[Project WILD](http://www.projectwild.org/)

Project Wild is a wildlife focused conservation education program for K-12 educators and their students. It is based on the premise that young people and educators have a vital interest in learning about our natural world. Emphasizing wildlife because of its intrinsic value, Project WILD addresses the need for human beings to develop as responsible citizens of our planet. (citation: <http://www.projectwild.org/>)

[Acorn Naturalists Online Store](http://www.acornnaturalists.com/store/index.aspx)

Science, environmental, and outdoor education have been the focus of Acorn Naturalists for over 21 years. They offer resources that enhance teaching and promote environmental literacy. Check out their educator's guides, Windows on the Wild, for a diverse set of educational books including background information for educators and student activities. [Audubon Adventures](#)

Audubon's award-winning environmental education program about the natural world and how to protect it can be implemented in any classroom or after-school program. All it takes is an interest in exploring, learning about, and enjoying the natural world around you.

Audubon Adventures gives teachers many ways to help students meet required educational performance and content standards in science and language arts. Audubon Adventures fosters in children a stewardship ethic to last a lifetime.

Audubon ADVENTURES®

WILD ALASKA

A polar bear searching for seals on a lonely ice floe. Wildflowers as far as the eye can see. Millions of nesting ducks and geese. Tens of thousands of caribou moving across the rolling, treeless tundra. Brown bears fishing for salmon in coastal streams. Thousands of glaciers. A rainforest dripping with fog and rain year-round.

These are all scenes of Alaska! Only a state this huge could have so many different habitats. The animals that live in Alaska are as diverse as the landscape. The shaggy muskox has roamed the tundra since prehistoric times. In the south, tufted puffins nest in colonies on the rocky coast. Along the coastline and beyond, humpback whales feast on tiny shrimp-like creatures called krill, while orcas hunt for seals and other prey. Alaska's inland forests, wetlands, and mountains are home to wolves, eagles, moose, and rock-climbing Dall sheep.
