## Executive Summary

**Review Purpose:** The purpose of the review was to evaluate selected patient care activities to determine whether the community based outpatient clinics (CBOCs) and primary care clinics (PCCs) provide safe, consistent, and high-quality health care for our veterans. We conducted site visits during the week of July 28, 2014, at the following CBOCs which are under the oversight of the Minneapolis VA Health Care System and Veterans Integrated Service Network 23:

- Maplewood CBOC, Maplewood, MN
- Twin Ports CBOC, Superior, WI

**Review Results:** We conducted four focused reviews and had no findings for the Environment of Care review. However, we made recommendations in the following three review areas:

Alcohol Use Disorder. Ensure that CBOC/PCC:

- Staff provide education and counseling for patients with positive alcohol screens and drinking alcohol above National Institute on Alcohol Abuse and Alcoholism limits.
- Staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
- Managers ensure that patients with excessive persistent alcohol use receive brief treatment or are evaluated by a specialty provider within 2 weeks of the screening.
- Registered Nurse Care Managers receive motivational interviewing and health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Medication Management. Ensure that CBOC/PCC staff:

- Document that medication reconciliation was completed at each episode of care where the newly prescribed fluoroquinolone was administered, prescribed, or modified.
- Provide medication counseling/education as required.

Designated Women's Health Providers' Proficiency. Ensure that all Designated Women's Health Providers:

- Maintain proficiency as required for the provision of women's health care.
- Are designated with the women's health indicator in the Primary Care Management Module.

## Comments

The VISN and Facility Directors agreed with the CBOC and PCC review findings and recommendations and provided acceptable improvement plans. (See Appendixes C and D, pages 15–19, for the full text of the Directors’ comments.) We will follow up on the planned actions until they are completed.

JOHN D. DAIGH, JR., M.D.  
Assistant Inspector General for  
Healthcare Inspections

## Objectives, Scope, and Methodology

### Objectives

The CBOC and PCC reviews are an element of the OIG's efforts to ensure that our Nation's veterans receive high-quality VA health care services. As such, the CBOC and PCC reviews are recurring evaluations of selected primary care operations that focus on patient care quality and the EOC. In general, our objectives are to:

- Determine whether the CBOCs are compliant with EOC requirements.
- Determine whether CBOCs/PCCs are compliant with VHA requirements in the care of patients with AUD.
- Determine compliance with requirements for the clinical oversight and patient education of fluoroquinolones for outpatients.
- Evaluate if processes are in place for DWHPs to maintain proficiency in WH.

### Scope

To evaluate for compliance with requirements related to patient care quality and the EOC, we conducted onsite inspections, reviewed clinical and administrative records, and discussed processes and validated findings with managers and employees. The review covered the following four activities:

- EOC
- AUD
- MM
- DWHP Proficiency

The scope of this review is limited to the established objectives. Issues and concerns that come to our attention that are outside the scope of this standardized inspection will be reviewed and referred accordingly.

### Methodology

The onsite EOC inspections were conducted at randomly selected CBOCs that had not been previously inspected.<sup>1</sup> Details of the targeted study populations for the AUD, MM, and DWHP Proficiency focused reviews are noted in Table 1.

---

<sup>1</sup> Includes 93 CBOCs in operation before March 31, 2013.

**Table 1. CBOC/PCC Focused Reviews and Study Populations**

Review Topic	Study Population
AUD	All CBOC and PCC patients screened within the study period of July 1, 2012, through June 30, 2013, and who had a positive AUDIT-C score <sup>2</sup> and all providers and RN Care Managers assigned to PACT prior to October 1, 2012.
MM	All outpatients with an original prescription ordered for one of the three selected fluoroquinolones from July 1, 2012, through June 30, 2013.
DWHP Proficiencies	All WH PCPs designated as DWHPs as of October 1, 2012, and who remained as DWHPs until September 30, 2013.

In this report, we make recommendations for improvement. Recommendations pertain to issues that are significant enough to be monitored by the OIG until corrective actions are implemented.

The review was done in accordance with OIG standard operating procedures for CBOC and PCC reviews.

<sup>2</sup> The AUDIT-C is a brief alcohol screen that reliably identifies patients who are hazardous drinkers or have active alcohol use disorders. Scores range from 0–12.

## Results and Recommendations

### EOC

The purpose of this review was to evaluate whether CBOC managers have established and maintained a safe and clean EOC as required.<sup>a</sup>

We reviewed relevant documents and conducted physical inspections of the Maplewood and Twin Ports CBOCs. The table below shows the areas reviewed for this topic. The facility generally met requirements. We made no recommendations.

**Table 2. EOC**

NM	Areas Reviewed	Findings
	The CBOC's location is clearly identifiable from the street as a VA CBOC.	
	The CBOC has interior signage available that clearly identifies the route to and location of the clinic entrance.	
	The CBOC is Americans with Disabilities Act accessible.	
	The furnishings are clean and in good repair.	
	The CBOC is clean.	
	The CBOC maintains a written, current inventory of hazardous materials and waste that it uses, stores, or generates.	
	An alarm system and/or panic buttons are installed and tested in high-risk areas (e.g., MH clinic).	
	Alcohol hand wash or soap dispenser and sink are available in the examination rooms.	
	Sharps containers are secured.	
	Safety needle devices are available.	
	The CBOC has a separate storage room for storing medical (infectious) waste.	
	The CBOC conducts fire drills at least every 12 months.	
	Means of egress from the building are unobstructed.	
	Access to fire alarm pull stations is unobstructed.	
	Access to fire extinguishers is unobstructed.	
	The CBOC has signs identifying the locations of fire extinguishers.	
	Exit signs are visible from any direction.	
	No expired medications were noted during the onsite visit.	

NM	Areas Reviewed (continued)	Findings
	All medications are secured from unauthorized access.	
	Personally identifiable information is protected on laboratory specimens during transport so that patient privacy is maintained.	
	Adequate privacy is provided to patients in examination rooms.	
	Documents containing patient-identifiable information are not laying around, visible, or unsecured.	
	Window coverings provide privacy.	
	The CBOC has a designated examination room for women veterans.	
	Adequate privacy is provided to women veterans in the examination room.	
	The information technology network room/server closet is locked.	
	All computer screens are locked when not in use.	
	Staff use privacy screens on monitors to prevent unauthorized viewing in high-traffic areas.	
	EOC rounds are conducted semi-annually (at least twice in a 12-month period) and deficiencies are reported to and tracked by the EOC Committee until resolution.	
	The CBOC has an automated external defibrillator.	
	Safety inspections are performed on the CBOC medical equipment in accordance with Joint Commission standards.	
	The parent facility includes the CBOC in required education, training, planning, and participation leading up to the annual disaster exercise.	
	The parent facility's Emergency Management Committee evaluates CBOC emergency preparedness activities, participation in annual disaster exercise, and staff training/education relating to emergency preparedness requirements.	

## AUD

The purpose of this review was to determine whether the facility's CBOCs and PCCs complied with selected alcohol use screening and treatment requirements.<sup>b</sup>

We reviewed relevant documents. We also reviewed 39 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 3. AUD**

NM	Areas Reviewed	Findings
	Alcohol use screenings are completed during new patient encounters, and at least annually.	
	Diagnostic assessments are completed for patients with a positive alcohol screen.	
X	Education and counseling about drinking levels and adverse consequences of heavy drinking are provided for patients with positive alcohol screens and drinking levels above National Institute on Alcohol Abuse and Alcoholism guidelines.	Staff did not provide education and counseling for 2 of 11 patients who had positive alcohol use screens.
X	Documentation reflects the offer of further treatment for patients diagnosed with alcohol dependence.	We did not find documentation of the offer of further treatment for two of six patients diagnosed with alcohol dependence.
	For patients with AUD who decline referral to specialty care, CBOC/PCC staff monitored them and their alcohol use.	
X	Counseling, education, and brief treatments for AUD are provided within 2 weeks of positive screening.	Treatment was not provided within 2 weeks of positive screening for two of eight patients.
X	CBOC/PCC RN Care Managers have received motivational interviewing training within 12 months of appointment to PACT.	We found that 21 (39 percent) of 54 RN Care Managers did not receive motivational interviewing training within 12 months of appointment to PACT.
X	CBOC/PCC RN Care Managers have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	We found that 10 (19 percent) of 54 RN Care Managers did not receive health coaching training within 12 months of appointment to PACT.
	The facility complied with any additional elements required by VHA or local policy.	

## Recommendations

1. We recommended that CBOC/Primary Care Clinic staff provide education and counseling for patients with positive alcohol screens and drinking alcohol above National Institute on Alcohol Abuse and Alcoholism limits.

2. We recommended that CBOC/Primary Care Clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
3. We recommended that managers ensure that patients with excessive persistent alcohol use receive brief treatment or are evaluated by a specialty provider within 2 weeks of the screening.
4. We recommended that CBOC/Primary Care Clinic Registered Nurse Care Managers receive motivational interviewing and health coaching training within 12 months of appointment to Patient Aligned Care Teams.

**MM**

The purpose of this review was to determine whether appropriate clinical oversight and education were provided to outpatients prescribed oral fluoroquinolone antibiotics.<sup>c</sup>

We reviewed relevant documents. We also reviewed 39 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 4. Fluoroquinolones**

<b>NM</b>	<b>Areas Reviewed</b>	<b>Findings</b>
X	Clinicians documented the medication reconciliation process that included the fluoroquinolone.	We did not find documentation that medication reconciliation included the newly prescribed fluoroquinolone in 5 (13 percent) of 39 patients' EHRs.
	Written information on the patient's prescribed medications was provided at the end of the outpatient encounter.	
X	Medication counseling/education for the fluoroquinolone was documented in the patients' EHRs.	We did not find documentation of medication counseling that included the fluoroquinolone in 5 (13 percent) of 39 patients' EHRs.
	Clinicians documented the evaluation of each patient's level of understanding for the education provided.	
	The facility complied with local policy.	

**Recommendations**

5. We recommended that staff document that medication reconciliation was completed at each episode of care where the newly prescribed fluoroquinolone was administered, prescribed, or modified.

6. We recommended that staff provide medication counseling/education as required.

## DWHP Proficiency

The purpose of this review was to determine whether the facility's CBOCs and PCCs complied with selected DWHP proficiency requirements.<sup>d</sup>

We reviewed the facility self-assessment, VHA and local policies, PCMM data, and supporting documentation for DWHPs' proficiencies. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 5. DWHP Proficiency**

NM	Areas Reviewed	Findings
X	CBOC and PCC DWHPs maintained proficiency requirements.	We found that 5 of 18 DWHPs with panels comprised of less than 10 percent women veterans at the CBOC and/or PCCs did not have evidence of implementation of alternative plans to ensure ongoing proficiency in WH care.
X	CBOC and PCC DWHPs were designated with the WH indicator in the PCMM.	We found that 22 of 27 DWHPs were not designated with the WH indicator in the PCMM.

## Recommendations

7. We recommended that clinical executive/primary care leaders ensure that CBOC/Primary Care Clinic Designated Women's Health Providers maintain proficiency as required for the provision of women's health care.

8. We recommended that the chief of staff consistently ensure that all Designated Women's Health Providers are designated with the women's health indicator in the Primary Care Management Module.

## CBOC Profiles

This review evaluates the quality of care provided to veterans at all of the CBOCs under the parent facility's oversight.<sup>3</sup> The table below provides information relative to each of the CBOCs.

Location	State	Station #	Locality <sup>5</sup>	CBOC Size <sup>6</sup>	Uniques <sup>4</sup>				Encounters <sup>4</sup>			
					MH <sup>7</sup>	PC <sup>8</sup>	Other <sup>9</sup>	All	MH <sup>7</sup>	PC <sup>8</sup>	Other <sup>9</sup>	All
Northwest Metro, Ramsey	MN	618GI	Rural	Large	940	4,376	5,849	7,443	5,701	9,282	20,174	35,157
Twin Ports, Superior	WI	618BY	Urban	Large	1,371	5,869	5,639	6,371	7,462	15,247	21,289	43,998
Rochester	MN	618GG	Urban	Mid-Size	803	3,842	1,364	4,129	3,574	7,422	3,086	14,082
Chippewa Valley, Chippewa Falls	WI	618GE	Urban	Mid-Size	645	3,835	1,178	4,059	4,496	8,259	2,709	15,464
Maplewood	MN	618GD	Urban	Mid-Size	444	3,617	1,266	3,861	2,058	6,459	3,426	11,943
South Central, St. James	MN	618GA	Urban	Mid-Size	654	3,507	1,482	3,673	3,441	9,457	3,162	16,060
Hayward	WI	618GH	Rural	Mid-Size	420	3,439	665	3,527	2,052	8,613	3,080	13,745
Hibbing	MN	618GB	Rural	Mid-Size	447	3,400	554	3,458	2,129	6,695	990	9,814

<sup>3</sup> Includes all CBOCs in operation before March 31, 2013.

<sup>4</sup> Unique patients and Total Encounters – Source: MedSAS outpatient files; completed outpatient appointments indicated by a valid stop code during the October 1, 2012, through September 30, 2013, timeframe at the specified CBOC.

<sup>5</sup> [http://vaww.pssg.med.va.gov/PSSG/DVDC/FY2013\\_Q1\\_VAST.xlsx](http://vaww.pssg.med.va.gov/PSSG/DVDC/FY2013_Q1_VAST.xlsx)

<sup>6</sup> Based on the number of unique patients seen as defined by VHA Handbook 1160.01, *Uniform Mental Health Services in VA Medical Centers and Clinics*, September 11, 2008, the size of the CBOC facility is categorized as very large (> 10,000), large (5,000-10,000), mid-size (1,500-5,000), or small (< 1,500).

<sup>7</sup> Mental Health includes stop codes in the 500 series, excluding 531 and 563, in the primary position.

<sup>8</sup> Primary Care includes the stop code list in the primary position: 323 – Primary Care; 322 – Women's Clinic; 348 – Primary Care Group; 350 – Geriatric Primary Care; 531 – MH Primary Care Team-Individual; 563 – MH Primary Care Team-Group; 170 – Home Based Primary Care (HBPC) Physician.

<sup>9</sup> All other non-Primary Care and non-MH stop codes in the primary position.

## CBOC Services Provided

In addition to primary care integrated with WH and MH care, the CBOCs provide various specialty care, ancillary, and tele-health services. The following table lists the services provided at each CBOC.<sup>10</sup>

CBOC	Specialty Care Services <sup>11</sup>	Ancillary Services <sup>12</sup>	Tele-Health Services <sup>13</sup>
Northwest Metro	Dental Ophthalmology Optometry Immunology	Audiology MOVE! Program <sup>14</sup> Electrocardiography Nutrition Pharmacy	Tele Primary Care
Twin Ports	Nephrology	Laboratory Pharmacy Audiology Electrocardiography	Tele Primary Care
Rochester	---	MOVE! Program Electrocardiography	Tele Primary Care
Chippewa Valley	---	MOVE! Program Social Work Electrocardiography	Tele Primary Care Tele Case Management
Maplewood	---	MOVE! Program Electrocardiography	Tele Primary Care
South Central	---	Electrocardiography	Tele Primary Care
Hayward	---	Electrocardiography MOVE! Program Social Work	---
Hibbing	---	---	Tele Primary Care

<sup>10</sup> Source: MedSAS outpatient files; the denoted Specialty Care and Ancillary Services are limited to Primary Clinic Stops with a count  $\geq 100$  encounters during the October 1, 2012, through September 30, 2013, timeframe at the specified CBOC.

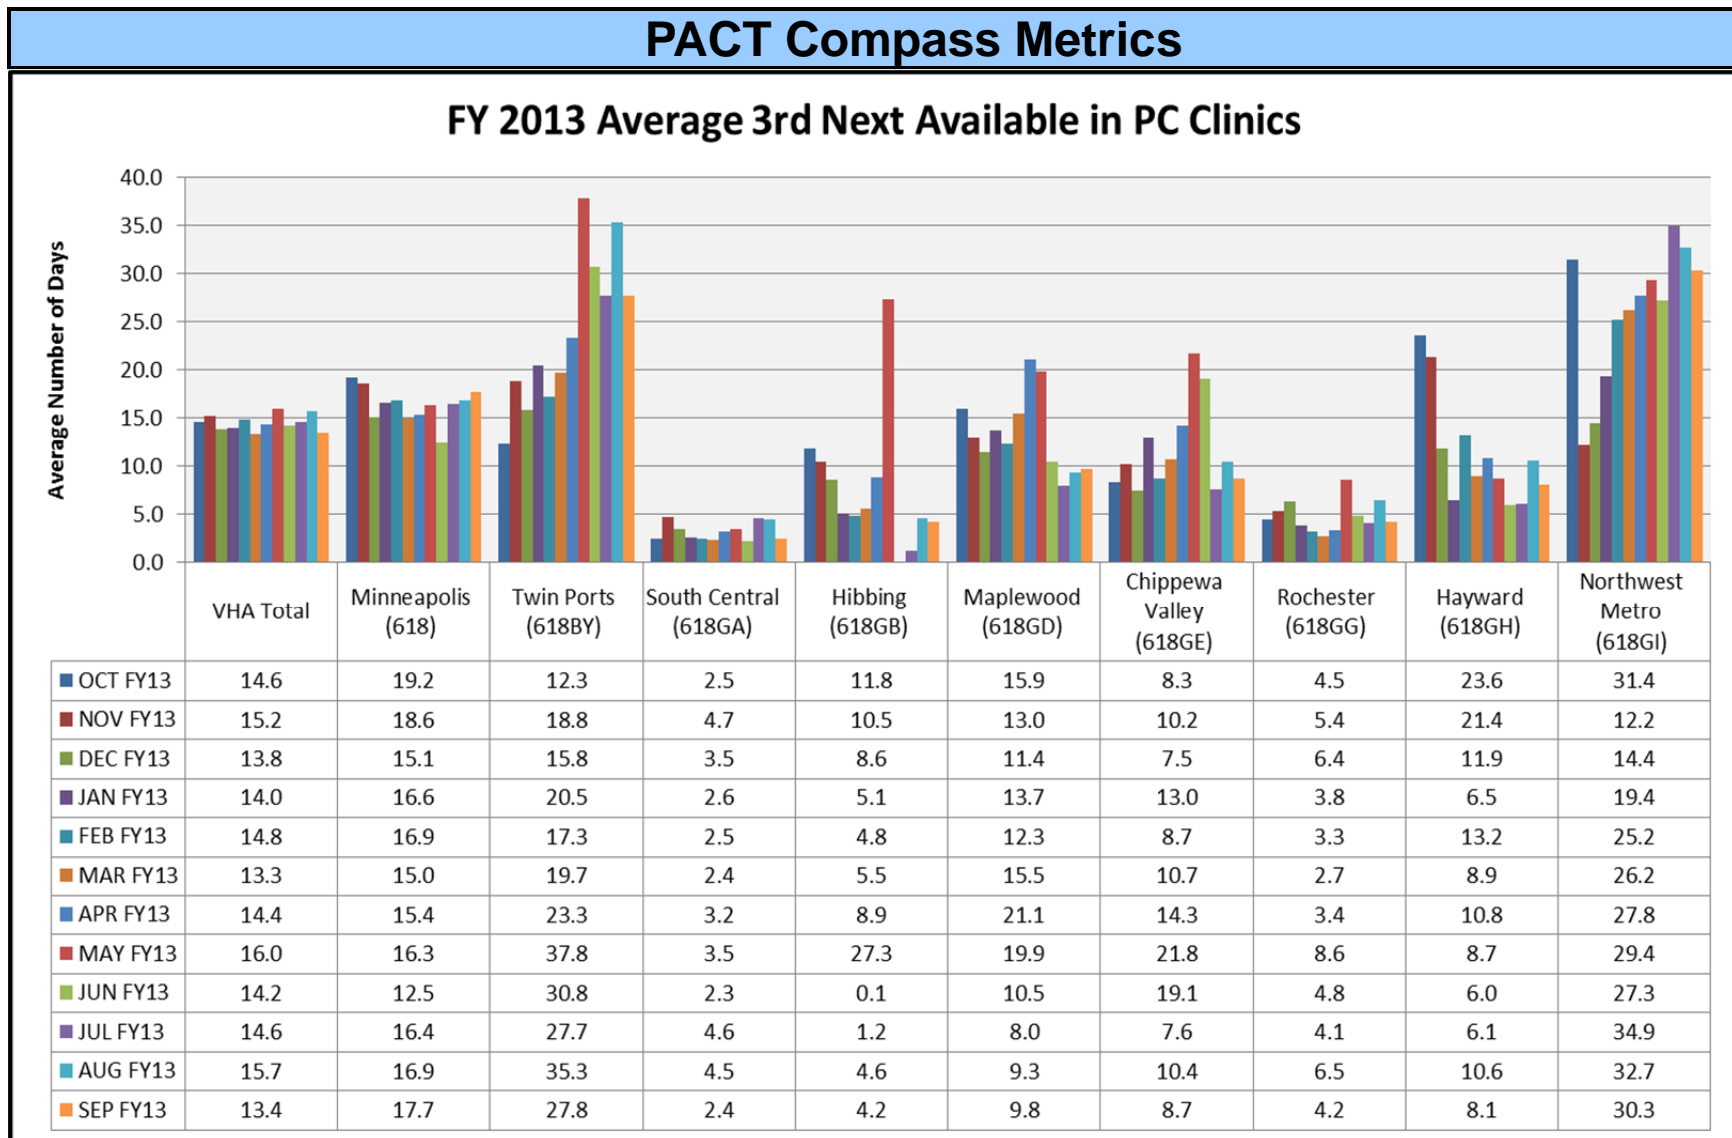

<sup>11</sup> Specialty Care Services refer to non-Primary Care and non-MH services provided by a physician.

<sup>12</sup> Ancillary Services refer to non-Primary Care and non-MH services that are not provided by a physician.

<sup>13</sup> Tele-Health Services refer to services provided under the VA Telehealth program (<http://www.telehealth.va.gov/>)

<sup>14</sup> VHA Handbook 1120.01, *MOVE! Weight Management Program for Veterans*, March 31, 2011.

**Data Definition.**<sup>e</sup> The average waiting time in days until the next third open appointment slot for completed primary care appointments in stop code 350. Completed appointments in stop code 350 for this metric include completed appointments where a 350 stop code is in the primary position on the appointment or one of the telephone stop codes is in the primary position, and 350 stop code is in the secondary position. The data is averaged from the national to the division level.

### FY 2013 Established PC Prospective Wait Times 7 Days

**Data Definition.**<sup>e</sup> This is a measure of where the patient receives his or her primary care and by whom. A low percentage is better. The formula is the total VHA ER/Urgent Care/FEE ER Encounters WOP (including FEE ER visits) *divided by* the number of primary care encounters WOP with the patient’s assigned primary care (or associate) provider plus the total VHA ER/Urgent Care/FEE ER Encounters (including FEE ER visits) WOP plus the number of primary care encounters WOP with a provider other than the patient’s PCP/AP.

**Data Definition.<sup>e</sup>** Total Discharges Included in 2-day Contact Post Discharge Ratio: The total VHA and FEE Inpatient Discharges for assigned primary care patients for the reporting timeframe. Discharges resulting in death and discharges where a patient is readmitted within 2 days of discharge are excluded from this metric.

## VISN Director Comments

**Department of  
Veterans Affairs**

**Memorandum**

**Date:** August 26, 2014

**From:** Director, VA Midwest Health Care Network (10N23)

**Subject:** **CBOC and PCC Reviews of the Minneapolis VA Health Care System, Minneapolis, MN**

**To:** Director, Denver Office of Healthcare Inspections (54DV)  
Director, Management Review Service (VHA 10AR MRS  
OIG CAP CBOC)

I have reviewed the report of the Community Based Outpatient Clinic and Primary Care Clinic Reviews at the Minneapolis VA Health Care System conducted July 21-31, 2014, in addition to the MVAHCS response and action plans. I concur with the facility response and action plans. Thank you for the opportunity to review this report.

Patrick J. Kelly, FACHE  
Director, Minneapolis VA Health Care System

## Comments to OIG's Report

The following Director's comments are submitted in response to the recommendations in the OIG report:

### **OIG Recommendations**

**Recommendation 1.** We recommended that CBOC/Primary Care Clinic staff provide education and counseling for patients with positive alcohol screens and drinking alcohol above National Institute on Alcohol Abuse and Alcoholism limits.

Concur

Target date for completion: March 31, 2015

Facility response: Clinical staff of the CBOC/Primary Care Clinics will receive education about providing education and counseling for patients with positive alcohol screens. Compliance with documentation of education and counseling provided to Veterans will be monitored through clinical reminder data and External Peer Review Program data, and will be reported to the Quality Management Council.

**Recommendation 2.** We recommended that CBOC/Primary Care Clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.

Concur

Target date for completion: March 31, 2015

Facility response: Clinical staff of the CBOC/Primary Care Clinics will receive education about documenting the offer of further treatment to patients diagnosed with alcohol dependence. Data will be monitored monthly of the percent of patients with a positive screen for whom there was documentation that an offer of further treatment was made, and will be reported to the Quality Management Council.

**Recommendation 3.** We recommended that managers ensure that patients with excessive persistent alcohol use receive brief treatment or are evaluated by a specialty provider within 2 weeks of the screening.

Concur

Target date for completion: March 31, 2015

Facility response: Clinical staff of the CBOC/Primary Care Clinics and Mental Health providers will receive education about providing brief treatment or evaluation by a specialty provider within 2 weeks of screening when the screening identifies that the patient has excessive persistent alcohol use. The percent of patients for whom there

was documentation that brief treatment or an evaluation by a specialty provider was completed when required will be monitored and reported to the Quality Management Council.

**Recommendation 4.** We recommended that CBOC/Primary Care Clinic Registered Nurse Care Managers receive motivational interviewing and health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Concur

Target date for completion: March 31, 2015

Facility response: All RN Case Managers will receive motivational interviewing and health coaching training within a year of assignment to a Patient Aligned Care Team (PACT), and new staff will receive this training as part of New Employee Orientation. Monthly education data will be reported to Chiefs of the Primary Care Clinics, RN Clinic Directors, and Primary Care Patient Service Line leaders, with the goal of maintaining compliance with training requirements as new staff are added to PACT teams.

**Recommendation 5.** We recommended that staff document that medication reconciliation was completed at each episode of care where the newly prescribed fluoroquinolone was administered, prescribed, or modified.

Concur

Target date for completion: December 31, 2014

Facility response: Staff will document medication reconciliation at each episode of care when prescribing, administering or modifying fluoroquinolone. Use of a Medication Reconciliation template to include this documentation has been reinforced via an education memorandum from the Chief of Staff on July 11, 2014. Audits of the medical record outpatient visits will be conducted to ensure that medication reconciliation is documented.

**Recommendation 6.** We recommended that staff provide medication counseling/education as required.

Concur

Target date for completion: December 31, 2014

Facility response: Physicians and pharmacists will provide medication counseling/education when new medications are prescribed or when medication orders are changed. Staff were educated in a memorandum from the Chief of Staff on July 11, 2014. A medication education template was revised on July 15, 2014 to ensure that proper medication counseling/education was completed and documented in the medical record. Audits of the medical record outpatient visits will be conducted to ensure that medication education is documented by physicians and pharmacists when required.

**Recommendation 7.** We recommended that clinical executive/primary care leaders ensure that CBOC/Primary Care Clinic Designated Women's Health Providers maintain proficiency as required for the provision of women's health care.

Concur

Target date for completion: December 31, 2014

Facility response: A "Women's Health Update" program was developed to ensure proficiency in providing women's health care, and will be offered on September 24-25, 2014 for all Designated Women's Health Providers (DWHP) and primary care providers who are interested in being designated as Women's Health Providers. Staff may submit documentation of an alternate training or experience in women's health to meet the proficiency requirements. To maintain proficiency going forward, DWHP who do not have 10% female patients in their panels will be required to provide documentation on an annual basis of continuing education or experience. Compliance will be tracked by the Women Veterans Program Manager and reported annually to the Women Veterans Advisory Committee.

**Recommendation 8.** We recommended that the chief of staff consistently ensure that all Designated Women's Health Providers are designated with the women's health indicator in the Primary Care Management Module.

Concur

Target date for completion: August 31, 2014

Facility response: In May 2014, all providers were accurately entered in the Primary Care Management Module (PCMM) as Designated Women's Health Providers (DWHP). Monthly reports will be submitted to the Women's Health Medical Director and the Chief of Staff demonstrating that the PCMM is kept up to date as changes occur, with all DWHP's correctly designated.
