

## Flight Plan for 8-6-2007

### Objectives:

- 1) Look for subvisible cirrus near the cold pool at the Galapagos – flights coordinated with the ER-2 and WB57.
- 2) Fly in stratus near the Galapagos (coordinated with ER-2) and fly across the N-S sea surface temperature gradient for changes in biogenic emissions
- 3) Go out and return porpoising through the upper tropopause to look for convective outflow
