Use, and Return by a Simple User (Network 7)	20
Withdrawal, Distribution from a Community-Water System, Use, Collection to a Community-Wastewater System, and Return by a Complex User (Network 8)	20
Complex Community System Networks	22
Withdrawal and Regional and Local Distribution by a Complex Community-Water System (Network 9)	22
Regional and Local Collection and Return by a Complex Community-Wastewater System (Network 10)	22
Entering or Transferring Data Into NEWUDS	25
Required Data Set	25
Data Compilation	25
Data Entry Sequence	29
Create Systems	29
Establish Ownership and Address	29
Establish Location	32
Describe Site	34
Link to Resource	37
Link Sites Through Conveyances	37

Establish Transaction	39
Establish Rate	39
Enter Aliases for Sites	41
Retrievals	41
Location-Owner-SiteType Query	41
Owner-Site-Resource Query	41
Withdrawals-and>Returns-by-Resource Query	44
Conveyance-Description Query	44
Summary and Conclusions	46
