Acronyms and Abbreviations	iii
Executive Summary	vii
1. Introduction.....	1
1.1 Biological Assessment Content and Scope.....	1
1.2 Projects Not Included in the Biological Assessment	3
1.3 Reclamation’s Tribal Trust Responsibility and ESA Compliance	4
1.3.1 Indian Water Rights Settlements	4
1.4 The Middle Rio Grande Endangered Species Collaborative Program/RIP	6
1.5 Consultation and Litigation History.....	7
1.5.1 Early Coordination Efforts.....	10
1.6 Quiet Title Litigation History	12
2. Action Area: Overview of Project Components and Water Operations	15
2.1 Action Area.....	15
2.2 Overview of Project Components.....	15
2.2.1 The San Juan-Chama Project	15
2.2.2 The Middle Rio Grande Project, Including the MRGCD.....	18
2.3 Overview of Water Operations	25
2.3.1 The Rio Grande Compact and Article VII Storage Restrictions	25
2.3.2 Water Accounting	27
2.3.3 Snowmelt Forecasting and the Upper Rio Grande Water Operations Model.....	27
2.3.4 The Annual Operating Plan	27
2.3.5 Operation for Prior and Paramount Lands	29
2.3.6 MRGCD Water Management	30
3. Description of Proposed Actions	33
3.1 Introduction.....	33
3.2 Description of Reclamation’s Proposed Water Actions	34
3.2.1 SJC Project Operations at Heron Dam and Reservoir	34
3.2.2 Operation of El Vado Dam and Reservoir	38

Contents (continued)

3.3 Non-Federal Proposed Actions.....	41
3.3.1 The Middle Rio Grande Conservancy District	41
3.4 Proposed Conservation Measure.....	47
3.4.1 Middle Rio Grande Collaborative Recovery Implementation Program	47
3.4.2 Specific Reclamation and MRGCD Conservation Measures	51
4. Species Description, Federal Listing Status and Life History	63
4.1 Rio Grande Silvery Minnow	63
4.1.1 Species Description.....	63
4.1.2 Distribution	63
4.1.3 Listing Status – Critical Habitat.....	64
4.1.4 Life History and Ecology.....	65
4.1.5 Reasons for Decline	68
4.2 Southwestern Willow Flycatcher.....	70
4.2.1 Species Description.....	70
4.2.2 Distribution	70
4.2.3 Listing Status and Critical Habitat.....	71
4.2.4 Life History and Ecology.....	75
4.2.5 Reasons for Decline	79
4.3 Pecos Sunflower.....	79
4.3.1 Species Description.....	79
4.3.2 Status and Distribution.....	80
4.3.3 Listing Status and Critical Habitat.....	82
4.3.4 Life History and Ecology.....	83
4.3.5 Reasons for Decline	84
4.4 Interior Least Tern	84
4.4.1 Status and Distribution.....	84
4.4.2 Life History and Ecology.....	84
4.4.3 Reasons for Decline	85
5. Environmental Baseline	87
5.1 Historical Perspective	87
5.2 Climate.....	91
5.3 Status of Listed Species	93
5.3.1 Rio Grande Silvery Minnow.....	95
5.3.2 Southwestern Willow Flycatcher.....	107
5.3.3 Pecos Sunflower.....	117
5.3.4 Interior Least Tern	118
5.4 Hydrologic Regime.....	119
5.4.1 Baseline Water Operations	120

Contents (continued)

5.4.2 Current Hydrologic Conditions.....	147
5.5 Channel Conditions and Dynamics.....	156
5.5.1 MRG Reach Geomorphic Parameters and Current Trends.....	157
5.6 Actions to Avoid, Minimize, or Mitigate.....	167
5.6.1 Environmental Water Management	168
5.6.2 Habitat Improvement	182
5.6.3 Salvage and Captive Propagation and Actions to Minimize Take of Silvery Minnow	189
5.6.4 Water Quality.....	190
5.6.5 Monitor Cowbird Paritism	190
5.6.6 Conservation Recommendations	191
5.7 Summary of Baseline Conditions for Listed Species	196
5.7.1 Summary of Habitat Condition, Species Status, and Restoration by Reach	196
5.7.2 Cochiti Dam Reach.....	197
5.7.3 Angostura Reach.....	197
5.7.4 Isleta Reach.....	198
5.7.5 San Acacia Reach	199
5.7.6 Summary of Baseline Conditions Affecting Silvery Minnow Life History and Critical Habitat Elements.....	200
5.7.7 Summary Baseline Conditions Affecting Willow Flycatcher Life History and Critical Habitat Elements.....	205
5.7.8 Summary Baseline Conditions Affecting Pecos Sunflower.	207
6.0 Effects Analysis	209
6.1 Approach, Tools, and Methods for Hydrologic Analysis.....	210
6.1.2 Approach for Analysis of Effects to Listed Species	214
6.1.3 Continuation of Geomorphic Trends	215
6.2 The Composition of Middle Rio Grande Flows	216
6.2.1 The Composition of River Flow at Cochiti Dam.....	217
6.3 Comparison of Hydrologic Conditions with and Without the Proposed Water Management Actions.....	222
6.3.1 Effect of Proposed Water Management Actions on Silvery Minnow	228
6.3.2 Effect of Proposed Action on flycatcher.....	233
6.3.3 Effect of Proposed Action on Pecos Sunflower.....	240
6.4 Action-by-Action Analysis of Effects of Components of the Proposed Water Management Actions	242
6.4.1 Approach to Action-by-Action Analysis	242
6.4.2 Effects of Heron Dam Operations under the SJC Project.....	250

Contents (continued)

6.4.3 Analysis of Effects of El Vado Dam Operations Under the Middle Rio Grande Project	262
6.4.4 Hydrologic Effects Analysis of Non-Federal Proposed Action: MRGCD Diversions.....	273
6.5 Evaluation of Conservation Measure – RIP.....	291
6.5.1 Reclamation’s Supplemental Water Program.....	295
6.5.2 Effects of the MRGCD’s Proposed Conservation Measures	300
6.6 Interrelated and Interdependent Actions	305
6.6.1 The Corps Actions Related to the SJC Project	305
6.6.2 The New Mexico State Engineer’s Actions Related to the SJC Project.....	306
6.7 Summary Effects Analysis of Proposed Water Management Actions	307
6.7.1 Summary of the Effects of Reclamation’s Actions.....	307
6.7.2 Summary of the Effects of MRGCD’s Water Management Actions	308
6.7.3 Summary of Effects on Silvery Minnow	309
6.7.4 Summary of Effects on Flycatcher	310
6.7.5 Summary of Effects on Pecos Sunflower	311
6.7.6 Summary of Effects of Conservation Measures.	311
7. Cumulative Effects Analysis.....	313
7.1 Future Changes in Climate and Hydrology	313
7.2 Regional Water Planning: Projected Impact of Population Growth and Water Demand on Water Supplies.....	319
7.2.1 The Jemez y Sangre Planning Region	320
7.2.2 The Middle Rio Grande Planning Region	321
7.2.3 The Socorro-Sierra Planning Region.....	323
7.2.4 The MRG Water Assessment, the Water Budget, and Water Conservation	324
7.2.5 Local Government Water Conservation Efforts	325
7.3 Water Rights Transfers and Offsets	326
7.4 Pueblo Water Rights	327
7.5 Conclusion	327
8. Composite Effect of Proposed Water Management and Maintenance	329
8.1 Rio Grande Silvery Minnow	332
8.2 Southwestern Willow Flycatcher	332
8.3 Pecos Sunflower.....	333
