

“Do Nation” Digital Video Transcript

Right now, more than 115,000 people are waiting for an organ. More than 115,000 people are waiting for someone to save their lives. And every day, 18 of these people will die waiting for one donor. A donor like you.

What if you could help save up to 8 people? And through eye and tissue donation, enhance the lives of up to 50 others? What if you could give all of those people time?

Time for family, friends, grandkids, gardening, ice cream, weddings, birthdays, sunsets, memories ... life ... just by making the decision to donate?

And what if 10 more donated? Or 100? Or 1,000? How many lives could be saved?

We need more than a donation. We need a DO NATION. We need people motivated to help others. So register today to become a donor and make your wishes known to your family. Help us become a DO NATION. Help us save lives.

Go to <http://www.organdonor.gov>. Sign up on your state registry to become a donor and learn how you can help.

(And thank you).
