

DEPARTMENT OF THE INTERIOR

LANDS AND MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on 261 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of onshore Federal mineral estate underlying BLM and other surface ownerships. In addition, BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) survey. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of the BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

Recreation management.—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees.

Energy and minerals management.—Provides for management of onshore oil and gas, coal, geothermal resources and other leasable minerals; mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The Budget proposes to increase user fees to recover certain bureau costs for these activities in 2006.

Realty and ownership management.—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands.

Mining law administration.—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are partially offset by claim maintenance and other fees.

Challenge Cost Share (CCS).—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve conditions of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish,

wildlife, threatened and endangered species, recreation, and cultural resources.

Western Oregon resources management.—Provides for the management of 2.4 million acres of lands that are primarily forested ecosystems in western Oregon. These lands support a number of resource management activities including timber management, grazing management, and recreation management. In support of these management activities, BLM is involved in improving critical watersheds, restoring wildlife and fish habitat, providing safe recreation opportunities, and preserving cultural resources.

Western Oregon information and resource data systems.—Provides for the acquisition, operation and maintenance of the automated data support systems required for the management of the O&C programs.

Western Oregon transportation and facilities maintenance.—Provides for the maintenance of office buildings, warehouse and storage structures, shops, greenhouses, recreation sites and the transportation system that is necessary to assure public safety and effective management of the lands in western Oregon.

Western Oregon construction and acquisition.—Provides for the acquisition of road easements and road use agreements for timber site access and for other resource management activities including recreation use. This activity also provides for transportation planning, survey and design of access and other resource management roads and construction projects.

Jobs in the Woods.—Provides for the “Jobs in the Woods” program, which began in the early 1990s as a temporary program to assist displaced timber workers in the Pacific Northwest by offering resource-based job opportunities to improve water quality and restore Oregon’s coastal salmon populations. The Budget proposes to eliminate this program in 2006 because it is no longer necessary. However, the programmatic effects of this change will be partially offset by funding increases for other ecosystem restoration activities, including increased thinning of late successional forests to improve their old-growth characteristics.

Preparedness.—This activity funds the nonemergency and predictable aspects of the Department’s wildland fire program. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, integration of fire into land-use planning, fire facility construction and maintenance, and fire research and fire science program activities.

Fire suppression operations.—This activity funds the emergency and unpredictable aspects of the Department’s wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding requests are guided by the historical 10-year average of suppression expenditures, adjusted for inflation.

Hazardous fuels reduction.—The hazardous fuels reduction activity includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, and chemical treatments or a combination of methods.

Burned area rehabilitation.—This activity begins the restoration process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions.

Rural fire assistance.—This pilot program, began in 2001, provides financial support through cost-shared grants to local and rural fire protection districts that protect small communities. The Budget proposes that this program be eliminated in 2006 because it is duplicative of existing fire assistance grant programs within DHS and the Forest Service. Instead, the Department will focus more of its fire preparedness re-

sources on training and certification of local firefighters so that they are qualified to assist on federal fires.

The Budget proposes to eliminate BLM's Range Improvements Fund in 2006. BLM expects to publish new regulations in 2005 that will allow grazing permittees to share title to such range improvements. This should increase the level of private investment in improvements and will decrease the need for the federal government to fund these projects. The

Budget also proposes increased funding for BLM's Challenge Cost Share grants program and will allow range improvement proposals that benefit wildlife to compete for project funding.

Permanent operating funds accounts include:

Operations and maintenance of quarters.—Funds in this account are used to maintain and repair BLM employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarters rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

Forest ecosystems health and recovery.—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. This account was established to allow the Bureau of Land Management to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments.

Timber sale pipeline restoration fund.—This fund provides for the deposit and use of fees collected by the BLM for sales of non-salvage timber pursuant to the timber salvage provisions of Public Law 104-19 and Public Law 105-83. Of the total deposited into this account, 75 percent is to be used for preparation of timber sales to fill the timber pipeline on lands administered by the BLM, and 25 percent is to be expended on the backlog of recreation projects on BLM lands.

Expenses, road maintenance deposits.—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for nec-

essary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

Federal Lands Recreation Enhancement Act, BLM.—The Federal Lands Recreation Enhancement Act was enacted on December 8, 2004 as part of the Consolidated Appropriations Act for FY 2005. The FLREA replaces the Recreation Fee Demonstration Program, and most current BLM sites will transition to the new program. All receipts collected under this authority will be deposited to this account. BLM returns 100 percent of these receipts back to the site where the fees were generated. The FLREA authorizes this program through 2014.

Acquisitions in Deschutes, Oregon from land sale receipts.—Pursuant to Public Law 105-221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the proceeds from sales in Deschutes County to purchase environmentally sensitive lands.

Operations and acquisitions in Nevada from land sale receipts.—Pursuant to Public Law 105-263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive land in the State, implement certain conservation initiatives on federal land in Clark County, Nevada, make capital improvements to areas administered by the NPS, FWS, and BLM in Clark County, Nevada, and develop parks, trails, and natural areas in Clark County. The Budget proposes that 70 percent of the receipts from these land sales be returned to the Treasury beginning in 2006 and that the percent of receipts deposited in this account be reduced to 15 percent. Included in this account are earnings on investments.

Lincoln County land sales.—Public Law 106-298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the state of Nevada, 10 percent to the County, and 85 percent to an interest bearing account that is available for expenditure without further appropriation.

Federal land disposal.—The Federal Land Transaction Facilitation Act, P.L. 106-248 114 Stat. 613, provides that the Administration will conduct sales of lands that have been classified as suitable for disposal under current resource management plans. This law provides that receipts from such sales may be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior.

Excess Stewardship Receipt Fund.—Funds in this account are derived from stewardship contracts in which the revenues derived from forest products exceed the costs of services. As authorized by P.L. 108-7, these residual receipts can be used for other approved stewardship contracts.

The Budget proposes to amend the Southern Nevada Public Land Management Act (P.L. 105-263) to return 70 percent of the receipts from land sales under the Act to the Treasury, where such receipts have historically been deposited. The Act, as amended by P.L. 107-282, authorizes the disposal through sale of approximately 49,000 acres of federal land in Clark County, Nevada, of which 5 percent of the proceeds are provided to the State of Nevada for use in the State's general education program and 10 percent are provided to the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County. The remaining 85 percent of funds are deposited in a special account to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by NPS, FWS and BLM in Clark County; develop a multi-species habitat plan for Clark County; develop parks, trails and natural areas and implement other conservation initiatives in the county; and reimburse BLM for costs incurred in arranging sales and exchanges under the Act.

The receipts generated by these land sales have been many times higher than anyone anticipated when the Act was passed. When the law was created, there was general agreement that a substantial portion of the revenues generated would be spent to acquire and conserve other lands around Nevada. However, as land sale receipts under the Act have

increased in the last few years, the available funding has outpaced land acquisition needs. These funds are increasingly being dedicated to purely local projects. And many more projects than originally anticipated are being formulated without the accountability of further consideration by the Congress.

Beginning in 2006, 70 percent of all revenues from these lands sales would be returned to the Treasury, and the percent of receipts deposited in the special account would be reduced to 15 percent. The proposal would not change the amount of revenue currently provided to state and local entities, only the portion dedicated to federal spending in Nevada.

When SNPLMA was originally passed, proceeds from land sales under the bill were estimated at roughly \$70 million per year. This proposal serves the general taxpaying public while still providing about four times the level of spending in Nevada as originally anticipated in 1998.

Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.—Under provisions of the Secure Rural Schools and Community Self-Determination Act of 2000 (Public Law 106–393), annual payments to the 18 Oregon & California (O&C) counties will be derived from any revenues, fees, penalties, or miscellaneous receipts received by the Federal Government from activities by the BLM on O&C and Coos Bay Wagon Road lands. These receipts are exclusive of deposits to any relevant trust fund, i.e., Timber Sale Pipeline Restoration and Forest Ecosystem Health and Recovery funds, or permanent operating funds.

Payments to States (proceeds of sales).—The States are paid five percent of the net proceeds from sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc., public lands outside grazing districts.—The States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc., public lands within districts.—The States are paid 12½ percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.—The States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau of Land Management, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—(A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105–263, as amended by P.L. 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: (a) five percent for use in the general education program of the State of Nevada (b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada and (c) the remaining 85 percent to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by NPS, FWS and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: (a) five percent to the State of Nevada for general education purposes; (b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and (c) the remaining 85 percent to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

Funds are made available to the Bureau of Land Management for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

Native Alaskan groups' properties.—Funds were appropriated by Public Law 102–172 for the Calista Corporation, and by Public Law 102–415 for the Haida Corporation and the Gold Creek Susitna Association, Incorporated, for the acquisition by those groups of Federal real properties in fulfillment of claims originally settled in 43 U.S.C. 1617, the Alaska Native Claims Settlement Act.

The Helium Act Amendments of 1960, Public Law 86–777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104–273, provides for the eventual privatization of the program and its functions. In 2005, the Helium program will consist of:

- (a) continued storage and transmission of crude helium;
- (b) complete disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- (c) oversight of the production of helium on Federal lands; and
- (d) administration of in-kind and open market crude helium gas sale program.

The estimates assume that the helium program will continue full implementation of the Helium Privatization Act.

The Minerals Management Service (MMS) supervises exploration for, and the development and production of, gas, oil, and other minerals on the Outer Continental Shelf (OCS) lands; and collects royalties, rentals, and bonuses due the Federal Government and Indian lessors from minerals produced on Federal, Indian, and OCS lands. Through its programs, MMS works to ensure that the public receives maximum benefit from America's OCS resources and mineral revenues.

Outer continental shelf lands.—The Offshore Minerals Management program coordinates MMS's responsibilities for OCS activities, which range from administering OCS leases and monitoring the safety of offshore facilities to protecting the coastal and marine environments. As the Nation's designated steward of the mineral resources on the OCS, MMS has worked for over 20 years to build an offshore program that will provide for safe and environmentally sound OCS mineral resource development.

Minerals revenue management.—The Minerals Revenue Management program, collects, accounts for, and disburses revenues associated with mineral production from leased Federal and Indian lands. This revenue is one of the largest sources of non-tax revenue to the Federal Government. MMS disburses mineral revenues to states, the Office of the Special Trustee for American Indians, other Federal agencies, and U.S. Treasury accounts. In addition, MMS has delivered oil to the Department of Energy to fill the Strategic Petroleum Reserve.

General administration.—General administrative expenses provide for management, executive direction and coordination, administrative support, Federal building space, and general support services.

For Mineral Leasing and Associated Payments (MLAP), the Mineral Leasing Act (MLA), 30 U.S.C. 181 et seq., provides that all states be paid 50 percent of the revenues resulting from the leasing of mineral resources on Federal public domain lands within their borders. In addition, under the MLA, 40 percent of revenues are paid to the Reclamation Fund,

which funds western water projects and the remaining 10 percent is paid into the General Funds of the United States Treasury. By law, Alaska receives no funds from the Reclamation Fund, but receives a 90 percent share of mineral leasing receipts. Mineral leasing revenues are derived from royalties, rents, bonuses, and other revenues, including minimum royalties, late payment interest, settlement payments, gas storage fees, estimated royalty payments, and recoupments.

As required by the law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account were deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned is permanently appropriated to the Department of Commerce and the unappropriated balance of interest will remain in the fund. No budget authority is requested.

As of May 23, 1908 (16 U.S.C. 499), twenty-five percent of the revenues collected from onshore mineral leasing and production on national-forest lands have been paid to the state in which the national forest resides. A state's payment is based on national forest acreage and where a national forest is situated in several states, an individual state payment is proportionate to its area within that particular national forest.

The Government Management Reform Act (P.L. 103-356) authorized creation of six pilot franchise funds and in May 1996, the Department of the Interior was designated as one of those agencies. Section 113 of the General Provisions of the Department of the Interior and Related Agencies Appropriation Act of 1997, established in the Treasury a franchise fund pilot. The Interior Franchise Fund (IFF) provides acquisition management and administrative services to the Department of the Interior and other Federal agencies on a fully competitive and fee basis. Fees from Federal agencies fully cover the cost of operating the IFF. The budget extends the authority for the franchise fund pilot program through October 1, 2006.

Environmental protection.—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides regulatory grants to States to operate enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). It also provides for the operation of Federal and Indian land programs and the oversight of State programs, and supports State regulatory program development and maintenance. In addition, this activity funds environmental reclamation efforts through the collection of civil penalties for post-SMCRA reclamation and funds from bond forfeitures, and provides funding for underground and coal outcrop fires.

Technology development and transfer.—This activity provides funding to enhance the technical skills that States and Indian tribes need to operate their regulatory programs. It provides technical outreach to States and Indian tribes to solve problems related to the environmental effects of coal mining. The Applicant Violator System is funded from this activity.

Financial management.—This activity provides the resources for the managing, accounting, and processing of collections and for the pursuit of delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

To protect lives and improve public safety, the Administration is proposing legislation to extend the coal fee and to modify the Surface Mining Control and Reclamation Act to direct dollars toward the most serious problems. The new legislation, if enacted, will authorize \$58,000,000 a year for a period of ten years for the payment of unappropriated share balances in the Fund allocated to states and Indian tribes that were not appropriated as of June 30, 2005 to states and Indian tribes that have been certified under section 411(a) of the act as having completed the reclamation of their coal mining related abandoned mine land sites. Under the proposal, certified states and tribes will not receive any allocations from the extended coal fee. Furthermore, the Administration will work to address the financial viability of the Combined Benefit Fund for retired coal mine workers.

ADMINISTRATIVE PROVISIONS

With funds available for the Technical Innovation and Professional Services program in this Act, the Secretary may transfer title for computer hardware, software and other technical equipment to State and Tribal regulatory and reclamation programs. The Water and related resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. In 2006, Reclamation will continue to implement Water 2025, which is aimed at preventing conflict and crises over water in the West by focusing Reclamation's resources on areas in the West where conflict exists or is most likely to occur.

The Budget includes appropriations language to reclassify certain receipts collected by the Western Area Power Administration (WAPA). Each year, WAPA would deposit in this account an amount sufficient to pay all operation and maintenance costs associated with the power functions of Reclamation facilities that generate the power sold by WAPA. A somewhat broader direct funding arrangement is already in place for the Bonneville Power Administration, as authorized in section 2406 of the National Energy Policy Act of 1992 (P.L. 102-486).

Revenues from the sale of Boulder Canyon power are placed in this fund and are available without further appropriation to pay the operation and maintenance costs of the project including those of the Western Area Power Administration for power marketing, transmission, operation, maintenance, and rehabilitation; to pay interest on amounts advanced from the Treasury; to pay annually not more than \$300,000 each to Arizona and Nevada; and to repay advances from the Treasury for construction and other purposes. The rates charged for Boulder Canyon power also include certain amounts for transfer to the Lower Colorado River Basin Development Fund.

The amounts in this fund will be used to design, construct, operate and maintain water quality projects to remediate contamination of groundwater in the San Gabriel and Central Basins of Southern California, contingent on receipt of local cost share. Administration of the fund was transferred from the Secretary of the Army to the Secretary of the Interior by Public Law 107-66.

The U.S. Geological Survey provides research and scientific information to support the mission of the Department of the Interior and the science needs of its land and resource management bureaus. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, mineral and biological resources of the Nation.

The 2006 budget continues science programs that generate relevant, objective information for land managers and for communities throughout the Nation. Major areas of emphasis in the budget include preparing for a new and improved earth observation system, set to launch by 2010, and improving the understanding and management of the Nation’s ecosystems.

In an effort to strengthen geographic research and consolidate geospatial data programs, the USGS created a National Geospatial Programs Office in FY 2004, which included the transfer of National Map functions out of the Geography discipline and into the new office. The move of the National Map will better enhance USGS leadership in both geospatial programs and geographic research. The budget restructure that will accompany this move is still under development and will be reflected in the 2007 budget.

Mapping, remote sensing, and geographic investigations program.—The USGS Geography Program is focused on improving geospatial data access, integration, and applications through implementation of The National Map and the National Spatial Data Infrastructure (NSDI). Partnerships with other Federal, State and local agencies, the private sector, and academia are the keystone for accomplishing this mission. The Geography Program also provides scientific information to describe and interpret America’s landscape by mapping the terrain, monitoring changes over time, and analyzing how and why these changes have occurred. The knowledge gained through these activities is used to model the processes of change and to forecast future changes.

Geologic hazards, resources, and processes.—The national program of onshore and offshore geologic research and investigations produces: (1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; (2) geologic information for use in the management of public lands and in national policy determinations; (3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; (4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; (5) hazards, energy and mineral resource, and environmental assessments; and (6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

Water resources investigations.—The USGS water programs produce data, analyses, assessments and methodologies to support Federal, State, Tribal, and local government decisions on water planning, water management, water quality, flood forecasting and warning, and enhancement of the quality of the environment. The U.S. Geological Survey’s water re-

sources programs work cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs.

Biological research.—The national program of biological research: (1) conducts biological resources inventory and monitoring; (2) provides scientific information for the management of biological resources; and (3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by the Department of the Interior's land management bureaus and operates the Cooperative Research Unit program which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

Enterprise information.—The USGS enterprise information program supports bureau-level activities and investments in the areas of information technology, information security, information management, information policy and standards, and information science. As the primary vehicle for planning and executing the broad information goals and objectives of the USGS, the program provides bureau-level information policies, infrastructure, and services needed to support the bureau's scientific mission; creates an integrated information environment within the USGS; ensures that the bureau meets legislative and administrative information management mandates; and provides the basic foundation for easy discovery, access, acquisition, and use of USGS data and information.

Science support.—Science support provides for Bureauwide management; executive direction and coordination; administrative, human resources, and business information systems management; and financial and personnel systems support provided by DOI's National Business Center.

Facilities.—This activity finances: (1) USGS rental payments; (2) operation and maintenance for properties; and (3) deferred maintenance and capital improvement.

Reimbursable program.—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

Ecological services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, states, and other federal agencies. These partnership activities help make the listing of species under the Endangered Species Act unnecessary and protect and recover those species that are listed. Financial assistance is provided to private landowners to restore or improve habitat for endangered species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 545 refuges, waterfowl production areas in 203 counties that are managed by 37 wetland management districts, and 50 coordination areas, totaling nearly 96 million acres. A total of \$137.7 million is proposed for refuge maintenance as part of the Service's continued effort to address deferred maintenance.

Migratory Bird Management and Law Enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures implementing the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protections laws, and works in partnership with international, state, and tribal counterparts to conserve wildlife resources.

Fisheries.—The Fisheries Program consists of 69 national hatcheries, 9 Fish Health Centers, 7 Fish Technology Centers, 64 Fishery Resource Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American Public.

General operations.—Funding for Service general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the Service's international activities, the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

Consistent with the Administration's focus on working with partners to address imperiled species and other priority wildlife conservation needs, the State and Tribal Wildlife grant program provides funds to states, the District of Columbia, tribes, and territories to develop and implement wildlife management and habitat restoration programs. Allocation of funds to the states is determined by a formula of one-third based on land area and two-thirds based on population and require a cost-share. Grants to the tribes are awarded competitively.

Federal Land Acquisition funds are used to protect areas that have native fish and/or wildlife values and provide natural resource benefits over a broad geographical area, and for acquisition management activities. In 2006, \$500,000 will be used to acquire water rights for transfer and use at the Lower Klamath and Tule Lake National Wildlife Refuges. Any land or other non-water interests acquired incidental to these water rights will be sold with the proceeds of the sales being used to acquire additional water rights until a total of \$500,000 worth of water-rights have been acquired for the refuges.

Consistent with the Administration's focus on working with partners to address federally listed, proposed, candidate or other imperiled species, the Landowner Incentive Program provides cost-shared, competitive grants to states, the District of Columbia, territories, and tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provide technical and financial assistance to private landowners all across the country to help them protect and manage imperiled species and their habitat, while con-

tinuing to engage in traditional land use or working conservation practices.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. Grants are also awarded to States and U.S. territories for land acquisition in support of Habitat Conservation Plans and species recovery efforts in partnership with local governments and other interested parties to protect species while allowing development to continue. The Fund is partially financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to five percent of receipts deposited to the Federal aid in wildlife and sport fish restoration accounts and amounts equal to Lacey Act receipts over \$500,000. The actual amount available for grants is subject to annual appropriations.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service fee lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for FY 2005. The Recreation Fee Program, created by the FLREA, replaces the Recreation Fee Demonstration Program. Most of the current 113 Fish and Wildlife Service sites currently in the Recreation Fee Demonstration Program will transition into the new program and will continue to collect entrance fees and other receipts. All receipts will be deposited into a recreation fee account of which at least 80 percent will return to the collecting site.

The new recreation fee program will demonstrate the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees will be used primarily at the site to improve visitor access, enhance public safety and security, address backlog maintenance needs, enhance resource protection, and cover the costs of collection. The FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, popularly known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multi-State Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The Federal Aid in Sport Fish Restoration Act, commonly referred to as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux amendment), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992 the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997.

The Coastal Wetlands Planning, Protection and Restoration Act requires an amount equal to 18 percent of the total deposits into the Sport Fish Restoration Account, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration Account of the Aquatic Resources Trust Fund for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Transportation for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and state outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to states for developing and maintaining facilities for certain recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, and acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multi-State Conservation Grant Program and provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park System contains 388 areas and 84.4 million acres of land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. Park visits total over 273 million annually. This annual appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. Funds within this appropriation are used to support the cooperative effort for restoration of the Everglades and are available until expended. Within this appropriation, repair and rehabilitation funds are available for two years, to provide the flexibility needed to carry out this project program, in which typical projects include, but are not limited to, facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings. The repair and rehabilitation program includes funding for development and implementation of the automated facility management software system and to conduct comprehensive facility condition assessments.

Federal Lands Recreation Enhancement Act.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act. The FLREA was passed on December 8, 2004 as part of the Omnibus Appropriations bill for FY 2005, and authorizes this program through 2014. By law, up to 15 percent of proceeds may be used for administration, overhead, and indirect costs related to the program, and net proceeds are to be used for high priority visitor service or resource management projects throughout the National Park System.

America the Beautiful: The National Parks and Federal Recreational Lands Pass.—Proceeds from the sale of national park and Federal recreational lands passes are to be distributed between the Federal land management agencies as determined by the Secretaries of these agencies in accordance with Public Law 108-447.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transpor-

tation systems in accordance with section 501 of Public Law 105-391.

Educational expenses, children of employees, Yellowstone National Park.—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund finances 60 percent of programmatic matching grants-in-aid to the States and certified local governments, as well as grants to Indian tribes, and continues funds for matching grants for Save America's Treasures to provide assistance to preserve America's most threatened historical and cultural heritage for future generations. These treasures include the significant documents, objects, manuscripts, photographs, works of art, journals, still and moving images, sound recording, historic structures and sites that document and illuminate the history and culture of the United States. This appropriation also includes Preserve America grants to help States, Tribes, and local communities demonstrate sustainable uses of their historic and cultural sites and the economic and educational opportunities related to heritage tourism. The program helps local communities develop resource management strategies and sound business practices for the continued preservation of heritage assets, including historic resources and associated landscapes and natural features.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System generally and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account at the direction of the park superintendent for facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

National Maritime Heritage Grants program.—Of the revenues received from the sale of obsolete vessels in the National Defense Reserve Fleet, 25 percent are used for matching grants to State and local governments and private nonprofit organizations under the National Maritime Heritage Grants Program and for related administrative expenses in accordance with 16 U.S.C. 5401. Program authorization expires at the end of 2006.

Delaware Water Gap, Route 209 operations.—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98-63 (97 Stat. 329), section 117 of Public Law 98-151 (97 Stat. 977) as amended by Public Law 99-88 (99 Stat. 343), and section 702 of Division I of Public Law 104-333 (110 Stat. 4185). The expired authorization was restored in fiscal year 1997 by Public Law 104-333.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104-333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is now authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Amounts collected should provide a fair return

to the Government and may be used in accordance with the formula and purposes established under the Federal Lands Recreation Enhancement Act.

Contributions to U.S. Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before fiscal year 2002, such payments were funded from appropriations made annually to the National Park Service.

Parkway construction project funds have been derived from the Highway Trust Fund through appropriations to liquidate

contract authority, which has been provided under section 104(a)(8) of the Federal Aid Highway Act of 1978, title I of Public Law 95-599, as amended, and appropriation language, which has made the contract authority and the appropriations available until expended.

Reconstruction and relocation of Route 25E through the Cumberland Gap National Historical Park, including construction of a tunnel and the approaches thereto, are authorized without fund limitation by Public Law 93-87, section 160.

Improvements to the George Washington Memorial Parkway and the Baltimore Washington Parkway are authorized and funded by the Department of the Interior and Related Agencies Appropriations Acts, 1987, as included in Public Law 99-591, and 1991, Public Law 101-512. No more significant obligations are expected in this account for these two parkway projects.

As per P.L. 108-7, remaining unobligated balances, once reconciled, will be applied to repairs of the Going-to-the-Sun Road in Glacier National Park.

Place, and Pennsylvania Avenue between 15th and 17th Streets, Northwest.

None of the funds in this Act may be spent by the National Park Service for activities taken in direct response to the United Nations Biodiversity Convention.

The National Park Service may distribute to operating units based on the safety record of each unit the costs of programs designed to improve workplace and employee safety, and to encourage employees receiving workers' compensation benefits pursuant to chapter 81 of title 5, United States Code, to return to appropriate positions for which they are medically able.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to Indian Tribes, Alaskan Native groups, and individual Native Americans that fulfill Federal trust responsibility and implement Federal Indian policy. The Administration is proposing a revised budget structure for this account and will forward this to Congress for consideration. The current budget structure includes:

Tribal priority allocations.—This activity includes the majority of funds used to support ongoing programs at the local Tribal level. Funding priorities for Tribal base programs included in Tribal Priority Allocations are determined by Tribes. Although budget estimates include specific amounts for individual programs, funds may be shifted among programs within the total available for a Tribe or a Bureau of Indian Affairs (BIA) agency or regional office at the time of budget execution.

Other recurring programs.—This activity includes ongoing programs for which funds are (1) distributed by formula, such as elementary and secondary school operations and Tribal community colleges; and (2) for resource management activities that carry out specific laws or court-ordered settlements.

Non-recurring programs.—This activity includes programs that support Indian reservation and Tribal projects of limited duration, such as noxious weed eradication, cadastral surveys, and forest development.

Central office operations.—This activity supports the executive, program, information technology, and other administrative management costs of central office organizations, most of which are located in Washington, DC.

Regional office operations.—The BIA has 12 regional offices located throughout the country. Regional Directors have line authority over agency office superintendents. Most of the agency offices are located on Indian reservations. Virtually all of the staff and related administrative support costs for regional and agency offices are included within this activity. Regional Directors have flexibility in aligning their staff and resources to best meet the program requirements of the Tribes within their region.

Special programs and pooled overhead.—Most of the funds in this activity support law enforcement and bureau-wide expenses for items such as unemployment compensation, workers compensation, facilities rentals, telecommunications, and data processing. This activity includes the Bureau's two post-secondary schools, the Indian police academy, the Indian Integrated Resources Information Program, and non-education facilities operation and maintenance. The Arts and Crafts Board was transferred to the Departmental Management in 2005.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation as follows:

The Department of the Interior: Bureau of Land Management: "Firefighting"
The Department of Transportation: Federal Highway Administration: "Federal-Aid Highways"
The Department of the Interior: Office of the Special Trustee for American Indians: "Federal Trust Programs"

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans, the Indian loan guarantee and insurance fund, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits, and purchase of not to exceed 229 passenger motor vehicles, of which not to exceed 187 shall be for replacement only.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office operations or pooled overhead general administration (except facilities operations and maintenance) shall be available for tribal contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs for distribution to other tribes, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau school

system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if a tribe or tribal organization in fiscal year 2003 or 2004 received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such tribe or tribal organization using the section 5(f) distribution formula. The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Through the NBC, this fund finances the Department's administrative services systems, including: the Federal Personnel and Payroll System (FPPS), Federal Financial System (FFS), and the Interior Department Electronic Acquisitions System (IDEAS). The NBC also provides accounting, acquisition, aircraft, central reproduction, communications, supplies and health services. The NBC has expanded payroll services to other agencies as one of the four government-wide payroll providers selected by OPM.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and, as of October 1, 1994, the Republic of Palau. Assistance to the Republic of Palau is now contained in the "Compact of Free Association" account.

Remaining funds in the "Trust Territory of the Pacific Islands" account will be used to meet final transition responsibilities of the United States. Outlays from numerous ongoing infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws and will be reported as Trust Territory expenditures until such time as the activities cease.

The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic

assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through fiscal year 2023.

The Compact of Free Association with the Republic of Palau was implemented under the terms of Public Law 99-658 on October 1, 1994. This compact will provide annual benefits to the Republic totalling an estimated \$600 million over the fifteen-year period that began at the implementation date.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus is assisting the Secretary and the Congress to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior.

Restoration activities include: (1) the replacement and enhancement of affected resources; (2) acquisition of equivalent resources and services; and, (3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a departmentwide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the Act of July 27, 1990 (16 U.S.C. 191j et seq.). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The budget incorporates the receipts and mandatory spending associated with the civil and criminal settlements related to the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The Exxon Corporation made the final payment on the \$900 million civil settlement in September of 2001. The settlement includes a re-opener provision valid from September 2002 to September 2006, which provides an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement.

The civil settlement and interest earned to date total roughly \$962 million. Of that amount, \$216.4 million reimbursed Exxon and the Federal and State agencies for past response and damage assessment activities. To date, the Trustee Council has spent \$366.6 million and committed an additional \$39.2 million for habitat protection efforts (land acquisition) on approximately 645,903 acres of land. Another \$180.1 million has been used to fund research, monitoring, and marine science-based restoration activities, while \$33.6 million has been used for scientific management, public information and participation, and administration. The balance of \$126.0 million is invested in the Exxon Valdez Investment Fund, with funds earmarked for future habitat protection and for the Gulf Ecosystem Monitoring (GEM) program.

Executive direction.—This activity supports the Office of the Special Trustee for American Indians and staff offices. Under the American Indian Trust Fund Management Reform Act of 1994, the Special Trustee for American Indians is charged with general oversight for Indian trust reform efforts departmentwide. Additionally, in 1996, at the direction of the Congress, direct responsibilities and authorities for Indian Trust Fund Management were transferred to the Special Trustee from the Assistant Secretary - Indian Affairs.

Program operations, support, and improvements.—This activity supports the management and investment of approximately \$3 billion held in trust for Tribes and individual Indians. Resources support the implementation of trust management reform efforts, including historical accounting,¹ and the accurate collection, investment, disbursement, and provision of timely financial information to Indian Tribes and individual Indian monies (IIM) account holders.

¹ The amount for historical accounting may be revised as legal issues pending before the Courts are resolved.

The Office of the Special Trustee for American Indians, (OST) through the Office of Trust Funds Management, (OTFM) is responsible for the financial management of the funds held in trust for tribal and individual Indian beneficiaries. In 1998, OTFM identified a difference between the OTFM investment balances (assets) and the underlying individual Indian Monies (IIM) account balances (liabilities). Since that time, approximately \$700,000 has been recovered as a result of historical account reconciliation efforts. An approximate \$6 million discrepancy currently exists between the investment pool (assets) and the positive IIM subsidiary accounts (liabilities). The Administration intends to re-propose legislation to balance the accounts that would authorize up to \$6 million be made available to credit the investment pool and will work with the Congress to resolve this matter.

This appropriation funds a program to consolidate fractional interests in Indian lands. Funds will be used to purchase small partial interests from willing individual Indian landowners. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462) and other authorities.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

This consolidated display presents the activities associated with the following accounts: Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; Cochiti Wetfields Project; and San Luis Rey Water Authority Trust Fund. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

The Indian Gaming Regulatory Act, as amended by the 1998 Interior and Related Agencies Appropriation Act (P.L. 105-83), established the National Indian Gaming Commission as an independent agency within the Department of the Interior. The Commission monitors and regulates gaming activities conducted on Indian lands. Operating costs of the Commission are financed to the greatest extent possible through annual assessments of gaming operations, regulated by the Commission. The 1998 amendment authorized the Commission to collect up to \$8 million each year in gaming activity fees. For the past several years, the annual appropriation acts have included language raising the Commission's limitation on assessments to \$12 million. The 2006 budget requests that this \$12 million limitation be continued until enactment of proposed legislation to enable the Commission to adjust its operations with the growth or contraction of the Indian gaming industry.

The Secretaries shall consider the benefits to the local economy in evaluating bids and designing procurements which create economic opportunities for local contractors.] *In awarding a Federal contract with funds made available by this Act, the Secretary of Agriculture and the Secretary of the Interior may, in evaluating bids and proposals, give consideration to local contractors who provide employment and training for dislocated and displaced workers in an economically disadvantaged rural community, including those historically timber-dependent areas that have been affected by reduced timber harvesting on Federal lands and other forest-dependent rural communities isolated from significant alternative employment opportunities: Provided, That notwithstanding Federal Government procurement and contracting laws the Secretaries may award contracts, grants, or cooperative agreements to local non-profit entities, Youth Conservation Corps or related partnerships with State, local or non-profit youth groups, or small or disadvantaged businesses: Provided further, That the contract, grant, or cooperative agreement is for forest hazardous fuels reduction, watershed or water quality monitoring or restoration, wildlife or fish population monitoring, or habitat restoration or management: Provided further, That the terms “rural community” and “economically disadvantaged” shall*

[SEC. 317. No timber sale in Region 10 shall be advertised if the indicated rate is deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar. Program accomplishments shall be based on volume sold. Should Region 10 sell, in the current fiscal year, the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan in sales which are not deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, all of the western redcedar timber from those sales which is surplus to the needs of domestic processors in Alaska, shall be made available to domestic processors in the contiguous 48 United States at prevailing domestic prices. Should Region 10 sell, in the current fiscal year, less than the annual average portion of the decadal allowable sale quantity called for in the Tongass Land Management Plan in sales which are not deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, the volume of western redcedar timber available to domestic processors at prevailing domestic prices in the contiguous 48 United States shall be that volume: (1) which is surplus to the needs of domestic processors in Alaska; and (2) is that percent of the surplus western redcedar volume determined by calculating the ratio of the total timber volume which has been sold on the Tongass to the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan. The percentage shall be calculated by Region 10 on a rolling basis as each sale is sold (for purposes of this amendment, a "rolling basis" shall mean that the determination of how much western redcedar is eligible for sale to various markets shall be made at the time each sale is awarded). Western redcedar shall be deemed "surplus to the needs of domestic processors in Alaska" when the timber sale holder has presented to the Forest Service documentation of the inability to sell western redcedar logs from a given sale to domestic Alaska processors at a price equal to or greater than the log selling value stated in the contract. All additional western redcedar volume not sold to Alaska or contiguous 48 United States domestic processors may be exported to foreign markets at the election of the timber sale holder. All Alaska yellow cedar may be sold at prevailing export prices at the election of the timber sale holder.]

[SEC. 342. (a) **Findings**—

(1) In 1953, Public Land Order 899 (PLO 899) eliminated approximately 80 acres from the Tongass National Forest, for the Community of Elfin Cove, Alaska. From 1953 until 2001, the USDA Forest

Service believed two small islets within the Elfin Cove Harbor (Lots 1 and 2 of U.S. Survey 13150, approximately 0.29 acres) were included as part of PLO 899. However, due to a Bureau of Land Management rule in effect when PLO 899 was issued, ownership of unsurveyed, unmapped islets remained with the original landowner, in this case the United States.

(2) These two islets are needed by the Community of Elfin Cove to resolve public health and safety problems.

(3) The two islets serve no national forest purposes, but the Forest Service has no authority to transfer ownership of them to the Community of Elfin Cove, without receiving fair market value for the land interests.

(4) Neither the Bureau of Land Management nor the Forest Service intended to retain Federal ownership of these two islets, and they remained in ownership of the United States only through an inadvertent error.

(5) Conveyance of these two islets from the United States to the Community of Elfin Cove, Alaska, without consideration, is in the public interest.

(b) Based on the findings in subsection (a) and notwithstanding any other provision of law, Congress hereby authorizes and directs the Secretary of Agriculture to convey in fee simple without compensation, Lots 1 and 2 of U.S. Survey 13150, comprising approximately 0.29 acres, to the Community of Elfin Cove, Alaska.】

(b) Nothing in this section shall be construed to prohibit the disbursement of funds to any Alaska Native village or Alaska Native village corporation under any contract or compact entered into prior to May 1, 2004, or to prohibit the renewal of any such agreement.

(c) For the purpose of this section, Eastern Aleutian Tribes, Inc., shall be treated as an Alaska Native regional health entity to whom funds may be disbursed under this section.】

【SEC. 344. Notwithstanding any other provision of law and using funds previously appropriated for such purpose under Public Law 106-291 (\$1,630,000) and Public Law 108-199 (\$2,300,000), the National Park Service shall (1) not later than 60 days after enactment of this section purchase the seven parcels of real property in Seward, Alaska identified by Kenai Peninsula tax identification numbers 14910001, 14910002, 14911033, 14913005, 14913020, 14913007, and 14913008 that have been selected for the administrative complex, visitor facility, plaza and related parking for the Kenai Fjords National Park and Chugach National Forest which shall hereafter be known as the Mary Lowell Center; and (2) transfer to the City of Seward any remaining balance of previously appropriated funds not necessary for property acquisition and design upon the vacation by the City of Seward of Washington Street between 4th Avenue and 5th Avenue and transfer of title of the appropriate portions thereof to the Federal Government, provided that the City of Seward uses any such funds for the related waterfront planning, pavilions, boardwalks, trails, or related purposes that compliment the new Federal facility.】

【SEC. 345. Section 331, of Public Law 106-113, is amended—

(1) in part (a) by striking “2004” and inserting “2005”; and

(2) in part (b) by striking “2004” and inserting “2005”.】
