Statement of US Secretary of Labor Hilda L. Solis on April employment numbers	http://www.dol.gov/opa/media/pr ess/opa/OPA20100652.htm	Press Release	Secretary of Labor Hilda L. Solis today issued the following statement on the April 2010 Employment Situation report released today:	Secretary of Labor Hilda L. Solis today issued the following statement on the April 2010 Employment Situation report released today: "This past April, the economy gained 290,000 jobs, and the unemployment rate rose to 9.9 percent. "This is a remarkable change from when the administration took office. In April of 2009, we lost 528,000 jobs. Our economy has added jobs in five of the last six months, and we are seeing growth in a broad range of industries including health care, manufacturing, professional and business services, and construction. In the last two months, we have added more than 500,000 jobs. "A changing job market and the evolving clean energy economy are creating new and exciting prospects for workers. At the U.S. Department of Labor, we will continue our efforts to ensure men and women across the nation have the tools they need to access these opportunities," said Secretary of Labor Hilda L. Solis. "Turning green to gold — with a constant focus on safety — just makes sense. It means jobs that have livable wages, safe working conditions and worker protections." Over the past year, the Department of Labor has launched a series of initiatives to support and promote green job creation. Highlights from today's report appear below.
