A Profile of U.S. Importing and Exporting Companies, 2008 - 2009

The U.S. Census Bureau, Department of Commerce, releases the report, *A Profile of U.S. Importing and Exporting Companies, 2008 - 2009*. This is the first report to include information regarding U.S. importers. It provides information on identified companies and their known export or import value. Identified U.S. companies are defined as companies that can be linked to import or export transactions. The known value is the value of export or import transactions linked to specific companies. The decreases in known export and import values correspond with the overall decrease of trade in 2009; total export value decreased by 18.0 percent and total import value fell by 25.9 percent. The number of identified exporters fell by 4.8 percent in 2009 and the known export value decreased by 18.4 percent compared to 2008. The number of identified importers decreased by 5.3 percent in 2009 and the known import value decreased by 23.4 percent.

In 2009 the identified U.S. exporters accounted for \$939 billion in exports or 88.9 percent of the total value of exported goods (\$1,056 billion). In 2009 the number of identified U.S. exporters was 275.8 thousand, down from the revised 2008 estimate of 289.7 thousand. In 2008, the known value was revised to \$1,151 billion.

In 2009 identified U.S. importers accounted for

/1 Includes Canadian electricity and natural gas imports

\$1,350 billion in imports or 86.6 percent of the total value of imported goods (\$1,560 billion). The number of identified U.S. importers was 179.8 thousand, down from 189.9 thousand in 2008.

Because not all shipments can be linked to specific companies, the number of exporters and importers may be understated. The total export value that could not be linked to specific companies totaled 11.1 percent in 2009 and 10.6 percent in 2008. This

portion of the total export value includes exports by individuals, governments, low-value estimates, and information filed with missing, unknown, or incomplete company identifiers. The total import value that could not be linked to specific companies totaled 13.4 percent in 2009 and 16.2 percent in 2008. This portion of the total import value includes imports by individuals, articles exported and returned (the condition was not advanced), low-value estimates, electricity and natural gas imports from

Canada, and information filed with missing, unknown, or incomplete company identifiers. Export and import values are taken from the detailed transactions used to compile the official U.S. trade statistics. Company size and type information are taken from administrative records and census or survey data on file with the Census Bureau.

The overall findings for 2009 and 2008 are shown in Table 1, which shows the proportion of exports and imports that were successfully matched to companies in the 2009 Business Register. For exports, the 2008 figures in this report are revised from data released in the 2007-2008 exporter profile. The revisions are based on the ability to match additional records.

Who Exports and Imports?

During 2009, 9.7 percent (26.8 thousand) of all identified exporters were multiple location companies; these companies accounted for 74.9 percent of the known export value (Exhibit 1a). In contrast, 249.1 thousand single location companies (making up 90.3 percent of the exporting companies) contributed 25.1 percent of the known export value.

In 2009 10.2 percent of all identified importers were multiple location companies; these companies accounted for 74.9 percent of the known import value (Exhibit 1d). Single location companies, making up 89.8 percent of the importing companies, contributed 25.1 percent of the known import value.

Trade with related parties accounted for 35.9 percent of the known export value by multiple location companies compared to 15.0 percent by single location companies (Exhibit 3a).

Exhibit 1a shows that manufacturers accounted for the largest portion of the 2009 known value, 59.9 percent, with 25.5 percent of the identified exporters. “Other companies” and wholesalers accounted for 16.3 percent and 23.2 percent of the known export value, respectively; unclassified exporters accounted for the remainder.

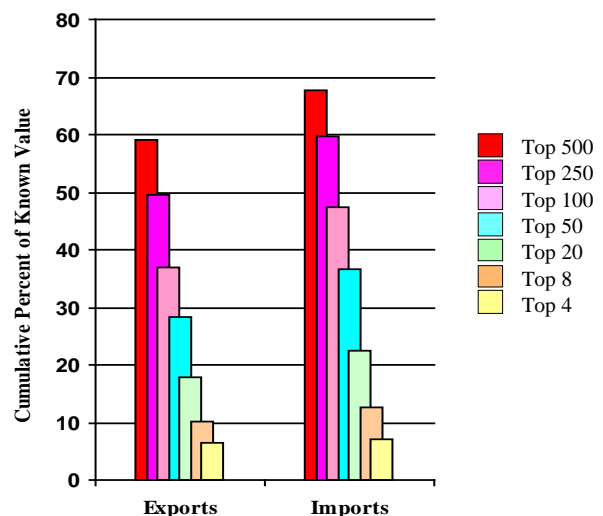

For imports, manufacturers accounted for the largest portion of 2009 known value, 44.5 percent with 19.6 percent of the known importers. “Other

companies” and wholesalers accounted for 21.6 percent and 33.4 percent of the known import value (Exhibit 1d), respectively; unclassified companies accounted for the remainder of the known value.

The “other companies” category includes manufacturers of prepackaged software and books; brokers or freight forwarders and other transportation and warehousing firms, which often act as agents for the true exporter; business, engineering, and management services; oil and gas extraction companies; coal mining companies; and communication services companies.

The number of multiple location exporting companies fell by 5.4 percent in 2009. All company types decreased; manufacturers decreased by 4.1 percent, wholesalers by 1.8 percent, “other companies” by 7.1 percent, and “unclassified companies” by just 13.7 percent (Exhibit 1c).

2009 Export and Import Concentration by Top Companies

The number of multiple location importing companies decreased by 4.5 percent in 2009. Manufacturers fell by 6.2 percent, wholesalers by 3.2 percent, “other companies” by 6.9 percent, and “unclassified companies” by 19.0 percent (Exhibit 1f).

The 2009 *Export and Import Concentration by Top Companies* bar chart shows the concentration by percent of known export and import values. Of the known export value for 2009, 59.0 percent was accounted for by the top 500 companies. Just less than half of the total known export value was accounted for by the top 250 exporters.

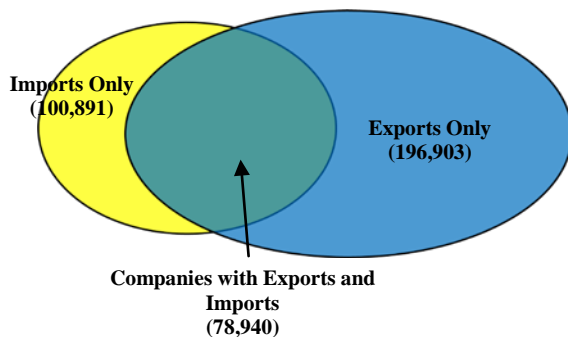

For imports, 67.7 percent of the known value was accounted for by the top 500 companies and 59.7 percent of the total was accounted for by the top 250 importers.

For exports, the top 100 manufacturers contributed nearly one-third of the total known export value and over one-half of all exports by manufacturers (Exhibit 2a). For imports, the top 100 manufacturers contributed 30.7 percent of the total known import value and over two-thirds of all imports by manufacturers (Exhibit 2c).

Among the company types, the top 50 manufacturers accounted for 42.2 percent of the known export value of the manufacturing sector. The top 50 companies represented 34.7 percent of the known export value for wholesalers and nearly 36.7 percent of the known value for “other companies” (Exhibit 2a).

For imports, the top 50 importing manufacturers accounted for 59.0 percent of the known value of this sector. The top 50 companies represented 36.8 percent of the known import value for wholesalers and about 62.7 percent of the known value for “other companies” (Exhibit 2c).

2009 Number of Identified Companies that Only Export, Only Import, or do Both

The 2009 Number of Companies that Export or Import Venn diagram shows the number of identified companies with both exports and imports. During 2009, 78,940 companies both exported and imported goods, 196,903 companies only exported goods, and 100,891 companies only imported goods. The companies that both exported and imported in 2009 accounted for 85.6 percent of the known export value and 92.7 percent of the known import value. Among companies that both imported and exported goods, 30.7 percent were

manufacturers, 48.1 percent were wholesalers, and 20.8 percent were “other” (Exhibits 1a, 1d, and 1g).

Large-Sized Companies

Large identified companies (those employing 500 or more workers) were responsible for 67.2 percent of the known export value and 68.1 percent of known import value. They represented only 2.4 percent of all identified exporters and 2.9 percent of all known importers (Exhibits 1a and 1d).

Large companies dominated manufacturers’ exports, with 3.6 percent of manufacturing exporters (2,557 of 70,331) accounting for 82.8 percent of manufacturing export value (\$466 billion of \$562 billion). Similarly, large wholesalers, who comprise 0.8 percent of the wholesalers who export, accounted for 38.9 percent of the value of known exports by wholesalers. Large companies in the “other” category represented 3.1 percent of the identified exporters in the “other” category, and 52.2 percent of the known value. Large manufacturers’ export value to related parties represented 38.5 percent of the manufacturers’ total (Exhibit 3a).

Large companies comprised 6.4 percent of manufacturing importers (2,264 of 35,243) accounting for 87.1 percent of manufacturing import value (\$524 billion of \$601 billion). Large wholesalers, who comprise approximately 0.8 percent of the wholesalers who import, accounted for 43.2 percent of the value of known imports by wholesalers. Large companies represented 3.7 percent of identified importers in the “other” category (Exhibit 1d).

Large companies accounted for 5.7 percent of those that both exported and imported goods in 2009. These large companies represented 77.1 percent of the known export value and 73.0 percent of the known import value. (Exhibit 1g).

Small- and Medium-Sized Companies

Small- and medium-sized companies (those employing fewer than 500 workers, including number of employees unknown) comprised 97.6 percent of all identified exporters and 97.1 percent of all identified importers. They account for 32.8 percent and 31.9 percent of the known export and import value, respectively. The following findings were extracted from Exhibits 1a, 1d and 1g:

- 96.4 percent of manufacturing exporters were small- or medium-sized companies; however they contributed just 17.2 percent of the sector's \$562 billion in exports. 93.6 percent of manufacturing importers were small- or medium-sized; they accounted for 12.9 percent of the sector's \$602 billion in imports.
- 99.2 percent of exporting wholesalers were small- or medium-sized companies; they accounted for 61.1 percent of the sector's \$218 billion in exports. 99.2 percent of wholesaler importers were small- or medium-sized; they contributed 56.8 percent of the sector's \$451 billion in imports.
- 96.9 percent of "other companies" with exports were small- or medium-sized companies. 96.3 percent of importing "other companies" were small- or medium-sized.
- Among companies that both exported and imported in 2009, small- or medium-sized companies accounted for 94.3 percent of such companies, accounting for 22.9 percent of the known export value and 27.0 percent of the known import value.

Export and Import Markets

The country groups used in the 2009 Profile have been revised from those used in earlier Profiles (Exhibits 5a, 5b, 5c, 5d, 5e, 5f, 5g, and 5h). Countries were added to the Euro Area and Asia Near East, and removed from the Organization of Petroleum Exporting Countries (OPEC). Please refer to World Area Country Groupings for Exhibit 5.

Most identified companies exported to (58.0 percent) or imported from (60.8 percent) only one

foreign country. A small percentage of exporters, 0.4 percent, shipped to 50 or more countries; these companies accounted for 48.3 percent of the known export value (Exhibit 4a). Less than 0.1 percent of importing companies imported from 50 or more countries, accounting for 18.9 percent of the known import value (Exhibit 4c).

In 2009 82.6 percent of all exporting companies exported to at least one of the top 25 U.S. trading partners. The largest number of identified companies exported to Canada, followed by Mexico, the United Kingdom, Germany, and China (Exhibit 5a). 89.5 percent of all importing companies imported from at least one of the top 25 trading partners. The largest number of identified companies imported from China, followed by Taiwan, Germany, Italy, and India (Exhibit 5d).

U.S. companies that both exported to and imported from Canada represented 69.0 percent of known export value to Canada in 2009 (\$107 billion of \$155 billion). Companies exporting to and importing from China represented 67.1 percent of known import value from China (\$187 billion of \$278 billion). The top 5 countries for identified U.S. companies that had both exports and imports in 2009 were China, Germany, the United Kingdom, Canada, and Mexico (Exhibits 5a, 5d, and 5g).

Exports and Imports by State

The Census Bureau releases data on exports by state based on the origin of movement (OM). The OM data series is based on where the goods began their journey to the port of export as reported with the electronic export information. Similarly, import statistics by state are based on the state of destination (SD). This is the reported state, U.S. territory or U.S. possession where the merchandise is destined. Exhibit 6 shows the number of companies exporting from and importing to each state during 2008 and 2009 based upon these definitions. (Note that the same company can be shown as exporting to or importing from multiple states.)

- In 2009, the top five states, based on the number of identified exporting companies, were California, Florida, New York, Texas, and Illinois. Exporters in these five states represented 41.5 percent of the total known export value. For importing companies, the top five states

were California, New York, Florida, Texas, and New Jersey. Importers in these states accounted for 47.6 percent of the total known import value.

- States/territories recording the largest decreases in known export value in 2009 were New Mexico (56.2 percent), South Dakota (40.9 percent), District of Columbia (33.9 percent), Kansas (33.0 percent), and Arizona (29.2 percent). Wyoming (46.8 percent), New Hampshire (42.9 percent), Montana (40.8 percent), District of Columbia (39.4 percent), and North Dakota (38.5 percent) had the largest decreases in known import value.

Comparison of 2008 and 2009 Results

The relative proportions of exports and imports accounted for by manufacturers, wholesalers, and “other companies” based upon both number of companies and known value remained consistent from 2008 to 2009. Below are a number of noteworthy year-to-year changes (Exhibits 1c, 1f, 5c, and 5f):

- The known export value decreased by 18.4 percent. The number of identified exporting companies decreased by 13,868 or just less than 4.8 percent. The single location companies decreased by 12,347 and the multiple location companies decreased by 1,521.
- The known import value fell by 23.4 percent. The number of identified importing companies decreased by 10,104 or 5.3 percent. The single location companies decreased by 9,229 and the multiple location companies decreased by 875.
- The number of small- and medium-sized exporting companies decreased by 4.7 percent from 282.6 thousand in 2008 to 269.3 thousand in 2009, while the number of large companies decreased by 7.5 percent from 7,108 to 6,574.
- The number of small- and medium-sized importing companies decreased by 5.2 percent from 184.3 thousand in 2008 to 174.6 thousand in 2009, while the number of large companies decreased by 8.0 percent from 5,674 to 5,219.
- The number of exporting wholesalers fell by nearly 1.8 percent from 95.3 thousand in 2008

to 93.6 thousand in 2009. Additionally, the number of exporting manufacturers decreased by 4.1 percent from 73.3 thousand in 2008 to 70.3 thousand in 2009.

- The number of importing wholesalers fell by 3.2 percent from 84.8 thousand in 2008 to 82.0 thousand in 2009. Additionally, the number of importing manufacturers decreased by 6.2 percent from 37.6 thousand in 2008 to 35.2 thousand in 2009.
- Among the top 25 U.S. export trading partners, Belgium (11.2 percent), Germany (9.4 percent), Italy (9.4 percent), and Canada (8.7 percent) showed the largest percentage decreases in the number of identified exporting companies. Only 3 of the top 25 U.S. export trading partners saw an increase in the number of identified exporting companies between 2008 and 2009: Saudi Arabia (4.4 percent), Columbia (1.2 percent) and Chile (1.2 percent).
- Among the top 25 U.S. import trading partners, Venezuela (19.3 percent), Singapore (13.2 percent), Brazil (12.1 percent), the Netherlands (9.7 percent), and France (9.7 percent) showed the largest percentage decreases in the number of identified importing companies.

Some portion of these changes may reflect changes in the match rate rather than an actual change in the number of companies. During the process of identifying individual companies, it was not possible to investigate every unmatched case. Priority was given to identifying unmatched companies having high values of trade. As a result, the information on small importers and exporters is most likely understated. Also, users should not assume that the unidentified companies reflected the same distribution of company types and sizes as the identified (known) exporters and importers. Comparisons between the number of companies importing and exporting in given categories or different years might be somewhat misleading due to differences in the percent of value we were able to match to specific companies.

(1) Known value is defined as the portion of U.S. total exports that could be matched to specific companies.

(2) Cumulative percents are cumulative proportions relative to a particular sector's totals, e.g., wholesalers with less than 50 employees account for 42.6 percent of the total wholesalers known value and 91.1 percent of the total number of all wholesalers.

(3) Includes missing employment data, nonemployers, and companies that reported annual payroll but did not report any employees on their payroll during specified period(s) in 2008.

(4) Includes manufacturing companies of prepackaged software and books, freight forwarders and other transportation service firms, business services, engineering and management services, gas and oil extraction companies, coal mining companies, communication services, etc.

(1) Known value is defined as the portion of U.S. total general imports that could be matched to specific companies.

(2) Cumulative percents are cumulative proportions relative to a particular sector's totals, e.g., wholesalers with less than 50 employees account for 38.5 percent of the total wholesalers known value and 92.2 percent of the total number of all wholesalers.

(3) Includes missing employment data, nonemployers, and companies that reported annual payroll but did not report any employees on their payroll during specified period(s) in 2008.

(4) Includes manufacturing companies of prepackaged software and books, brokers, business services, engineering and management services, gas and oil extraction companies, coal mining companies, communication services, etc.

(1) Known value is defined as the portion of U.S. total exports that could be matched to specific companies.

(2) Detail may not sum to 100 percent because companies may export to both related and nonrelated parties.

(3) Includes missing employment data, nonemployers, and companies that reported annual payroll but did not report any employees on their payroll during specified period(s) in 2009.

(4) Includes manufacturing companies of prepackaged software and books, freight forwarders and other transportation service firms, business services, engineering and management services, gas and oil extraction companies, coal mining companies, communication services, etc.

(1) Known value is defined as the portion of U.S. total exports that could be matched to specific companies.

(2) Detail may not sum to 100 percent because companies may import from both related and nonrelated parties.

(3) Includes missing employment data, nonemployers, and companies that reported annual payroll but did not report any employees on their payroll during specified period(s) in 2008.

(4) Includes manufacturing companies of prepackaged software and books, freight forwarders and other transportation service firms, business services, engineering and management services, gas and oil extraction companies, coal mining companies, communication services, etc.

(5) Includes corresponding value or percent of adjacent cell (D) suppressed to avoid disclosure.

(1) Known value is defined as the portion of U.S. total general imports that could be matched to specific companies.

(2) Detail may not sum to total because companies may import to more than one state.

(3) Includes transactions not reported by state, low-value estimates, and timing adjustments.

Technical Documentation

NOTE TO USERS: This section contains critical information on sources and reliability of data, as well as definitions of terms and methodological procedures that users should consider before attempting to interpret or analyze the statistical data presented in this report. Failure to do so may affect the results.

Overview

This report is a continuing series of reports profiling U.S. exporters. The first report, *A Profile of United States Exporters: Initial Findings from the Exporter Data Base*, was released by the International Trade Administration in September 1993. That report was based on Census Bureau data compiled both from the 1987 Economic Census and from documents filed for export clearances during 1987 and used a methodology not employed in succeeding reports. Subsequent reports, covering 1992 through present, are based on economic census and survey data on file at the Census Bureau, administrative records from other government agencies, and documents filed for export clearances. The 2009 report introduces import data to the profile. The new annual release is called *A Profile of U.S. Importing and Exporting Companies*.

These profiles are compiled by the Foreign Trade Division of the U. S. Census Bureau. The International Trade Administration (ITA) and the International Trade Commission are partial sponsors of the work, providing both financial assistance and advice on data user needs. The ITA also sponsors more detailed Exhibits, which will be available on their Web site later this year. Users will be notified on the ITA Web site (www.ita.doc.gov) when this information is available.

Effective with the 1997/1998 report, companies are classified according to the North American Industry Classification System (NAICS) instead of the Standard Industrial Classification (SIC) system. There are differences in the ways NAICS and SIC classify certain types of companies. For example, manufacturers of prepackaged software and books are classified as manufacturers under SIC and as “Other” types of companies under NAICS. Users are advised to consider these differences when making year-over-year comparisons of exporters and exporter characteristics before and after 1997. This profile, based on new and revised data, uses the same methodology as previous years.

The importer and exporter profiles are developed to provide both government and private sector users with information about the importing and exporting community including employment size, type of company, and major foreign markets. In this report the data are presented in Exhibits 1 through 6, where the export and import data use letters a through h to designate whether the data represents statistical year, prior year, or year-over-year comparisons. Letters g and h represent data on companies that both import and export for current and prior year. The previous year’s export figures in this report are revised from data released in the previous exporter profile. The revisions are based on the ability to match additional export records.

The exhibits in this report include detailed breakdowns based upon the number of employees of the identified importing and exporting companies. In presenting these results, companies are classified as small (less than 100 employees including number of employees unknown), medium (100 to 499 employees), and large (500 or more employees).

Exhibit 3 provides information on exports to related parties, such as parent or subsidiary firms. Two parties are considered related if either party owns, directly or indirectly, 10 percent or more of the other party. We do not currently capture related party information for imports entered into U.S. Foreign Trade Zones. As a result, the import related party exhibits (3c and 3d) are not available at this time.

All percentages stated in this report, unless otherwise specified, were calculated based solely upon the statistical and prior years’ import or export values that could be linked to specific active companies in the Business Register--the “known value.” In addition, the source of the administrative records, the Business

Register, was restructured starting with 2002 data. For explanations of the methods used in tabulating the information as well as non-sampling errors and other limitations of the export data in this report, see the **Methodology** section below. Users are advised to consider these limitations when analyzing this information as they may affect the results. Users should cite the U.S. Census Bureau, U.S. Department of Commerce as the source of the information in this report, not as the source of their analyses.

Sources of Information

The importer and exporter profiles were created from import and export merchandise trade information and company characteristics contained in the Census Bureau's data base of company information, the Business Register. Company characteristics are gathered through economic censuses and surveys and supplemented with employment and payroll information provided by the Internal Revenue Service. Data on U.S. exports of merchandise from the U.S. to all countries, except Canada, is compiled from the Electronic Export Information (EEI) filed by the United States Principal Party in Interest (USPPI) or their agents through the Automated Export System (AES). The EEI is unique among Census Bureau data collection methods since it is not sent to respondents soliciting responses as in the case of surveys. Each EEI represents a shipment of one or more kinds of merchandise from one exporter to one foreign importer on a single carrier. Filing the EEI is mandatory under Chapter 9, Title 13, United States Code. Qualified exporters or their agents submit EEI data by automated means directly to the U.S. Census Bureau. The United States is substituting Canadian import statistics for U.S. exports to Canada in accordance with a 1987 Memorandum of Understanding signed by the Census Bureau, U.S. Customs and Border Protection, Canadian Customs, and Statistics Canada. The import trade statistics are compiled from multiple sources. The majority of import data comes from transactions filed electronically by importers or their licensed brokers via the Automated Broker Interface (ABI) or the Automated Commercial Environment (ACE). Other sources include electronic or paper documents for foreign trade zone admission and paper import entry summaries. In addition, data on imports of electricity and natural gas from Canada are obtained from Canadian sources.

Methodology

This profile was compiled using company identifiers or company names from import and export transactions to electronically link trade data to company characteristics in the Business Register. Beginning with data year 2002, the Business Register database was completely restructured to include additional information. Due to these changes and problems with our prior methodology, the matching routines used to create the Profile were updated. Despite the limitations within the Business Register, we are able to maintain consistency with our prior Profiles' matching routines.

Less than 3 percent of the total export value and slightly more than 3 percent of the import value, including low-value estimates, imports or exports by U.S. and foreign governments, timing adjustments, and end-of-year revisions, was excluded from this matching process because the transactions cannot be attributed to specific importing or exporting companies. Export transactions that could not be matched electronically were investigated and linked manually to specific companies using a combination of criteria, including company name, location, type, and product. Import transactions that could not be matched electronically were left unmatched. Unlike exports, all of the identifiers are numeric for imports, so the name matching investigations used to increase the export match rates cannot be applied. A comparison of the overall match rates, based on total import and export value, is presented in Table 1 under ***Distribution of Exports and Imports by Identified and Unidentified Companies***, at the beginning of this report.

It was not possible to investigate every unmatched export transaction, so priority was given to those with the highest export values. The percentage of unidentified value tends to decrease each year as more companies are identified and value thresholds triggering investigation are lowered. Therefore, users should make year-to-year comparisons with caution and be aware that the number of small companies and their associated known value are most likely understated. Similarly, the known value may not reflect all shipments by identified companies.

Data Quality

Quality assurance procedures were applied to all phases of collection, processing and tabulation of the information in this report to minimize errors. The data continue to be subject to non-sampling errors in data reporting (of the basic trade statistics and the administrative record source data), coding, keying, and in coverage (due to failure to identify all importing and exporting companies). For an explanation of non-sampling errors affecting the trade statistics, see the **Information on Goods and Services** section of the FT 900 U.S. International Trade in Goods and Services, or call (301)763-2227 to request a copy of the release. One can also obtain this information from the web at the following address:

http://www.census.gov/foreign-trade/Press-Release/current_press_release/press.html#prior

The characteristics of importing and exporting companies in this report reflect companies that could be matched to the Business Register. When analyzing these data, users should consider the possible impact of unmatched transactions and unidentified companies on their results. Unidentified importers or exporters may not reflect the same distribution of company types and sizes as identified companies. Similarly, comparisons between the number of companies importing or exporting in given categories may be misleading due to differences in the percentage of value matched to companies of various types and sizes.

Year-over-year comparisons should also be made with caution. Changes in the number of importers or exporters and the value of their transactions, the known value, may be due to differences in match rates or companies entering/dropping out of the import/export market. Table 1, under ***Distribution of Exports and Imports by Identified and Unidentified Companies***, at the beginning of this report shows a comparison of the match rates, based on total value, as well as the value attributable to companies that either imported or exported in both years.

Data by State

The data contained in Exhibits 6a and 6b are based on the Origin of Movement (OM) State. The U.S. state of origin is the 2-character postal code for the state in which the goods begin their journey to the port of export. This field allowed the compilation of the Origin of Movement - Based on Origin State Series. The OM series based on origin state has been available since 1987 and is intended to reflect the transportation origin of exports.

The data contained in Exhibits 6c and 6d are based on the U.S. State of Destination. This is defined as the U.S. state, U.S. territory or U.S. possession where the merchandise is destined, as known at the time of entry summary filing. For shipments into Foreign Trade Zones, the import state represents the location of the zone.

For more complete information on the state data series, refer to the notice at: <http://www.census.gov/foreign-trade/aip/elom.html>

Definitions of Terms

Business Register. Data base of companies included in economic census and surveys conducted by the Census Bureau.

Company. A company is a business consisting of one domestic location (single location company) or more than one domestic location (multiple location company) under its ownership or control.

Identified Companies: Identified companies are those companies to which one or more transactions were matched. The import or export value associated with these companies is termed “*known value*.”

Unclassified Companies: These are identified companies for which no NAICS classification (manufacturers, wholesalers or other companies) could be assigned.

Company Size. Company sizes are based on employment: small (less than 100 employees including number of employees unknown), medium (100 - 499 employees), and large (500 or more employees).

Company Type. Company types are based on the North American Industry Classification System (NAICS) and are broken out into manufacturers, wholesalers, and all other companies. Those companies for which a valid NAICS code is not available are placed in the *unclassified* grouping.

Employment. Employment includes all employees, full-time or part-time, reported on a firm’s payroll during specific payroll periods.

General Imports. "General Imports" measure the total physical arrivals of merchandise from foreign countries, whether such merchandise enters consumption channels immediately or is entered into bonded warehouses or Foreign Trade Zones under Customs custody.

Low-value Estimates. Export transactions valued under \$2,501 and import transactions valued under \$251 for certain quota items and \$2001 for all other imported goods, are not required to be reported. Instead, the Census Bureau estimates the value of such shipments to each country using factors based on the ratios of low-valued shipments to individual country totals for past periods. For more information please see the following link: <http://www.census.gov/foreign-trade/aip/lvpaper.html>

Related Party. A related party transaction is one between a U.S. exporter and a foreign consignee, where either party owns (directly or indirectly) 10 percent or more of the other party.

State of the Origin of Movement (OM). The OM series data provides export statistics based on the U.S. state from which the merchandise starts its journey to the port of export; i.e., the transportation origin. This information is reported by the exporter. See the **Data Quality** section above for limitations of this data series.

State of Destination. The State of Destination data series provides import statistics based on the U.S. state, U.S. territory or U.S. possession where the merchandise is destined, as known at the time of entry summary filing. This information is reported by the importer. See the **Data Quality** section above for limitations of this data series.

Value (Exports). The export values in this report are f.a.s. (“free alongside ship”) and include both domestic exports and re-exports of foreign merchandise. Several different values are given:

Total export value: The total value includes all transactions whether or not linked to specific companies.

Known value: The value of transactions linked to specific companies. All percentages given for company size and types are based on known value.

Unidentified Value: The valued transactions that were not linked to a specific company. Note that these shipments might have been exported either by identified companies or by other companies not identified in the linking process.

Value (Imports). The import values in this report are customs import value. The Customs value is the value of imports as appraised by the U.S. Customs and Border Protection in accordance with the legal requirements of the Tariff Act of 1930, as amended. This value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. The term "price actually paid or payable" means the total payment (whether direct or indirect, and exclusive of any costs, charges, or expenses incurred for transportation, insurance, and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation in the United States) made, or to be made, for imported merchandise by the buyer to, or for the benefit, of the seller. The type of imports shown in this report is "general." Please see the definition for "General Imports" for more information. Several different values are given:

Total import value: The total value includes all transactions whether or not linked to specific companies.

Known value: The value of transactions linked to specific companies. All percentages given for company size and types are based on known value.

Unidentified Value: The valued transactions that were not linked to a specific company. Note that these shipments might have been imported either by identified companies or by other companies not identified in the linking process.
