General Signup. Producers with eligible lands compete for acceptance based on an environmental benefits index (EBI) during specified enrollment periods. Producers may submit offers below soil-specific maximum rental rates to increase EBI ranking. The most recent general signup (Signup 20) was conducted during a 4-week period in early 2000. About 2.3 million acres were approved.

Continuous Signup. Producers with eligible lands may enroll certain high priority conservation practices, such as filterstrips and riparian buffers, at any time during the year without competition. In addition to annual soil rental payment and cost-share assistance, many practices are eligible for additional annual and up-front financial incentives. **Farmable Wetlands Pilot** enrollment began in June 2001 under modified continuous signup provisions.

Conservation Reserve Enhancement Program (CREP). Under CREP agreements, Federal/State partnerships, currently in 20 States, implement projects designed to address specific environmental objectives through targeted CRP enrollments. Signup is held on a continuous basis, general signup practices may be included, and additional financial incentives are generally provided.

The accompanying tables are based on contract data developed and entered in CRP data files by USDA Service Centers, and are based on the physical location of the CRP contracted land. Some adjustments have been made to correct miscoded data in the contract files. Farmable Wetland Pilot contracts are included in the continuous signup tables. Acreage represents fiscal year 2001 ending enrollment. These lands were not available for cropping during the year ending September 30, 2001.**
