

Proposal: Extension of the Subscription Window

- Extend the Subscription window approximately 2.5 weeks to October 18 (October 12 for Slice/Block contract).
- September 30 will still be the deadline for purposes of determining whether a particular load is subject to the Targeted Adjustment Charge.
- Provide the customer a contract right to either terminate their Subscription contract or reduce the amount of power at the close of the mini 7(i) rates process. Such right would also be provided if BPA increases rates in response to a remand by FERC or a court order.
