2. HEADQUARTERS RESEARCH FACILITY (Name and Address, as registered with USDA, include Zip Code)  BIORELIANCE CORPORATION 9630 MEDICAL CENTER DR ROCKVILLE, MD 20850			

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

FACILITY LOCATIONS(sites)
BIORELIANCE CORPORATION ROCKVILLE, MD 20850

**REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)**

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs		1473	2440		3913
7. Hamsters		598	1610		2208
8. Rabbits		381	3		384
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

## Optional Column E Explanation Form

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

---

1. Registration Number: 51-2-0013
2. Number 4 of animals used in this study.
3. Species (common name) Rabbits of animals used in this study.
4. Explain the procedure producing pain and/or distress.

Rabbits are used in the IACUC approved protocol for the generation of polyclonal antibodies. Only one rabbit is used for each antigen. Under the protocol each rabbit may be injected only once with Freund's Complete Adjuvant (FCA). With the small amount of FCA injected subcutaneously (0.2 ml in a total injection volume of 0.5 ml) on the back of each rabbit, no clinical signs of discomfort have been observed.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see question 6 below)

Rabbits are the ideal species to generate highly specific polyclonal antibodies. No efficient alternative method is available that replaces the biological response of these animals to specific antigens. A discussion of alternatives and the protocols followed are presented in the following articles: Review of Polyclonal Antibody Procedures in Mammals and Poultry, ILAR vol. 37 (3), 1995, and Information Resources for Adjuvants and Antibody Production: Comparisons and Alternative Technologies 1991-1997, AWIC Resources Series, no. 3, August, 1997.

6. What, if any, federal regulations require this procedure? Cite the agency, the Code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

### Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 51-R-0025

2. Number 11 of animals used in this study.

3. Species (common name) Ferret of animals used in the study.

4. Explain the procedure producing pain and/or distress.

Ferrets are being trained to detect differences in sounds using operant training. The ferrets are placed on water restriction (no water in their home cages) and given water when in the testing chambers. They generally are tested twice daily (am and pm) and after the pm testing session are allowed to drink to satiation. Maximum amount of time of water restriction is 24 hours. Ferrets are monitored daily for weight loss and skin turgidity. Ferrets must be taken off study if their skin turgidity indicates dehydration or their weight goes below a minimum (based on free food and water weight). As mandated by the IACUC, at a minimum, each ferret must be given 2 days of free water every two weeks. Current practices give the ferrets free food and water during the weekends.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Extensive attempts to train the ferrets to work for a food reward proved to be unsuccessful. Under the current paradigm they all seem to be doing well both with the research and with their overall health.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

### Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 51-R-0031

2. Number 64 of animals used in this study.

3. Species (common name) Guinea Pig of animals used in the study.

4. Explain the procedure producing pain and/or distress.

see attached

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

see attached

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency FDA Office of CFR 21CFR 610.10

Establishment Licensing and Product Surveillance

Division of Biological Quality Control

4. Guinea pigs are injected subcutaneously with a Diphtheria toxin/vaccine mixture, Tetanus toxin/vaccine mixture, Diphtheria toxin alone or Tetanus toxin alone. The end point of the assay is survival of the animals due to the potency of the vaccine or death of the animals in the presence of toxin alone or in conjunction with an ineffective vaccine. During the 8 day duration of this assay, the animals are assessed for the degree of Diphtheria or Tetanus symptoms experienced.
5. The purpose of the assay is to determine the potency of the Diphtheria and Tetanus vaccines intended for human use. Any relief of the pain or distress of the animals, i.e. the inhibition of the effects of Diphtheria or Tetanus toxin, would negate the purpose and effectiveness of the test.

No *in vitro* tests are available or accepted as a substitute for the efficacy evaluation of Diphtheria/Tetanus vaccines intended for childhood immunizations. The Washington Biotechnology, Inc. protocol is based on an FED mandated test procedure and includes the results of up-to-date literature search for alternative methods.
