

Department of Veterans Affairs (VA)

Executive Order 13520 – Reducing Improper Payments

FY 2011 Fourth Quarter High-Dollar Overpayments Report

The President signed Executive Order 13520, “Reducing Improper Payments” on November 20, 2009. On March 22, 2010, the Office of Management and Budget (OMB) issued government-wide guidance on the implementation of the Executive Order. The guidance is under Part III, Appendix C of OMB Circular A-123. This guidance requires agencies with programs susceptible to significant improper payments to submit to the agency’s Inspector General and the Council of Inspectors General on Integrity and Efficiency, and make available to the public, a quarterly report on any high-dollar overpayments identified by the agency.

In its 2010 Performance and Accountability Report, VA reported four programs under the Veterans Benefits Administration (VBA) and two programs under the Veterans Health Administration (VHA) that meet the Improper Payments Elimination and Recovery Act of 2010 (IPERA) thresholds for susceptibility to significant improper payments. These programs are Compensation, Pension, Education, Insurance, Non-VA Care Fee, and Non-VA Care Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA).

In accordance with OMB Circular A-123, Appendix C, Part III, VBA and VHA reviewed the six programs susceptible to significant improper payments. The OMB guidelines define a high-dollar improper payment as any payment in excess of 50 percent of the correct amount of the intended payment under the following circumstances:

1. Where the total payment to an individual exceeds \$5,000 as a single payment or in cumulative payments for the quarter; or
2. Where a payment to an entity exceeds \$25,000 as a single payment or in cumulative payments for the quarter.

The OMB guidelines require that agencies submit, on a quarterly basis, a report to:

1. List all high-dollar overpayments identified by the agency during the quarter;
2. Describe whether each high-dollar overpayment was made to an entity or individual, and the city/county and state where that entity or individual was located;
3. List the program responsible for each high-dollar overpayment error;
4. Describe any actions the agency has taken or plans to take to recover high-dollar overpayments; and
5. Describe any actions the agency will take to prevent overpayments from occurring in the future.

The report is divided into five parts (Compensation and Pension Programs are combined in part 1) for each program area, and the high-dollar overpayments are identified from the highest to lowest overpayments within each program area. In addition to OMB’s guidelines, our report includes two additional categories: the cause of overpayment and the status of overpayment. The status of an overpayment will be “collection in progress,” or “collection in full.” Collection in Progress is defined as actions taken by VA to recover from future benefit awards or payments, referral to the Treasury Offset Program, or request to return money that was paid after the death of a beneficiary through reclamation procedures. Veterans also have dispute and waiver request rights during the collection processes.

1. Compensation and Pension Programs

Beginning in the third quarter of FY 2011, VBA modified its analytical procedures to improve the statistical validity of the high dollar overpayment review. The new procedure requires a review of a stratified random sample of the total number of Compensation and Pension overpayments. There were 18,884 overpayments identified in the fourth quarter of FY 2011. A random sample of 385 Compensation and Pension overpayments was reviewed. The review revealed that 52 (14 percent) were Compensation overpayments, 112 (29 percent) were Pension overpayments, and 221 (57 percent) were payments that did not meet the high dollar overpayment criteria because the total payments to each individual were less than \$5,000. Based on these sampling results, we projected that 2,644 of 18,884 overpayments originally identified were high dollar Compensation overpayments, 5,476 were high dollar Pension overpayments, and 10,764 were payments to beneficiaries each with less than \$5,000 total payments. These results are based on estimates at a 95 percent confidence level with a ± 2.5 percent interval. These findings cannot be compared to

previous quarters prior to the third quarter of FY 2011 due to the new analytical procedures in place. Previous reviews focused on a subset of all overpayments where the new procedure includes all overpayments.

1a. Compensation Program

The Compensation and Pension Service identified 52 high-dollar compensation overpayments.

Fourteen overpayments (27 percent) were created due to the death of the beneficiary. Entitlement to benefits ceases effective the first day of the month in which death occurs. These overpayments are caused when a beneficiary dies too late in a month to stop the release of the payment for the month of death, or when VA is not timely notified of the death of a beneficiary. While VA has a death match program with the Social Security Administration (SSA), the match is received once monthly from SSA, and usually after a benefit payment has been released. The number of overpayments following death has been reduced as a result of VA's VETSNET "real time" processing technology.

Twelve overpayments (23 percent) were caused by changes in dependency. VA beneficiaries may receive additional monetary allowance for eligible dependents. In some cases, VA is not notified timely when there is a change in dependency status due to circumstances such as divorces or a school-aged child who is no longer attending school. If we receive first-party information from the beneficiary indicating the change in dependency status, VA will adjust the award to reflect the change. When this type of information is received from a third-party source, VA must provide due process notice to the beneficiary before any adjustment may occur.

Ten overpayments (19 percent) were caused by retroactive adjustments due to incarceration or fugitive felon status. Notification of incarceration is a function of agreements made with states, the Bureau of Prisons, and other law enforcement agencies. Once notified of a beneficiary's incarceration, VA must provide due process notice to the beneficiary before any adjustment may occur. Law enforcement agencies notify VA when a beneficiary has been identified as a fugitive felon. Once notified, VA must provide due process notice to the beneficiary before any adjustment may occur.

Seven overpayments (13 percent) were caused when Veterans returned to Active Duty status. The Department of Defense runs a quarterly match of the active duty and VA disability files to identify persons who are receiving active duty pay and VA disability benefits concurrently. Once notified of active duty status, VA must provide due process notice to the beneficiary before any adjustment may occur.

An additional six potential high-dollar overpayments (12 percent) were identified, but there was insufficient information available electronically to determine the period covered by the overpayment and/or the propriety or cause of the overpayment.

The overpayments listed below attributed to 6 percent of the compensation records identified as high dollar overpayments.

- One overpayment due to an apportionment adjustment
- One overpayment due to hospitalization at VA expense requiring an adjustment
- One overpayment due to military retired pay adjustments

Some VA overpayments are inherent based on the requirements of 38 CFR § 3.103, Procedural Due Process and Appellate Rights, which do not allow VA to take adverse action regarding the payment of benefits without providing the beneficiary 60 days advance notice, unless the beneficiary requests that VA take the adverse action immediately. This "due process" period extends an overpayment period by two additional months. The only exception to providing procedural due process is when VA is notified of a beneficiary's death. Following are some examples.

When a beneficiary dies during the latter days of a month, a recurring benefit payment is often made before VA is notified that the death occurred. While VA has a death match program with the Social Security Administration (SSA), the match is received once a month from SSA, and usually after a benefit payment has been released. The number of overpayments following death has been reduced as a result of VA's Veterans Service Network, a "real time" processing technology.

While the Defense Finance and Accounting Service (DFAS) notifies VA of Veterans who return to active duty, VA must provide a 60-day “due process” period prior to discontinuing benefits, thereby extending the overpayment by two months.

Beneficiaries who are incarcerated or are fugitive felons are subject to a reduction or termination of benefits. Through matching programs, such as the fugitive felon program, the Bureau of Prisons, and other law enforcement agencies, VA receives information regarding incarcerated and fugitive felon beneficiaries after the beneficiary has been incarcerated or deemed a fugitive felon. By law, VA must provide a 60-day “due process” period prior to reducing or terminating benefits. As such, overpayments in these cases most frequently cannot be avoided.

1b. Pension Program

The Compensation and Pension Service identified 112 high-dollar pension overpayments:

- Ninety-six (86 percent) were created due to a change in countable income.
- Six (5 percent) were created due to death of the beneficiary.
- Six (5 percent) were due to incarceration or fugitive felon status.
- Two (2 percent) were created due to changes in dependency.
- Two (2 percent) were unknown overpayments created where there was insufficient information available electronically to determine the period covered by the overpayment and/or the propriety or cause of the overpayment.

Beneficiaries who are in receipt of pension before the end of August and who are not exempt from reporting their income under Public Law 103-271, will receive an Eligibility Verification Review (EVR) form in January of the following year. This form is used to report income for the prior calendar year, and claimants have 60 days to return the form. If the information received within this time frame is insufficient, an additional 60 days will be given to submit the required information.

Increases in countable income may result in high dollar overpayments when there are not enough medical expenses to reduce the countable income. VA receives information on a regular basis from several Federal agencies and compares it to information used to determine the status of VA beneficiaries. The matches identify cases where there are apparent contradictions between information contained in VA records and information furnished by other Federal agencies that affect entitlement. Some matching data, such as that received from the SSA and the Internal Revenue Service (IRS), is usually received after the increase in countable income has already occurred. The EVR process and the data matching agreements with other Federal agencies ensure that necessary adjustments in countable income are appropriately processed when notification is received showing a change in countable income.

Note:

Field offices are reminded of the following:

Guidance provided in FL 08-05, Controls to Minimize Compensation Benefit Overpayments, requires claims processors to establish an end product (EP) 690 in addition to the control EP. The purpose of this EP 690 is to help monitor timeliness in completing action on pending issues with potential overpayments.

FL 08-09, Prioritization and Processing of System-Generated Messages (Write-outs), includes current procedures for monitoring notice of exception reports. The FL provides guidance for prioritization and processing of system-generated messages (write-outs).

Guidance under M21-1MR, Part I, Chapter 2.B.7.a requires field personnel to take immediate action to resolve claims involving due process when their associated controls mature.

Provide quarterly feedback to the field on the findings from the review of overpayments through the *Compensation Service Bulletin*.

Include “matching program” training as a mandatory topic for the FY 2012 National Training Curriculum.

2. Education Program

Beginning in the third quarter of FY 2011, VBA modified its analytical process to improve the statistical validity of the high dollar overpayment review. The new process requires a review of a stratified random sample of the total number of Education overpayments. Conclusions and estimates are at a 95 percent confidence level with a ± 2.5 percent interval.

There were 17,589 Education overpayments identified in the fourth quarter of FY 2011. Of these overpayments, 48.3 percent were to entities and 51.7 percent were to individuals. A random sample of 269 Education overpayments was reviewed. The review revealed that 14 (5.2 percent) overpayments were due to VA error, 18 (6.7 percent) overpayments were due to school errors, and the remaining 237 (88.1 percent) were not overpayments. These remaining payments were proper when disbursed, but later became overpayments due to students' changing enrollment status. Based on these sampling results, we projected that 915 of the 17,589 overpayments originally identified were due to VA error, 1,178 overpayments were due to school error, and 15,496 were proper payments when disbursed and became overpayments later based on students' changing enrollment status. These findings cannot be compared to findings prior to the third quarter of FY 2011 due to the new analytical process in place. Previous reviews focused on a subset of all overpayments whereas the new process includes all overpayments.

Total Education payments made this quarter: \$2,503,864,779.50

Random sample total of high-dollar overpayments identified in this quarter: \$1,042,247.30

Percent of random sample overpayments: 0.0416

Amount of Overpayment	Entity or Individual	City/County	State	Cause of Overpayment	Actions/Plans to Recover Overpayment	Status of Overpayment	Overall Action Plans

Note:

To reduce the number of payments later adjusted due to students' changing enrollment status, VA provides cautionary information in print publications and electronic media, and includes this information in letters to students each time they are awarded benefits.

VA error was mostly the result of issuing duplicate payments, data input errors, and lack of coordination with the Department of Defense to validate Veteran information. Common errors were the result of human error. To decrease the potential for human error, VA has taken a two-step approach: (1) focus on training our employees and (2) field improvements in electronic processing systems. Each Regional Processing Office and the VA Central Office have established required training for employees. Supervisory officials also monitor individual employee performance and provide additional training as necessary. Fielding improvements in electronic processing systems has been a challenge for VA due to recent and possible future statutory changes in the Post-9/11 GI Bill. The recent changes have required VA to redirect its information technology resources away from *enhancing* current systems to *developing changes* to current systems to *implement the recent changes*. Barring future changes in statutory requirements, VA expects to implement additional changes in FY2012 which are expected to decrease human errors.

The main cause of school error was incorrect reporting of tuition and fees. In June 2010, VA published a handbook for School Certifying Officials, establishing common requirements and detailed instructions for preparing and submitting enrollment and attendance information to VA. VA believes that the main contributor to the 3 percent reduction in school errors from the 3rd to 4th quarter was the recent statutory change authorizing State Approving Agencies to conduct school compliance surveys. This will increase VA presence on campuses, enabling additional assessment of school official compliance, and increase VA opportunities to provide focused training for school officials.

3. Insurance Program

The Insurance Program's Internal Control Staff (ICS) identified one high-dollar overpayment.

The ICS augments the program's traditional management controls, such as internal system edits, supervision, performance reviews, and quality control reviews. The staff monitor, review, and approve manual insurance disbursements and certain other controlled transactions. The ICS verifies the correctness and propriety of all critical insurance actions.

The high dollar overpayment was due to an error in sending the award check to the beneficiary's daughter, and the daughter cashed the award check. The beneficiary (wife of Veteran) who was entitled to the award was eventually paid her rightful share. Two checks were issued. The award check cashed by the daughter needs to be recouped.

Total Insurance payments made this quarter: \$343,485,945.00

Total high-dollar overpayments identified in this quarter: \$8,634.57

Percent of overpayments: 0.003

Amount of Overpayment	Entity or Individual	City/County	State	Cause of Overpayment	Actions/Plans to Recover Overpayment	Status of Overpayment	Overall Action Plans
\$8,634.57	Individual	Abbeville	AL	Daughter endorsed & cashed mother's award check	See Note Below Table	Collection In Progress	N/A

Note:

An accounts receivable is established for the overpayments and is transferred to VBA's Finance division for collection, either through direct contact with the recipient of the funds or through the offset program with the Department of the Treasury. Finance is also empowered to refer large debts to our District Counsel for legal action and recovery. During FY 2010, Finance recovered approximately 85 percent of the overpayments.

4. Non-VA Care Fee Program

VHA identified 35 Non-VA Care Fee high-dollar overpayments totaling \$1,567,711 through joint efforts of the VHA Chief Business Office (CBO), the Veterans Integrated Service Networks (VISNs), and the VA Management Quality Assurance Service (MQAS). High-dollar overpayments consisted of both single and cumulative payments. Of the overpayments, eight totaling \$495,544 were caused solely by duplicate payments. Nine overpayments totaling \$312,599 were caused by incorrect application of payment methodology. Four overpayments totaling \$230,596 were caused by VHA paying an incorrect vendor. Four overpayments totaling \$114,536 were caused by duplicate payments and VHA paying an incorrect vendor. The remaining 10 overpayments totaling \$414,436 included a combination of the above causes in addition to vendor billing errors; payments not properly authorized; payments made to an ineligible recipient; other health insurance not verified; and data entry errors.

The CBO Purchased Care Program Office worked closely with each VISN to identify high-dollar overpayments during the fourth quarter. VISN overpayments were consolidated nationally to ensure the appropriate capture of all high-dollar overpayments. Facilities used numerous techniques to identify overpayments. Those techniques included, but are not limited to, reviewing internal reports and bills of collections and conducting self audits and reviews. CBO internal reports included (1) monthly outlier reports, (2) monthly inpatient outlier reports, and (3) post payment duplicate reports. MQAS identified overpayments in their reviews of purchased care at VHA facilities. The Financial Services Center and the VA Office of Inspector General, who identified high-dollar overpayments in prior quarters, reported no high-dollar overpayments this quarter.

Total Fee payments made this quarter: \$1,166,865,313

Total high-dollar overpayments identified in this quarter¹: \$1,567,711

Percentage of overpayments²: 0.13

Note:

VHA will provide additional training and emphasize the importance of internal controls to staff members processing Fee claims. Training will include procedures on properly paying dialysis claims, determining Veteran eligibility status, and using Snap Web to identify duplicate payments.

5. Non-VA Care CHAMPVA Program

VHA identified 13 Non-VA Care CHAMPVA high-dollar overpayments totaling \$407,444 through expanded efforts of the Health Administration Center (HAC). High-dollar overpayments consisted of both single and cumulative payments. Seven overpayments totaling \$150,791 were the result of payments made to ineligible beneficiaries. One overpayment totaling \$96,487 was caused by using an incorrect vendor selection. One overpayment totaling \$70,210 was due to multiple causes including other health insurance not properly input; payment sent to the incorrect provider; and payment made to an ineligible beneficiary. The remaining four overpayments totaling \$89,957 included a combination of the above causes in addition to a duplicate payment.

To identify high-dollar overpayments, the HAC reviewed (1) a quarterly possible duplicate payment audit, (2) a monthly proper payment audit, (3) an ongoing weekly high-dollar audit for all claims over \$100,000, and (4) the fourth quarter bills of collection audit. The HAC conducts a 100 percent multi-division in-depth prepayment review of all claims over \$100,000, and the Claims Processing Division conducts a prepayment review of all claims over \$10,000 to reduce the likelihood of high-dollar improper payments being made.

Total CHAMPVA payments made this quarter: \$236,900,000
 Total high-dollar overpayments identified in this quarter³: \$407,444
 Percentage of overpayments⁴: 0.17
