

Materials

The homes are made of Compressed Earth Blocks made from soil mined on the Tribe's lands

A 100 % Tribal workforce produces up to 1900 compressed earth blocks (CEB) a day at a facility on the reservation. All of the block needed for one of our homes can be made in three days

Employment

A new home construction industry is being established on the reservation employing Crow Tribal members

Awe'-Itche Ashe'
Good Earth Lodges

Affordable Housing

Unique architectural designs combine modern passive solar strategies with culturally relevant forms

Each home site is carefully oriented with southern exposure, a specially designed foundation, and geothermal heat pumps to maximize energy efficiency
