Administration

October 16, 2014

Residential propane prices available

The average retail price for propane is \$2.30 per gallon, based on the U.S. Energy Information Administration's weekly residential heating fuel survey. Propane prices in the Midwest region, which has the most households that use propane, averaged \$1.89 a gallon. This is Marcela Rourk, with EIA, in Washington.

The EIA has expanded its propane price survey to include 14 more states located mostly in the South and the West. The survey now looks at propane prices in 38 states that contain 85% of the U.S. households that use propane as their main source of heating fuel.
