

How BEA Aligns and Augments Source Data From the U.S. Treasury Department for Inclusion in the International Transactions Accounts

Like most of the U.S. economic accounts produced by the Bureau of Economic Analysis (BEA), the estimates of financial-account flows in the international transactions accounts (ITAs) are based on source data collected by other Government agencies--in this case, by the Treasury International Capital (TIC) Reporting System of the U.S. Department of the Treasury. The presentation of the adjustments undertaken by the BEA to align and to augment these data for inclusion in the financial account can help data users reconcile BEA's financial flow estimates with the TIC data that are available to the public on the Treasury Department's Web site and in the *Treasury Bulletin*.

The relationship between the estimates in the ITAs that are prepared by BEA and the data from the TIC reporting system are shown in tables 1-3. Table 1 presents the estimates of transactions in foreign long-term securities; in U.S. long-term securities, excluding U.S. Treasury securities; and in U.S. Treasury securities. Table 2 presents the estimates of claims on, and liabilities to, foreigners reported by U.S. non-banking concerns, and table 3 presents the estimates of claims on, and liabilities to, foreigners reported by U.S. banks.

In tables 1-3, the numerous adjustments that BEA makes to the TIC source data in order to align the data with balance-of-payments concepts and to close gaps in coverage are identified. In addition, examples of both types of adjustments are presented below.

Aligning with balance-of-payments concepts. The TIC data for gross U.S. purchases of foreign stocks and bonds (table 1, line A1) include the commissions that are paid by the U.S. purchasers to foreign bro-

kers. In the ITAs, the payments of commissions to foreigners are treated as payments for financial services, not as purchases of securities, and these payments are included in the current account, not in the financial account. Therefore, BEA adjusts the TIC data for gross U.S. purchases by subtracting an estimate of the payments of brokerage commissions (line A3) from the data for gross purchases.

The TIC data for gross U.S. sales of foreign stocks and bonds (line A6) represent the proceeds from sales less the commissions paid by U.S. sellers to foreign brokers. In the ITAs, the payments of commissions to foreign brokers are treated as payments for financial services, not as transactions in securities. Therefore, BEA adds an estimate of the payments of brokerage commissions (line A7) to the TIC sales data.

Closing gaps in coverage. The TIC data for gross U.S. purchases of foreign stocks and bonds do not fully cover some transactions, such as acquisitions of U.S. companies by foreigners who finance their purchases through exchanges of stock. These stock swap transactions may bypass the U.S. brokers and dealers who are the primary respondents to the TIC survey on securities transactions. When stock is exchanged, the U.S. persons who previously held securities in the acquired U.S. company receive shares in the acquiring foreign corporation, and the receipt of these shares should be recorded in the ITAs as the acquisition, or purchase, of foreign long-term securities.

In order to account for this gap in coverage in the TIC data, BEA adds an estimate of security swap transactions and other coverage adjustments (line A2) to the TIC data.

^pPreliminary.^rRevised.

1. Includes only unrealized gains or losses on foreign-currency-denominated assets and liabilities.

2. Financial intermediaries' accounts represent transactions between firms in a direct investment relationship (that is, between U.S. parents and their foreign affiliates or between U.S. affiliates and their foreign parent groups), where both the U.S. and the foreign firm are classified in a finance industry, but the firms are neither banks nor securities brokers.

3. Includes supplemental transactions from the Bank of England, the Bank for International Settlements (BIS) and the Federal Reserve Board.

4. Includes supplemental insurance transactions and adjustments to avoid double counting U.S. claims on foreigners.

5. Includes supplemental futures trading transactions and adjustments to avoid double counting U.S. liabilities to foreigners.
