

<b>EMPLOYMENT AND TRAINING ADMINISTRATION ADVISORY SYSTEM U.S. DEPARTMENT OF LABOR Washington, D.C. 20210</b>	<b>CLASSIFICATION</b> WIA/Performance Reporting System
	<b>CORRESPONDENCE SYMBOL</b> PROTECH
	<b>DATE</b> August 24, 2009

**TRAINING AND EMPLOYMENT GUIDANCE LETTER NO. 14-00, Change 3**

**TO:** STATE WORKFORCE AGENCIES  
STATE WORKFORCE ADMINISTRATORS  
STATE WORKFORCE LIAISONS

**FROM:** JANE OATES *Jane Oates*  
Assistant Secretary

**SUBJECT:** Workforce Investment Act (WIA) Annual Report Narrative

**1. Purpose.** To provide additional guidelines to the states about the WIA Annual Report narrative and to update procedures for submission of the report to the Employment and Training Administration (ETA).

**2. References.**

- The Workforce Investment Act of 1998 (WIA), sections 136 and 185;
- 20 CFR Part 667.300(d)(e)(1)(2);
- Training and Employment Guidance Letter (TEGL) 14-00, Change 1, and TEGL 14-00, Change 2, *Guidance on the Workforce Investment Act (WIA) Management Information and Reporting System*;
- TEGL 14-03 and TEGL 14-03, Change 1, *Performance Reporting Submission Procedures for the Workforce Investment Act Standardized Record Data (WIASRD), the Annual Report, and the Quarterly Reports under Title IB of the Workforce Investment Act (WIA) for Program Year (PY) 2003 and 2004*;
- TEGL 17-05 *Common Measures Policy for the Employment and Training Administration's (ETA) Performance Accountability System and Related Performance Issues*;
- TEGL 14-08, *Guidance for Implementation of the Workforce Investment Act and Wagner-Peyser Act Funding in the American Recovery and Reinvestment Act of 2009 and State Planning Requirements for Program Year 2009*;
- Office of Management and Budget (OMB) Circular No. A-94, *Revised Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs*.

<b>RESCISSIONS</b> None	<b>EXPIRATION DATE</b> Continuing
----------------------------	--------------------------------------

**3. Background.** Each state that receives an allotment under WIA Section 127 (youth activities) or Section 132 (Adult and Dislocated Worker activities) must prepare and submit an Annual Report of performance progress to the Secretary of Labor in accordance with WIA Sections 136 and 185.

There are two components to the WIA Annual Report: (1) the required performance results, as specified in Form ETA 9091—the WIA Title 1B Annual Report (OMB No. 1205-0420) at: <http://www.doleta.gov/performance/reporting/>, and (2) a narrative report. This change to TEGL 14-00, Change 2 focuses on the narrative report and what states should address in the narrative.

**4. WIA Annual Report Narrative.** The required portions of the annual report narrative include the information required by WIA Sections 136(d) (1) and (2) and 185(d). This includes:

- Performance data on the core and customer satisfaction measures,<sup>1</sup> including progress of local areas in the state in achieving local performance measures;
- Information on the status of state evaluation activities;
- Information on the cost of workforce investment activities relative to the effect of the activities on the performance of participants;
- Assurance that all required elements are reported uniformly so that a state-by-state comparison can be made; and
- Information on participants in the workforce investment system (this information is typically addressed in the data portion of the Annual Report).

Although TEGL 14-00, Change 2, encouraged states to describe how waivers have been used and how waivers have influenced performance outcomes, this new guidance now makes this description a requirement of the Annual Report narrative. States should include the waivers for which the state has received approval, how the waivers have changed the activities of the state and local areas, and how activities carried out under the waivers have directly or indirectly affected state and local area performance outcomes.

In addition to the required components of the WIA Annual Report narrative, ETA encourages states to include the following information in its narrative:

- A. A discussion of the state’s unique programs and recent accomplishments. Such a report can describe these accomplishments in the most advantageous manner to all stakeholders and partners, including Congress, governors, state legislators and workforce investment boards. States may want to highlight “success stories” that focus attention on successful programs for participants, employers and communities. Messages from the governor or information about state workforce investment board members, market analysis, strategies for improvement, and effects on major industries may also be included.
- B. A discussion of the activities funded by the state’s discretionary (“15 percent”) funds. In this section of the narrative report, states may describe activities

---

<sup>1</sup> States that are approved to report only the common performance measure outcomes for WIA programs do not have to report outcomes for the customer satisfaction measures, the credential measure for Adults and Dislocated Workers, or the Older and Younger Youth measures on the WIA Annual Report.

undertaken in whole or in part with their discretionary funds, and how those activities directly or indirectly affect performance.

- C. A discussion of the initiatives and activities outlined in the WIA and Wagner-Peyser Act State Strategic Plan to improve performance.

TEGL 14-08 provided instructions to states for modifying their existing State Plans to describe the implementation of the American Recovery and Reinvestment Act of 2009 (Recovery Act) and the response to the economic downturn, and also updated the “National Strategic Direction.”

In their strategic State Plans, many states described initiatives that supported the Department’s strategic direction, some of which were in the preliminary stages. States may have progressed considerably in implementing such initiatives after submitting their State Plan. This section of the narrative may be used to describe state activities in the time periods between State Plans. States may provide an updated status of these initiatives and activities, including a discussion of how these initiatives have directly or indirectly affected performance. States may also use this portion of the narrative to describe activities or initiatives that began after the submission of the State Plan.

States may want to also include information from their State Plans that highlight innovative service delivery strategies, including program activities that support dislocated workers, low-skilled/low-income adults and disadvantaged youth, the outcomes expected, as well as the actual outcomes for their major customer segments. States may indicate actual Federal outlays for selected activities, if the information is available.

Status of State Evaluation Activities:

States should include information about evaluation studies, if any were conducted, of workforce investment activities as described in WIA Section 136(e). The narrative should include:

- The questions the evaluation will/did address;
- A description of the evaluation’s methodology; and
- Information about the timing of feedback and deliverables.

These evaluation studies, conducted under WIA Title 1B, are to promote, establish, and implement methods for continuous improvement in the efficiency and effectiveness of the statewide workforce investment system in improving employability for job seekers and competitiveness for employers.

Costs of Workforce Investment Activities:

States should explain how the mix of services for adults, dislocated workers, and youth activities affected the outcomes. For adults and dislocated workers, the activities that states may wish to address are core, intensive and training services. For youth activities, states may wish to include information about front-end costs (e.g., intake, assessment and case management) and aggregated direct service costs for the ten youth program elements described in WIA Section 129(c)(2).

ETA has a long-term interest in improving program efficiency so that both taxpayers and customers can be better served. A variety of methods for calculating and presenting cost-related activities and measures are described in prior WIA State Annual Reports. Among

the most common cost calculations reported by the states is the “cost per participant” indicator. “Cost per participant” is of limited use in measuring the effectiveness of a program, because it measures appropriations or allotments to participants served.

To facilitate further discussion about costs to outcomes, OMB charged ETA with the responsibility of developing and implementing an outcome-based measure for programs using the common performance measures. A study is underway to determine how costs and other measures of efficiency might be utilized to assess overall program effectiveness. Results will be available on ETA’s website when the study is completed. The attachment to this TEGl offers examples of potential efficiency measures.

**5. Due Date.** The Annual Report is due no later than October 1 following each program year. For example, the report for Program Year (PY) 2008 will be due October 1, 2009. The Annual Report, which includes the required performance reports and the narrative, will reflect accurate performance outcome information that is available by the time the Annual Report for the program year is due. Failure to submit the performance progress reports by the deadline may lead to incentive grant ineligibility for a state.

**6. Submission.** An electronic copy of the WIA State Annual Report narrative is due to [WIA.AR@dol.gov](mailto:WIA.AR@dol.gov) by October 1. States should also submit an electronic copy to their respective ETA Regional Administrator. ETA will publish each state’s report on the Internet. Acceptable formats include WordPerfect, Microsoft Word, Acrobat, and other commonly used formats. In an effort to be more “green,” hard copies of the report may be submitted, but are no longer required.

**7. Action Requested.** Distribute this TEGl to those personnel responsible for developing the WIA Annual Report narrative, including personnel responsible for performance reporting, and to all local areas responsible for administering the WIA programs.

**8. Inquiries.** Questions concerning this TEGl should be directed to your appropriate Regional Office.

**9. Attachment.** Overview of Potential Alternative Efficiency Measures for Consideration.

**Overview of Potential Alternative Efficiency Measures for Consideration**

**Examples of costs in relation to effect of participant services and outcomes**

(1) **Unit Costs** = total cost by service / total participation by service.

Expenditures			Participation			Unit Costs		
Core	Intensive	Training	Core	Intensive	Training	Core	Intensive	Training
\$	\$	\$	#	#	#	\$	\$	\$

Pros:

- It is applicable to most programs.
- It makes it easier to understand how costs apply to participant services.

Cons:

- Program services and costs must be closely tracked by year.

(2) **Cost per Participant** = This measure is calculated by taking the total program costs in terms of expenditures and dividing by the number of participants served during the year by the particular program.

Pros:

- It is applicable to most programs.
- Data is readily available.
- Easy to understand.
- Can be immediately generated each year.
- Not costly or burdensome.

Cons:

- It is of limited use in assessing program effectiveness, because it is not an outcome-based measure.

(3) **Cost per Exiter** = It is calculated by taking total program costs in terms of expenditures and dividing by the number of exiters terminating the program during the year by the particular program.

Pros:

- It is applicable to most programs.
- Data is readily available.
- Easy to understand.
- Can be immediately generated each year.
- Not costly or burdensome.

Cons:

- It is of limited use in assessing program effectiveness, because it is not an outcome-based measure.

(4) **Cost per Entered Employment** = This measure is calculated by taking total program costs in terms of expenditures and dividing by the number of exiters entering employment in the first quarter following exit from the particular program.

Pros:

- It is applicable to most programs.
- Data is readily available.
- Easy to understand.
- Can be generated about two quarters after the end each Program Year.
- Not costly or burdensome.
- Measure is an outcome-based efficiency measure. Therefore, it is of substantial use in understanding program effectiveness.

Cons:

- Does not capture those who entered employment in the same quarter of exit.

(5) **Cost per Retained Employment** = This efficiency measure is calculated by taking total program costs in terms of expenditures and dividing by the number of exiters who are employed in both the second and third quarters after the exit quarter.

Pros:

- Potentially applicable to most programs.
- Data is readily available.
- Relatively easy to understand.
- Relatively low cost and low burden to produce
- It is an outcome-based efficiency measure. Therefore, it is of substantial use to understanding program effectiveness and costs.

Cons:

- Lengthier lags in data. Must wait for several quarters after the end of the program year.

(6) **Cost per \$1,000 Increase in Earnings** = Total program cost divided by total earnings change from 2<sup>nd</sup> and 3<sup>rd</sup> pre-program quarters to 2<sup>nd</sup> and 3<sup>rd</sup> post-program quarters for participants or exiters.

Pros:

- Potentially applicable to most programs.
- Data is readily available.
- Relatively low cost and low burden to produce.
- It is an outcome-based efficiency measure. Therefore, it is of substantial use to understanding program effectiveness and costs.

Cons:

- Somewhat difficult to understand.
- Lengthier lags in data. Must wait several quarters after the end of the Program Year.

(7) **Cost per \$1,000 in Post-Program Earnings** = Total program cost divided by total earnings in 2<sup>nd</sup> and 3<sup>rd</sup> post-program quarters for participants of exiters \* \$1,000.

Pros:

- Potentially applicable to most programs.
- Data is readily available.
- Relatively low cost and low burden to produce.
- It is outcome-based.

Cons:

- Lengthier lags in data. Must wait several quarters after the end of Program Year.
- Somewhat difficult to understand.

(8) **Cost per Exiter or Participant Receiving a Particular Service** = Total program cost of a particular service divided by the number of exiters or participants receiving a particular service.

Pros:

- Easy to understand.
- No lags in data. Data can be immediately generated at the end of each year.

Cons:

- Only applicable to programs that distinguish types of service.
- Data is readily available for some programs, but not all.
- Is not an outcome-based efficiency measure.
- Maybe burdensome to generate.

(9) **Cost per Placement in Employment or Education** = Total program cost divided by the number of participants or exiters in employment or enrolled in post secondary education and/or advanced training or advanced training occupational skills in the 1<sup>st</sup> quarter after exit.

Pros:

- The data is relatively easy to understand.
- Relatively low cost and low burden to produce.
- The measure is outcome-based so it is of substantial use to understanding program effectiveness.

Cons:

- Limited to primarily the WIA Youth program.

(10) **Cost per Individual Recognized Degree or Certificate** (Credential include but are not limited to, a high school diploma, GED, or other recognized equivalents, post-secondary degrees/certificates, recognized skill standards, and licensure or industry-recognized certificates.) = Total program cost divided by the number of participants or exiters receiving a training service attaining a recognized credential during participation or by the end of the 3<sup>rd</sup> quarter after exit.

Pros:

- The measure is an outcome-based measure, so it is of substantial use in understanding program effectiveness.

Cons:

- Only applicable to programs that provide services and identify individuals as receiving training and types of credentialing.
- Data is readily available for some programs, but not all.
- The measure is somewhat difficult to understand.
- Potentially lengthy lags in data.

(11) **Return on Investment** = Return on Investment (ROI) is a way of summarizing how large the gain on an investment, such as workforce development, actually is. In its simplest form, ROI is calculated by dividing the gain by the size of the investment. This equation can be written as  $B/C$ , where  $B$  is the sum of all benefits that result from the investment over the period considered and  $C$  represents the costs. For a workforce program, one would divide the increase in earnings due to the program by the cost of the program. In more sophisticated analyses, ROI calculations take into account the timing of the gains due to the program. Economists typically compute a variation called the internal rate of return (IRR), which is based on the costs and benefits over the life of the investment. The IRR can be calculated, using a financial calculator or a spreadsheet, by solving the following equation for  $i$ :  $0 = -C_0 + (B_1 - C_1)/(1+i) + (B_2 - C_2)/(1+i)^2 + (B_3 - C_3)/(1+i)^3 + \dots + (B_N - C_N)/(1+i)^N$  where  $B_t$  is the benefit received in year  $t$ ,  $C_t$  is the cost incurred in year  $t$ , and  $N$  is the last year that benefits or costs occur. (The four dots mean that the formula includes the same type of term for all years between year 3 and year  $N$ .) The IRR is preferred to the simpler versions of ROI because it takes into account the timing of the costs and benefits.

Pros:

- Potentially applicable to most programs.
- Measure is an impact-based efficiency measure, which controls for factors that could potentially influence/bias results. Therefore, it is of the greatest utility in understanding program cost-effectiveness.
- This measure controls for difficulty or cost of serving different populations (e.g., hard-to-serve, service mix, and economic conditions).

Cons:

- Data is very costly to produce.
- The measure is difficult to understand.
- Lengthy lags in data.
