**NEW RESIDENTIAL CONSTRUCTION IN NOVEMBER 2011**

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for November 2011:

**BUILDING PERMITS**

Privately-owned housing units authorized by building permits in November were at a seasonally adjusted annual rate of 681,000. This is 5.7 percent ( $\pm 1.6\%$ ) above the revised October rate of 644,000 and is 20.7 percent ( $\pm 1.8\%$ ) above the November 2010 estimate of 564,000.

Single-family authorizations in November were at a rate of 435,000; this is 1.6 percent ( $\pm 1.6\%$ ) above the revised October figure of 428,000. Authorizations of units in buildings with five units or more were at a rate of 224,000 in November.

**HOUSING STARTS**

Privately-owned housing starts in November were at a seasonally adjusted annual rate of 685,000. This is 9.3 percent ( $\pm 13.1\%$ )\* above the revised October estimate of 627,000 and is 24.3 percent ( $\pm 20.1\%$ ) above the November 2010 rate of 551,000.

Single-family housing starts in November were at a rate of 447,000; this is 2.3 percent ( $\pm 8.0\%$ )\* above the revised October figure of 437,000. The November rate for units in buildings with five units or more was 230,000.

**HOUSING COMPLETIONS**

Privately-owned housing completions in November were at a seasonally adjusted annual rate of 542,000. This is 5.6 percent ( $\pm 11.5\%$ )\* below the revised October estimate of 574,000 and is 1.6 percent ( $\pm 15.8\%$ )\* below the November 2010 rate of 551,000.

Single-family housing completions in November were at a rate of 440,000; this is 0.7 percent ( $\pm 8.9\%$ )\* below the revised October rate of 443,000. The November rate for units in buildings with five units or more was 99,000.

*New Residential Construction data for December 2011 will be released on Tuesday, December 20, 2011, at 8:30 A.M. EST.*

**EXPLANATORY NOTES**

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 2 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ( $\pm 3.2\%$ ) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about three percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

\* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.

**Table 1. New Privately-Owned Housing Units Authorized in Permit-Issuing Places**
