INTRODUCTION

The Purpose of This Report

The *American Recovery and Reinvestment Act* (ARRA) of 2009—Recipient and Agency Reported Data, 2009–2012 is a presentation of all data related to stimulus spending for some 275 federal programs. The data was collected from two sources: recipient quarterly reports for ARRA awards and the weekly Financial and Activity Reports from the 28 federal agencies that distributed ARRA awards. This document was prepared as reference material and as a resource for researchers, librarians, and others interested in the long-term historical impact of ARRA.

The Act

On February 17, 2009, in response to the worst domestic economic crisis since the Great Depression, President Barack Obama signed into law the American Recovery and Reinvestment Act, which had three primary goals:

- Create new jobs and save existing ones;
- Spur economic activity and invest in long-term growth; and
- Foster unprecedented levels of accountability and transparency in government.

The landmark legislation intended to achieve those goals by:

- Pumping \$840 billion into the economy via tax benefits, entitlements, and federal contract, grant, and loan awards; and
- Requiring recipients of ARRA funds to report quarterly on how they spent the money.

The Board

Section 1521 of ARRA established the Recovery Accountability and Transparency Board (the Board) “to coordinate and conduct oversight of covered funds to prevent fraud, waste, and abuse.” The Board’s twin missions of ensuring transparency and accountability of ARRA spending were designed specifically to reduce the risk of any illegal or inappropriate use of funds.

President Obama appointed Earl E. Devaney, then the Inspector General of the Department of the Interior, as Chairman of the Board of 12 Inspectors General. Mr. Devaney retired in December 2011 and Board member, Department of Education Inspector General Kathleen S. Tighe, was appointed his successor.

Data Reporting

Recipients of contract, grant, or loan awards were required by ARRA to submit detailed reports on their awards in the first 10 days following the end of each calendar quarter; the data was then to be displayed on Recovery.gov 30 days after the end of the quarter. The Office of Management and Budget (OMB) determined that recipients were to report for the first time beginning on October 1, 2009, for the period February 17, 2009, through September 30, 2009.

However, within the federal government, there was no data collection or reporting system that could handle the massive volume of information that was expected: OMB initially estimated that at least 40,000 and possibly as many as 250,000 reports would be filed. Moreover, the recipients would be reporting on 99 data elements, including:

- Award amounts and amounts received and expended;
- Descriptions of the awards;
- Jobs funded by the award; and
- The completion status of the award.

Due to the shortened time frame, the Board opted to create a centralized reporting system—FederalReporting.gov—instead of having each federal agency collect data from their individual recipients. For the first time, all data on federal contracts, grants, and loans would be collected in a single place.

Recovery.gov 2.0

Among the Board’s first tasks was the establishment of a public-facing, user-friendly website—Recovery.gov—to give the American taxpayers the ability to track all ARRA awards and expenditures. When Recovery.gov 1.0 went live on February 17, 2009, the data displayed was minimal and based only on what the agencies were reporting in the weekly Financial and Activity Reports. The Board reviewed the capabilities of Recovery.gov 1.0 and determined it was not adequately robust to display the expected amount of recipient data. In May 2009, the Board decided to rebuild Recovery.gov so the site would include, among other things, the ability to assimilate and display disparate data-sets from several sources.

The Board and its contractors had just four months to accomplish a project that would normally require 18 months or more. Designing, building, and testing of the new site occurred over many long hours to ensure that the site functioned without fail as soon as it went live. Recovery.gov 2.0 was launched on September 28, 2009, to meet the Board’s deadline for displaying the recipient data on October 30, 2009.

To make ARRA data more accessible and understandable for users, the Board has regularly implemented enhancements, including innovative mapping, interactive tools for making charts and graphs, widgets, and a mobile app.

Data Quality

After recipients of Recovery awards reported for the first time October 1, 2009, through October 10, 2009, the data was successfully posted on Recovery.gov on October 30, 2009. This first reporting period was marred only slightly by several data quality issues, of which the most publicized involved reports of ARRA money going to so-called “phantom congressional districts.” Many recipients did not know the congressional districts for the projects and as a

result, a small percentage of reports contained erroneous congressional districts. In response, an internal edit check was applied to FederalReporting.gov that prevented a recipient from choosing a congressional district that did not match the corresponding nine-digit zip code.

Also, in some cases recipients reported spending more money than they actually received. An additional edit check was added that prevented recipients from submitting reports until the expenditure information was corrected. The same kind of edit check was added for recipients who incorrectly or inadvertently reported that they had completed a project but had not yet received any Recovery funds.

Over the next reporting periods, the Board continued to add more functionality to the reporting process to improve data quality and make reporting easier for recipients. For example:

- **Bulk Uploads**—Added in response to many states and universities indicating that reporting individually on every award—in some cases, thousands—placed an inordinate burden on time and resources.
- **Linking Reports**—Allowed recipients to make changes or corrections to the previous quarters' report, and link the quarters' reports to avoid creating a duplicate report.
- **Copy Forward**—Added so that recipients could copy reports from the previous quarter into the current quarter's report and not have to re-enter information that had not changed.

To increase the data quality even further, the Board instituted the Automated Data Change Request Module, which allows recipients, agencies, OMB, and Board staff to request changes to reports submitted in quarters other than the most recent one.

Compliance with the reporting requirements has steadily increased. By the end of the fifth reporting period in October 2010, nearly 100 percent of all prime recipients had submitted reports with the quality of information improving as well. And the number of awards not reported on continued to drop—from more than 4,000 in October 2009 to less than 300 at the end of December 2012.

Lessons Learned

As recipients first began reporting in October 2009, the Board quickly discovered significant difficulty in trying to reconcile award identifiers assigned by agencies and the list of awards reported by recipients. The reason: there is no consistent system of unique identifier codes among agencies. As a memorandum issued in 2010 by the U.S. Department of Agriculture (USDA) Office of the Inspector General (OIG) stated, the lack of such a system “made it difficult for agencies and their respective OIGs to cross-check by matching the recipient-reported award numbers on FederalReporting.gov with the agency-reported

award numbers on the agencies' control lists.” The USDA OIG recommended to the Board that a “uniform, consistent government-wide award numbering system, in conjunction with the agencies, for all Recovery Act recipients” be established.

In 2012, the Board staff explored possible formats for a universal award identifier (UAID). The objective was to find the most-effective, least-invasive format. Based on its research, the Board staff targeted a 12-character UAID format that would allow for 28 million unique UAID numbers per agency, award type (grant, contract, loan), and fiscal year. The Board will continue to pursue development of a UAID.

Because of the success of centralized reporting for ARRA data, the Board initiated a project in 2012 to test centralized reporting of federal grants. In many instances, grantees have to submit hundreds of reports to multiple federal agencies, a requirement that creates an inordinate burden on resources. Utilizing the Board's technology and expertise, the Grants Reporting Information Project repurposed FederalReporting.gov to test the information-gathering mechanisms and determine whether grantees could centrally report on the multitude of awards. Initial results confirmed that centralized reporting of grants was feasible, that it would likely result in burden-reduction for both agencies and recipients, and that a government-wide universal identifier, or UAID, would improve data matching.

Conclusion

At the end of 2012, recipient data on more than 278,000 awards had been successfully collected and displayed on Recovery.gov for a total of 13 quarters. While ARRA did not specify an end date for the last reporting period for recipients of Recovery awards, the Act did mandate that the Board end its ARRA activities on September 30, 2013. Therefore, the Board will collect the recipient data for the last time in July 2013 and post the final data on Recovery.gov on July 30, 2013.

SUMMARY OF METHODOLOGY

Report Coverage

The tables in *The American Recovery and Reinvestment Act of 2009—Recipient and Agency Reported Data, 2009–2012* are derived from prime recipient reports for contracts, grants, and loans funded by the Recovery Act. Data from sub-recipients or vendors is not included. The data covers awards received between February 17, 2009, and December 31, 2012.

A federal contract is an award made directly to an independent recipient (not a state or government) by a federal agency. A federal grant is financial assistance awarded by a federal agency for a public project or service authorized by federal law. Grants are awarded to government and education organizations, for-profit and nonprofit organizations,

small businesses, and individuals on their own behalf through an application process. Federal loans are funds provided to a recipient by a federal agency and will eventually be paid back by the recipient. The federal government issues loans for a variety of purposes including paying for education, providing disaster relief, insuring mortgages, and assisting farmers and rural communities.

Source of Data

The recipient reported data was collected from the Download Center of Recovery.gov on March 20, 2013, to include cumulative data from February 17, 2009, through December 31, 2012. This dataset contained information submitted by award recipients via FederalReporting.gov. The Data Dictionary, located at www.recovery.gov/FAQ/OtherDLFiles/Download%20Center%20User%20Guide.pdf and in the CD-ROM version of this publication, provides the layout and content of the raw data file.

The data displayed on the charts and graphics related to the tax portion of the Recovery Act comes from the Office of Tax Analysis at the Department of the Treasury for taxes, which submitted final data as of June 2012. The Recovery Act entitlement data comes from the federal agencies' Financial and Activity Reports.

Table Descriptions and Special Notes

All the data displayed in the tables is from the recipient data reported cumulatively from February 17, 2009, through December 31, 2012. The "other" row at the end of Tables 1–10 refers to awards with places of performance outside the United States and its territories. While only U.S. nationals could apply to receive ARRA funds, the expending of the awards could take place internationally.

Table 1: Total Awards

ARRA awards by type (contract/grant/loan) and by geography. Data is rounded to the thousands.

Table 2: Awards by Awarding Agency

All ARRA awards by major awarding agency and geography. This table was created using the first two digits of the four-digit awarding agency code in the raw dataset. Awarding agencies that were not listed separately were rolled up into the "Other" column at the end of the table. This procedure was done for Tables 2–5. The list of agencies combined into the "Other" category includes:

- The Legislative Branch
- Government Accountability Office
- Dwight D. Eisenhower Memorial Commission
- Executive Office of the President
- United States Tax Court
- Federal Mediation and Conciliation Service
- State Justice Institute
- Railroad Retirement Board
- Overseas Private Investment Corporation

- Export-Import Bank of the United States
- U.S. Postal Inspection Service
- Other Independent/Small Agencies

Data is rounded to the thousands of dollars.

Table 3: Contracts by Awarding Agency

ARRA contracts by awarding agency and geography. This table lists only those federal agencies that awarded contracts; therefore, the columns included in this table may differ from those in Tables 2, 4, and 5. Data is rounded to the thousands of dollars.

Table 4: Grants by Awarding Agency

ARRA grants by awarding agency and geography. This table lists only those federal agencies that awarded grants; therefore, the columns included in this table may differ from those in Tables 2, 3, and 5. Data is rounded to the thousands of dollars.

Table 5: Loans by Awarding Agency

ARRA loans by awarding agency and geography. This table lists only those federal agencies that awarded loans; therefore, the columns included in this table may differ from those in Tables 2, 3, and 4. Data is rounded to the thousands of dollars.

Table 6: Award Summary by Congressional District

A summary of ARRA awards by congressional district. Included in the table are the awarded, received, and expended ARRA amounts by the recipients.

During the first reporting cycle in October 2009, recipients could enter invalid congressional districts. In the raw dataset, some of these records contain "ZZ" in the congressional district field. These "ZZ" congressional districts have been allocated to the reported state only in Table 6. As a result, the sum of the congressional districts in this table may not equal the state total.

This table is based on the congressional district boundaries of the 112th Congress. Data is rounded to the thousands of dollars.

Table 7: Awards by County

A summary of the ARRA awards by county. Recipients were not required to report the place of performance county; therefore, the county information used to create this table was derived from the street address and zip code + 4 of the place of performance as reported by the recipient. When the derived county data conflicted with an element of recipient reported data (state code, country code), we elected to use the recipient reported data and disregarded the derived county information. There were very few awards where this occurred (approximately 0.037 percent), however, there were instances of awards not being able to be placed into a specific county; therefore, the sum of the counties in Table 7 may not equal the state total.

The U.S. Resident Population information in this table is based on the 2012 population estimates from the U.S. Census Bureau. Monetary data is rounded to the thousands of dollars.

Table 8: Awards With Infrastructure Expenditures

ARRA awards with infrastructure expenditures by grant or loan, and geography. Infrastructure data was required of ARRA grant and loan recipients only. Monetary data is rounded to the thousands of dollars.

Table 9: Jobs by Quarter

Number of jobs reported by recipients for each quarter since October 2009. ARRA required that recipients report jobs “saved or created” by the Recovery award. Following the first reporting cycle in October 2009, OMB changed the definition to mean jobs “funded” by the ARRA award, regardless of whether the employee was an existing employee or newly hired. Recipients calculate the funded jobs in the following manner: if a normal full-time schedule is 40 hours a week, multiply 40 hours x 52 weeks = 2,080 total hours per year; divide 2,080 total hours by 4 to equal 520 regular quarterly hours. If two full-time employees each worked 520 hours (1,040 hours) for the quarter and another half-time employee worked 260 hours, the total hours for the three employees is 1,300 (520 + 520 + 260 = 1,300); divide 1,300 by 520 to equal 2.5 Recovery-funded jobs during that quarter. The results generally do not contain whole numbers.

For each quarter, recipients provided the total number of jobs funded by quarter. A job funded in one quarter may or may not be the same job that is funded in the next quarter. For that reason, this data should not be summed up into a cumulative total.

Table 10: Awards by North American Industry Classification System (NAICS) or National Taxonomy of Exempt Entities (NTEE)

ARRA awards by the NAICS sector or the NTEE core code. The NAICS is the standard used by federal statistical agencies to classify business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. The NTEE system is used by the Internal Revenue Service and National Center for Charitable Statistics to classify nonprofit organizations.

Recipients were allowed to enter up to ten different NAICS or NTEE codes when submitting quarterly reports. Eighty-five percent of recipients chose to enter only one code. Due to the relatively small percentage of those entering multiple codes and the difficulties factoring in multiple activity codes, Table 10 was created using only the first activity code the recipients entered. This was also the case for the data used to create Appendix 1.

Approximately 0.3 percent of recipients entered only a “supporting” NTEE code and did not provide the necessary core code to allow classification of their awards. Supporting

NTEE codes provide only target demographic or generic function information and do not provide a descriptive activity area. Awards with supporting codes only were allocated to the “unassigned” column in Table 10 and the “unassigned” row in Appendix 1. Data is rounded to the thousands of dollars.

Special Notes

There were two awards with a street address, city, and zip code that conflicted with the state code provided by the recipient. For those records, the state codes were changed from ND to MD and from CT to CA, respectively, to correspond to the rest of the information reported by the recipient. This affects Tables 1–10 of this publication.

There was one award with a street address, city, state, and zip code that conflicted with the country code provided by the recipient. For that record, the country code of GB was disregarded and the award was allocated based on the state code of WI. This affects Tables 1–10 of this publication.

Noncompliers

Quarterly reporting is mandatory for all prime recipients receiving ARRA awards. The rate of noncompliance since the first reporting period in October 2009 has been exceptionally low. In that first reporting period there were 130,000 awards reported on—4,359 awards that were not. In Quarter 4, 2012, the number of awards not reported on by recipients had dropped to 254, with only 11 award reports not submitted three or more times. At the end of each reporting period, the noncompliers list was posted on Recovery.gov.

Availability of the Data

A CD-ROM containing a copy of this publication, the raw data file, and the data dictionary is available upon request. Contact the Recovery Accountability and Transparency Board for a copy at 1717 Pennsylvania Avenue, NW, Suite 700, Washington, D.C., 20006.

An electronic version of this report is also available on Recovery.gov. Additionally, the raw data file used to create the recipient reported tables and figures in this publication can be accessed via an FTP site on the Recovery.gov website.

Copies of this report are available to the public through State Data Centers across the country. Users may contact their State Data Centers to determine if The American Recovery and Reinvestment Act of 2009—Recipient and Agency Reported Data 2009–2012 publication or the related CD-ROM data files are available.

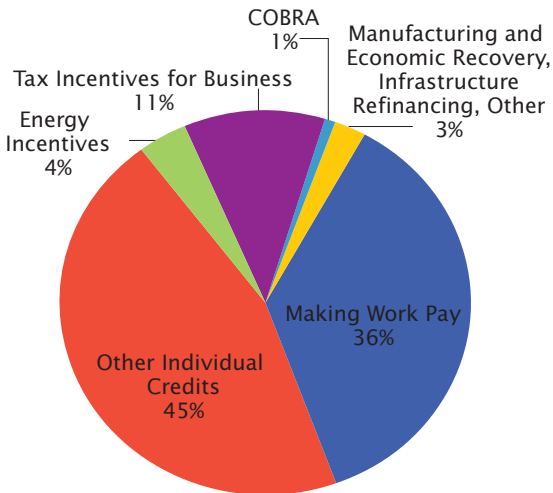

Meaning of Symbol

The following symbol may be defined as: – Represents or rounds to zero or represents not available.

ARRA Tax Benefits

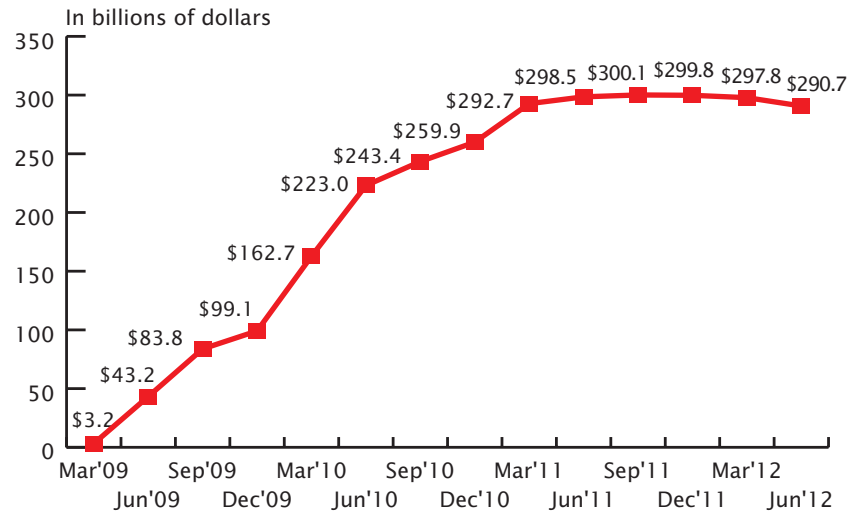

In addition to federal contract, grant, and loan awards and entitlements, Recovery funds are distributed through tax benefits for individuals, businesses, and state and local governments. The First-Time Homebuyers program, credits to businesses for renewable energy facilities, and Build America Bonds are several examples of these tax benefits. Most of the tax credits authorized under the Recovery Act have expired. The Office of Tax Analysis submitted final data as of June 2012.

Data Source: Office of Tax Analysis Estimates.

ARRA Entitlement Programs

In addition to federal contract, grant, and loan awards and tax benefits, Recovery funds are distributed through 22 entitlement programs—payments made directly to individuals. The chart below lists how much each entitlement program was estimated to receive:

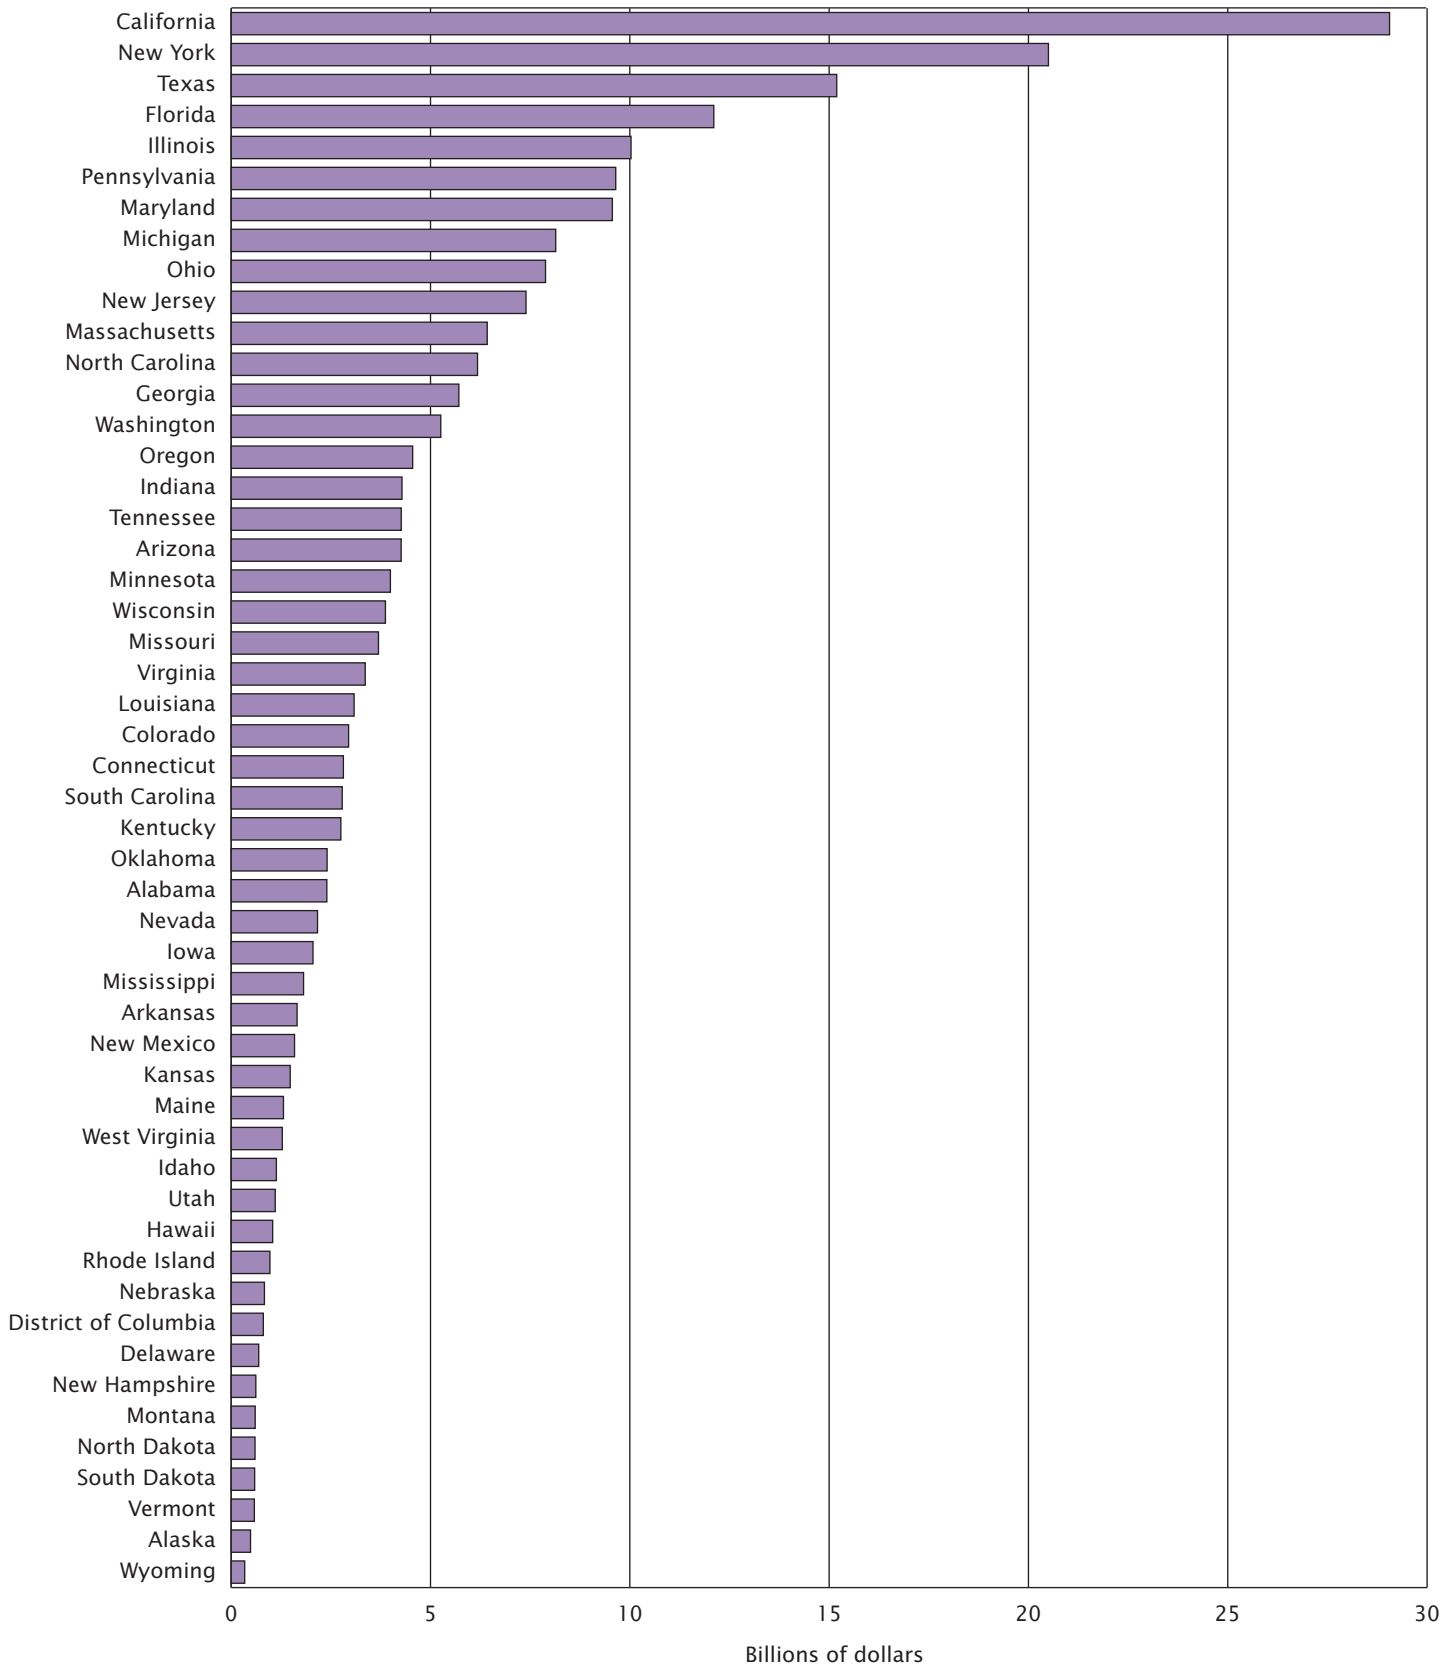

Exhibit 2.

ARRA Entitlement Programs

Entitlement Fund	Total Recovery Act Funds Received
Agricultural Disaster Relief Fund	\$828,963,050
Aquaculture Assistance	\$39,698,012
Bonneville Power Administration Fund	\$1,125,211,665
Compensation and Pensions	\$465,679,312
Economic Recovery Payments	\$13,343,868,912
Emergency Contingency Fund for State Temporary Assistance for Needy Families	\$4,822,957,659
Federal Additional Unemployment Compensation Program	\$14,101,270,826
Food Stamp Program	\$37,772,436,546
Grants for Specified Energy Property in Lieu of Tax Credits	\$16,222,056,213
Grants to States for Low-Income Housing Projects in Lieu of Low-Income Tax Credits	\$5,647,986,683
Grants to States for Medicaid	\$92,063,360,819
Medicaid—General Department Management	\$4,991,100
Medicare—Program Management	\$400,097,528
Medicare HITECH Incentive Payments	\$6,336,213,421
Payment to States for Foster Care and Adoption Assistance	\$881,677,103
Payments to States for Child Support Enforcement and Family Support	\$1,815,125,642
Payments to the Unemployment Trust Fund	\$37,293,345,165
Railroad Unemployment Insurance Extended Benefit Payments	\$10,467,082
Temporary Assistance for Needy Families	\$319,450,226
Trade Adjustment Assistance for Farmers	\$127,174,344
Unemployment Trust Fund	\$10,856,274,112
Western Area Power Administration	\$267,625,848

Note: Expenditure amounts can be greater than the amount received/invoiced because in some cases, the recipient is using their own or matching funds to make payments.

State totals may be greater than the sum of listed congressional district amounts due to unassigned awards. For additional information, see the Summary of Methodology section in this report.

FEATURED STORIES

2012

To tell the story of Recovery Act funding, features on new medical centers, cleaning up nuclear waste sites, rebuilding the electric grid, research and development projects, Inspectors General reports, scam alerts, and arrests and indictments were all accessed from the home page on Recovery.gov.

2012 Featured Stories

Visitor Center Rehabs Funded by Recovery

01-11-2012

Using \$750 million in Recovery funding, the Department of the Interior's National Park Service is underwriting approximately 800 different maintenance and rehab projects at nearly 400 national parks and monuments around the country. The Department of Agriculture's National Forest Service similarly received \$63 million for improvements needed at some visitor centers, which serve as information hubs for respective national forests and parks.

Furnace Creek Visitor Center—Death Valley National Park, California

The same heating and cooling units originally installed 50 years ago when this visitor center was built were barely operating when officials began renovations in November 2010. Insulation in the brick walls and single-pane windows had decayed and no longer kept out the summer heat or winter cold.

Improvements funded by \$1.1 million of Recovery contracts include new solar panels, wall and ceiling insulation, thermopane windows, and energy efficient HVAC systems, all of which are expected to reduce the center's energy bill by as much as \$14,000 a year.

Quarry Visitor Center and Quarry Exhibit Hall—Dinosaur National Monument, Colorado

The Dinosaur National Monument in southern Colorado received \$13.1 million to rehab two ageing facilities, the Quarry Visitor Center and Quarry Exhibit Hall. Both structures are located at the world-renowned Carnegie Quarry, which contains almost 1,500 dinosaur bones dating back 149 million years to the Jurassic Period. Exhibits will be updated, and a new introductory film incorporating recently learned information and facts about Death Valley is being made.

Deferred maintenance had caused both facilities to fall into disrepair, even requiring partial demolition of the visitor center. According to a 2008 Department of the Interior Inspector General report, the facilities were "literally falling apart." But after 18 months of renovation work, the two buildings recently reopened.

The 7,600-square-foot Quarry Visitor Center includes a theater and a bookstore. The 10,500-square-foot, steel-and-glass Quarry Exhibit Hall is built into a cliff face that has dinosaur bones embedded in the rock, creating the extremely popular "Fossil Wall." The facility includes exhibits and displays about dinosaurs and other life from the Jurassic era.

Mendenhall Glacier Visitor Center—Tongass National Forest, Alaska

Opening in 1962, the Mendenhall Glacier Visitor Center in the Tongass National Forest near Juneau was the first visitor center built by the National Forest Service. Recently renovated with \$1.6 million in Recovery funds, the facility's improvements include upgrades to audio-visual equipment and interpretive displays as well as the installation of energy-efficient lighting and climate-control systems.

Also, portions of nearby trails were rerouted to meet accessibility standards with a ramp and observation platform.

The Mendenhall Center attracts more than 400,000 visitors each year.

Mendenhall Glacier Visitor Center—Tongass National Forest, Alaska

Weatherization Program Beats Deadline

01-18-2012

The Department of Energy (DOE) completed weatherizing more than 600,000 low income homes three months ahead of schedule.

With \$5 billion in Recovery money to add to its ongoing Weatherization Assistance Program, DOE focused on quickly reducing energy waste in low income homes by installing upgrades such as insulation, air-sealing, and more efficient heating and cooling systems. The goal was to weatherize 607,000 homes by March 2012.

DOE announced it had reached that goal in December 2011.

“On average, the program reduces energy consumption for low-income families by up to 35 percent, saving them more than \$400 on their heating and cooling bills in the first year alone,” the DOE said. “Nationwide, the weatherization of

600,000 homes is estimated to save more than \$320 million in energy costs in just the first year.”

Estimates from an Oak Ridge National Laboratory study in March 2010 projected that energy savings will likely exceed the program’s costs.

The extra Recovery funding significantly expanded and accelerated DOE weatherization activity. For example:

- 30,500 Wisconsin homes weatherized; Recovery funds covered costs for 21,600
- 16,000 Washington homes weatherized; Recovery funds covered costs for 12,300
- 6,800 Montana homes weatherized; Recovery funds covered costs for 3,300

Possible Identity Theft Scam in Atlanta

01-18-2012

Local authorities in Atlanta have warned area senior citizens to beware a possible identify theft scam purporting to be part of the stimulus program.

Officials of Fulton County put out the alert after seeing application forms to receive a \$500 check from the federal government under the “American Opportunities Stimulus Money” program. No such program exists.

The forms were being handed out to senior citizens outside the Atlanta office of the Reverend Al Sharpton’s National Action Network, according to local news reports. National

Action Network said it was not associated with the application or with the two people who were distributing copies to senior citizens.

The form instructs applicants to provide name, address, date of birth, and Social Security number to receive a \$500 check. While authorities have not yet found any evidence that identities were stolen, they have warned against filling out the forms.

Recovery Funds Remove and Secure Nuclear Waste

01-31-2012

Workers completed the last phase of nuclear waste cleanup at the Nuclear Radiation Development site near Grand Island, New York, and at Lawrence Berkeley National Laboratory in Berkeley, California.

Last summer a total of four truckloads—three from Nuclear Radiation Development, one from Berkeley—of soil, sludge, tools, rags, and protective clothing contaminated with radioactive elements was driven to a Department of Energy (DOE) disposal site outside Carlsbad, New Mexico. Encased in steel drums, the waste was then placed in storage facilities more than 2,000 feet below ground. Costs were covered by \$172 million in Recovery funding.

About the same time, DOE and Savannah River Nuclear Solutions supervised the sealing of two decommissioned reactors at the historic Savannah River Site in South Carolina. During the 1950s, the site played a leading role in nuclear weapons manufacturing that produced tritium and plutonium-239. The sealed reactors were the two oldest of five decommissioned reactors on the site. The remaining three will be sealed at a later date.

Before the doors of one reactor were welded shut, officials placed inside a time capsule containing items depicting

the history of the site and showing current events in the region and the nation. Items ranged from documents recording the decommissioning process for the reactors to a copy of People magazine featuring the royal wedding in Britain.

The two reactors are expected to stay in their present states for 1,400 years.

Since the 1990s, the DOE has been working to treat and remove contamination on the 310-square-mile Savannah River site. Recovery funds totaling \$1.6 billion are allowing DOE to accelerate the Savannah River site efforts.

Workers seal one of the reactor doors.

Electric Grid Gets Smart

02-08-2012

Per a provision in the Recovery Act, the Department of Energy (DOE) has begun the long process of modernizing the nation's 110-year-old electric grid. Expected to take possibly two decades to complete, the building of the so-called "Smart Grid" is a federal government partnership with utility companies, which are adding approximately \$5 billion for the initial phase to DOE's \$4.5 billion.

The effort will essentially computerize the current electric grid and install digital communication systems among grid components so that electricity can be delivered much more efficiently, collectively saving consumers and businesses billions of dollars over the next 20 years, officials say.

Today's Grid

The current grid, which dates back to the 1890s, is powered mainly by fossil-fuel-burning generating stations and consists of networks of substations, transformers, wires, and

switches. It relies heavily on meter and voltage readers and repair personnel to gather data needed to provide electricity.

Tomorrow's Grid

One key feature of the Smart Grid will be in-home/office Smart Meters: digital devices that will communicate directly with a utility's operations center. Among many other capabilities, Smart Meters will let consumers know how much electricity they're using at any moment and what the cost is. Other components, like transformers and substations, will similarly communicate with the utility. In addition, the Smart Grid will include more sources of renewable energy, such as solar and wind power.

Some of the benefits officials predict besides saving money:

- Fewer/shorter power outages
- Reduced peak demand

Electric Grid Gets Smart

- Increased integration of large-scale renewable energy systems
- Better integration of customer-owned power generation systems

Two Programs

Smart Grid Investment Grant (SGIG) and Smart Grid Demonstration Program (SGDP) are DOE's programs for

the initial phase. To date, SGIG has paid out \$3.4 billion for 99 projects and SGDP \$600 million for 32 projects, respectively.

SGIG focuses on deploying existing smart grid technologies, tools, and techniques to improve grid performance today. SGDP explores advanced smart grid and energy storage systems and evaluates performance for future applications.

Lessons Learned From the Recovery Act

02-15-2012

After conducting more than 70 reviews, investigations, and evaluations of Recovery programs and activities, the Department of Energy's (DOE) Inspector General (IG) Gregory H. Friedman has identified multiple successes and failures that collectively constitute a "teachable moment" for the way the agency conducts future business.

In a recent special report that reviewed the findings of all the previous Recovery-related reports to date, the DOE IG noted that the lessons learned could be applied to all of the DOE's programs, not just those involving the economic stimulus.

Positive findings:

- DOE Recovery program managers took extra care to minimize financial and operational risks.
- Program officials developed and implemented new practices to aid in the accounting and reporting for Recovery Act activities.
- Managers acted quickly to hire and/or reallocate employees to administer and monitor Recovery Act activities.
- Many actions carried out by agency managers were the result of proactive, anticipatory efforts.

Friedman noted that some successes could have been stronger had agency managers taken further actions. In addition, certain problem areas existed.

Issues of concern:

- Early on, DOE did not determine whether existing IT systems would be able to process the increased data associated with Recovery Act programs.
- Workload assignments were not always distributed evenly or reasonably among employees.
- DOE didn't always inform the public as effectively or fully as possible about what to expect from certain programs, such as the Weatherization Assistance Program.

"In our view, the Recovery Act and its implementation and execution by the Department, both the positives and the negatives, represent an important 'teachable moment' which should be used to inform and aid in the ongoing transition to a post-Recovery Act environment," the special report concluded. "Of even greater importance, the issues raised can be utilized by all programs and sites to enhance Department operational effectiveness going forward."

Major Medical Center Expands in Kentucky

03-14-2012

An award-winning hospital serving rural Kentucky is undergoing a needed expansion funded by a \$44.6 million Recovery loan from the Department of Agriculture.

Pikeville Medical Center—located in Pike County, among the state’s most poverty-stricken—is adding a new medical office building and a parking garage. In addition to providing examining rooms and offices for 23 primary- and specialty-care physicians, the 113,000-square-foot building will house outpatient surgery, endoscopy, and surgical support. The seven-story garage, with enough space for 1,000 vehicles, will be adjacent to the building.

While Pikeville Medical Center directly serves a local population of 68,000 in Eastern Kentucky, numerous rural communities within a 50-mile radius of the facility, including some in Virginia and West Virginia, have increasingly relied on its services, according to Pikeville city officials. Parking is a problem, as currently available spaces are filled up daily.

Noting that Pikeville Medical Center was named 2009’s “National Hospital of the Year” by the American Alliance of Healthcare Providers—beating out 400 other entities, including the Mayo Clinic, Johns Hopkins Hospital, Cedars-Sinai Medical Center, the Cleveland Clinic, Duke University Medical Center, and Vanderbilt University—officials also say

that the expansion will allow the center to offer its high quality care to even greater numbers of people.

“This project is a prime example of [Recovery] monies being utilized for much-needed healthcare facility expansion in an economically depressed region of Eastern Kentucky and Appalachia,” said Tom Fern, State Director for Rural Development in Kentucky.

Project officials expect the new facilities, currently less than 50 percent completed, will be ready to open by December 2013.

Pikeville Medical Center added a new medical office building and garage.

Busy Colorado Springs Road Gets Widened

03-21-2012

With the help of \$35 million in Recovery funds, Colorado state transportation officials were able to recently complete the first phase of a long-planned improvement to a heavily trafficked stretch of roadway in Colorado Springs.

Recovery funds from the Federal Highway Administration (FHWA) accounted for the majority of the total \$42.5 million required for Phase I of the Woodmen Road Corridor project. Phase I constructed a new interchange at Woodmen Road and Academy Boulevard, two of Colorado Springs’ busiest streets, serving an estimated 126,900 daily drivers combined. Woodmen Road between I-25 and Bell Drive was also widened from four to six lanes for 1.5 miles, and new bike lanes and sidewalks were added.

Phase I was completed 34 days ahead of schedule. “Key to the success was the participation of neighborhoods and businesses along the corridor,” city officials said. “Neighborhood and business leaders partnered with the city, the engineers and designers, and the contractor to ensure a smooth flow of information and to make adjustments to lessen construction impacts.”

Subsequent phases will ultimately improve the total 11-mile length of the Woodmen Road Corridor. Colorado Springs officials have been planning the improvement since the 1980s but were not able to begin construction until September 2009, after receiving the Recovery funds.

Overview of Recovery Act Loans

03-28-2012

While fewer in number than the more than 100,000 Recovery contracts and grants, the nearly 1,900 Recovery loan awards play a key role in some agencies' Recovery programs. In particular, loans are central to Recovery initiatives at the Department of Agriculture, Department of Energy, Department of Housing and Urban Development, and the Small Business Administration.

The federal government has long offered guaranteed and direct loans to individuals and businesses. Under the Recovery Act, agencies received additional funding to make federal guaranteed and direct lending more robust during the economic recession.

The total number and value of Recovery loans to date: 1,879 for \$15 billion; the majority are for direct loans.

Guaranteed Loans

If borrowers can't qualify for standard bank loans, they can apply for federally guaranteed loans. The government normally agrees to guarantee 80 percent of such a loan,

the bank assuming 20 percent risk. But in some cases the government will guarantee as much as 100 percent.

Borrowers apply through a bank that has been approved by federal agencies to handle guaranteed loans; the bank in turn works directly with the relevant agency—say, the Department of Agriculture to manage a loan to buy farming equipment.

If the agency deems the applicant eligible, the agency then essentially cosigns the loan. Should the borrower default, the agency covers the previously agreed-upon amount of the outstanding balance.

Direct Loans

Almost all direct loans are student loans paid by the Department of Education to a particular educational institution for tuition and related costs. But other federal agencies, such as the Department of Energy, have also awarded Recovery funded direct loans to businesses and organizations. Recipients of direct loans are required to repay their loans with interest.

Preventing Homelessness

03-28-2012

According to the Department of Housing and Urban Development (HUD), the Homelessness Prevention and Rapid Re-Housing Program (HPRP) created by the Recovery Act has helped keep at least one million people from becoming homeless during the economic downturn.

The program received \$1.5 billion in Recovery funds, which HUD awarded to state, county, and city governments.

HPRP marks the first time that such a large amount of federal funds has been available for homelessness prevention at the national level. As required by the Recovery Act, the funds must all be spent by September 2012. But HUD notes that many communities across the country that have benefited from HPRP are planning to continue the strategies and approaches that the program has proved to be effective.

Breakdown of HPRP Funding

ACTIVITY	FUNDING LEVEL
Direct financial assistance, such as rental assistance, utility payments, etc.	\$820,875,000
Housing relocation and stabilization services	\$447,750,000
Data collection and evaluation by grantees	\$149,250,000
Grantee administrative costs	\$74,625,000
HUD will provide training, technical assistance, monitoring, enforcement, research and evaluation activities	\$7,500,000
TOTAL	\$1,500,000,000

2012 Featured Stories—Cont.

USDA Recovery Awards Fund Rural Projects

04-11-2012

While hundreds of millions of Recovery dollars have been awarded to big projects in major cities, a range of lesser amounts has been awarded to rural or out-of-the-way places across the country. The U.S. Department of Agriculture in particular has issued such awards to fund projects. Here are five.

New Hospital in Nebraska

With help from a \$12.6 million Recovery loan from USDA's Rural Development Community Facility Direct Loan program, officials in Geneva, Nebraska built a new hospital in Fillmore County (below). The facility—total cost of \$18.5 million—covers more than 56,000 square feet, including almost

8,500 square feet of medical office space and will provide care to the roughly 6,600 people in the area. The terms of the Recovery loan: 40 years at a 4 percent interest rate.

New Saw Mill in Idaho

Emerald Forest Products, Inc., was able to complete construction of a saw mill in Emmett, Idaho, thanks to a \$4 million grant. The company invested \$6 million into the overall \$10 million project but needed the Recovery grant for the final phase. Now operational, the mill is the only one

within a 140-mile radius and is expected to play a major role in supplying construction material for the Treasure Valley area. The mill will also serve as a backup fuel source for a proposed biomass power plant scheduled to be built in the vicinity.

Trail Maintenance in the Southwest

Funded by a \$400,000 grant from the Forest Service, crews have been working on more than 26,000 linear feet of trails throughout the Coronado National Forest. Much of the work has concentrated on eliminating invasive grasses that pose wildfire hazards throughout the region, including the Santa Catalina, Douglas, Nogales, Sierra Vista, and Safford Ranger districts. Project officials expect the crews to complete work by the end of this spring.

New Public Recreation Cabin in Alaska

USDA awarded a \$158,000 Recovery contract to Channel Construction of Alaska to build a new public recreation cabin in the village of Hoonah in the southeastern part of the state. Furnished with a stove, table, benches, bunks, and featuring a full loft, the completed cabin meets Americans With Disabilities Act requirements and is available to Hoonah's 850 residents. The cabin was built in central Hoonah and then transported via barge to its nearby location along the Eight Fathom Bight shoreline.

A Loan Fund in Kansas

USDA awarded a Recovery-funded Rural Business Enterprise Grant for \$95,000 to establish a revolving loan fund for small and emerging businesses in Cherryvale, Kansas. Loans of up to \$25,000 at below-market financing rates will be available so that owners can either improve their existing businesses or develop new ones. Local officials are hoping the loans will increase both the quality and number of businesses—mostly storefront commerce—throughout the Cherryvale area.

Staying Ahead of Dangerous Weather

04-23-2012

Recovery funds have underwritten research that is expected to improve predictions of violent weather, including the kinds of powerful tornadoes that have devastated parts of the U.S. recently. The Department of Commerce and the National Science Foundation have awarded nearly \$7.4

million total to strengthen protections against all kinds of severe storms.

Better Forecasting and Analyses

Despite having extensive knowledge of the major forces and dynamics of

severe weather, meteorologists have difficulty forecasting quickly and precisely the intensity of heavy thunderstorms and associated tornadoes and floods. Detailed forecasts

issued with enough lead time would help focus warnings more narrowly and prompt faster defensive actions. A \$416,000 grant from the National Science Foundation to Atmospheric & Environmental Research, Inc. of Lexington, Massachusetts, is paying for studies to identify the smallest initial atmospheric changes or disturbances that eventually lead to the most severe weather.

Better Radar

The Department of Commerce awarded a \$6.9 million Recovery contract to L-3 Services, Inc. of Norman, Oklahoma to enhance capabilities of the existing weather radar system used by the National Weather Service of the National Oceanic and Atmospheric Administration. Modifications to existing hardware and software will enable the system to gather meteorological data with greater thoroughness and speed. Among the expected benefits are increased accuracy of forecasts of precipitation, more detailed detection of rain-snow lines, and improved detection of tornadoes and flash floods.

FCC Wraps Up Recovery Awards

05-02-2012

The Federal Communications Commission (FCC) recently completed all of its Recovery funded projects, comprising a total 160 Recovery awards and approximately \$90 million.

FCC Recovery activities were focused on three overall programs: the national conversion to digital television, the development of the National Broadband Plan, and the making of the National Broadband Map. On all three programs, the FCC either collaborated or coordinated with the National Telecommunications and Information Administration (NTIA).

Digital Television Conversion

The FCC helped prepare the public for the end of analog broadcasting and the transition to all-digital broadcasting, which occurred in June 2009. The FCC concentrated on outreach/assistance efforts leading up to and after the transition. More than \$60 million of Recovery contracts were awarded and paid out to 90 vendors.

National Broadband Plan

In partnership with NTIA, the FCC awarded and paid out \$13 million in Recovery funds to about 40 vendors to help develop a national plan for expanding broadband to areas currently not served or underserved with high-speed access.

National Broadband Map

The FCC and NTIA teamed with all 50 states, 5 territories, and the District of Columbia to build an interactive map allowing users to view the extent of broadband availability across the United States. Slightly less than \$15 million in Recovery money paid for development of the map, which was published on the NTIA website in February 2011. It is updated every six months.

The FCC is the second federal agency to complete its Recovery awards; the Smithsonian Institution completed its awards in June 2011.

A Step Closer to Answers on Autism

05-09-2012

Potentially groundbreaking research showing that a child's chance of developing autism is related to the age of a father was funded in part by a Recovery grant from the National Institutes of Health (NIH).

The nearly \$4.2 million grant from NIH's National Institute of Mental Health was awarded to a team of researchers at the Harvard/MIT Broad Institute, Yale University, and the University of Washington, Seattle.

While research has repeatedly and conclusively determined that variations in DNA passed from parent to child play a substantial role in causing autism spectrum disorders (ASD), previous efforts to pinpoint the genetic factors met with limited success. The team receiving the grant formed

an unprecedented partnership between experts at DNA sequencing facilities and researchers focused on the genetics of autism. All team members worked together using major new advances in DNA sequencing technology.

As a result, scientists were able to isolate for the first time specific genetic mutations or glitches that are passed from fathers and dramatically increase the likelihood a child will develop some type of ASD. Moreover, the research showed that as a man ages, particularly after 35, the number of such genetic glitches he transmits rises.

The research findings were published in an April 2012 issue of the international science journal *Nature*.

New Deal Buildings Get Recovery Help

05-16-2012

Among the thousands of Recovery funded renovation or rehabilitation projects, a handful involve the careful repair of historic structures dating back to the era of the New Deal and its two key initiatives—the Works Progress Administration (WPA) and the Civilian Conservation Corps (CCC). Both programs employed many skilled artisans and craftspeople as well as unskilled labor. Often the projects bore distinct touches and characteristics.

Timberline Lodge—Mt. Hood National Forest, Oregon

Acting on advice from local authorities and residents in 1936, an Oregon representative of the CCC enlisted the backing of the USDA Forest Service to build a ski lodge on Mt. Hood. The CCC-led project hired hundreds of area carpenters and masons, who primarily used wood and stone found on the mountain to build the lodge in 15 months. Some interior walls included tile mosaics and wood-carved scenes of area wildlife. President Franklin D. Roosevelt dedicated the lodge upon its opening in 1937.

Now a National Historic Monument, Timberline Lodge needed its original windows replaced and new insulation. While new energy efficient panes were installed, the trim had to match the original surrounding rustic, hand-hewn beams, requiring the expertise of veteran carpenters, glaziers, and wood carvers. Also, the two main exterior doors were replaced with new doors crafted by a woodworker.

The work was paid for with approximately \$190,000 in Recovery funds from the Forest Service.

Cobble Shelter—Tongass National Forest, Alaska

The CCC also built this shelter, in 1937, as part of the Mendenhall Glacier Visitor Center in Tongass National Forest in Juneau. The shelter was essentially a stop along the forest's Trail of Time where visitors could sign a log book or registry

and get a good view for taking pictures of the glacier. Over time, however, the glacier retreated and the shelter fell into disrepair. The Forest Service awarded a total \$2 million for improvements and repairs to the Mendenhall Glacier Visitor Center and its facilities, including the Cobble Shelter, which needed overgrown vegetation cleared from around it and replacement of some rotted wood. Work was completed in June 2010.

Public Schools—Boise and Homedale, Idaho

Among the numerous public buildings and facilities the WPA constructed throughout the 1930s and into the early 1940s were public schools, three of which were built in

New Deal Buildings Get Recovery Help

Idaho—one in Boise, two in Homedale. All three—Homedale High and Middle Schools, and Boise’s North Junior High—were among state schools benefitting from a \$17 million Recovery Act grant from the Department of Energy to repair and/or upgrade heating, ventilation, and air conditioning systems.

Homedale Middle School in Homedale, Idaho benefits from a Recovery grant to repair or upgrade its HVAC system.

Seven Indictments on Recovery Fraud

05-23-2012

Law enforcement authorities have conducted 464 prosecutions involving alleged fraud of stimulus funds since the Recovery Act was signed into law in February 2009. Recently, six individuals and one corporation were indicted with defrauding the U.S. government of almost \$1 million of Recovery money.

The defendants include a corporate CEO and a Salvation Army case worker. All investigations involved the relevant Office of Inspector General (OIG) working jointly with state, local, or other federal authorities in different locations.

Guam

In January 2010, HUBTEC International Corporation received a contract from the Department of Transportation (DOT) for \$1.8 million—\$1.4 million of which was Recovery Act funds—to reconstruct and rehabilitate culverts along Guam’s Route 2. The contract stipulated that HUBTEC comply with the Buy America requirement that all steel and iron used in the project be manufactured in the United States.

But DOT IG investigators working together with the Federal Bureau of Investigation concluded that HUBTEC and its CEO and project manager, Young C. Kim, falsely represented that the company had used U.S.-made reinforcement steel bars for the project, when they had knowingly used Korean-made reinforcement steel bars.

Moreover, investigators said they uncovered evidence of a fraudulent billing scheme with Kim allegedly submitting inflated invoices for material to DOT. According to DOT IG, “The overall loss to the government is estimated to be \$913,277.79.”

On April 25, 2012, a federal grand jury indicted HUBTEC and Kim on multiple counts of fraud.

Texas

A county official and a case manager for the Salvation Army were also indicted in April for felony theft of Recovery Act money intended to help prevent homelessness. The Texas Attorney General’s Office said that Felecia Gonzalez, a county coordinator for the Community Council of South Texas, and Channan Cardella, a case manager at the Salvation Army, were charged with “defrauding a federal program that was intended to serve financially-challenged families and prevent homelessness. Rather than helping the poor, the defendants allegedly orchestrated a scheme to divert taxpayer dollars into their own pocketbooks.”

Gonzalez and Cardella were employed by local nonprofit agencies that help needy people obtain funds from a federal grant assisting near-homeless individuals and families secure an apartment. According to investigators with the Department of Housing and Urban Development Inspector General, Gonzalez and Cardella created phony grant applications using actual applicants’ names, dates of birth, and Social Security numbers.

The defendants then hired third parties to pose as landlords who received the federal grant funds from the forged applications, authorities said. The “landlords” and the defendants allegedly divided and kept the money for themselves. Investigators estimate the scheme defrauded taxpayers of approximately \$40,000.

Florida

Three Florida residents were indicted separately on the same charges—fraudulently obtaining unemployment insurance payments from a Recovery-funded program. According to U.S. Attorney Robert E. O’Neill, defendants Roseland Redding, Nicole Cannon, and Miguel Pabon, all

2012 Featured Stories—Cont.

Seven Indictments on Recovery Fraud

of Orlando, could each be facing as many as 10 years in prison for their alleged crimes.

Redding was charged in January 2012 with fraudulently taking more than \$27,000 in unemployment payments, Cannon with more than \$10,000, and Pabon with \$1,650. The funds allegedly stolen were federal funds related to the Extended Unemployment Compensation Account, part of the Recovery Act or stimulus initiative.

State authorities worked with investigators from the Department of Labor's Office of Inspector General.

[Indictments are merely formal charges that a defendant has committed a violation of the federal criminal laws. Every defendant is presumed innocent unless, and until, proven guilty.]

Recovery Funding Boosts Research and Development Spending

06-01-2012

Recovery Act funds helped boost university spending on R&D in the United States across all fields by nearly seven percent between fiscal years 2009 and 2010, a National Science Foundation survey reported.

In that time, university R&D spending increased from \$57.3 billion to \$61.2 billion, the survey found. More than two-thirds of that increase—\$2.7 billion—came from Recovery funds, which were distributed across a range of research fields.

Top 5 Overall Fields

- Life Sciences—Includes agricultural, biological, and medical research.
- Engineering—Includes aeronautical, chemical, civil, electrical, mechanical, and metallurgical engineering.

- Physical Sciences—Includes astronomy, chemistry, and physics.
- Environmental Sciences—Includes oceanography along with atmospheric and earth sciences.
- Non-Science—Includes business, management, communications, education, humanities, law, social work, and visual/performing arts research.

University R&D spending draws on multiple funding sources, but the federal government does the majority of underwriting. The top five agencies providing funding between FY2009 and FY2010: Department of Health and Human Services—Includes the National Institutes of Health, the largest single funder of medical research in the country; National Science Foundation; Department of Defense; Department of Energy; and NASA.

Recovery Funds Promote Net-Zero Energy Use

06-06-2012

The National Park Service is preparing to open a new and extremely energy efficient visitor facility in Southern California (right). The Recovery-funded Anthony C. Beilenson Visitor Center—a so-called “net-zero” facility because it produces its own energy to operate—is slated for opening ceremonies on June 9 in Santa Monica Mountains National Recreation Area.

The visitor center joins a net-zero transit facility—also funded with Recovery money—that recently opened in Massachusetts. According to local officials, the John W. Olver Transit Center, which serves rail and bus passengers in Greenfield in the northwestern corner of the state, is the first net-zero transit center in the country.

All of the Beilenson Visitor Center's energy needs are powered by a 94 kilowatt photovoltaic solar energy system on

site. The Department of the Interior provided \$9.5 million in Recovery funding to pay for construction of the visitor center and its solar energy system.

Recovery Funds Promote Net-Zero Energy Use

Similarly, the Olver Transit Center is powered by 7,300 square feet of photovoltaic panels. Other energy-efficient features include geothermal wells providing heated water and occupancy sensors that adjust lighting and temperature based on how many people are present. The Department of Transportation provided \$12.8 million in Recovery funds to underwrite construction.

Net-zero technologies have been an official priority of the Department of Energy (DOE) since 2008, when it launched an initiative promoting development of net-zero commercial buildings. The Recovery Act allowed DOE to step up the initiative. For instance, DOE awarded \$5 million in Recovery

funds to the city of Oak Ridge, Tennessee (site of the Oak Ridge National Laboratory) to develop more net-zero technologies that could be used in retrofitting existing buildings and be integrated into new buildings.

DOE also awarded \$15.9 million of Recovery funding to the University of California, Berkeley to develop testing facilities for commercial net-zero energy systems. Researchers will be able to conduct measurements of energy use and environmental conditions to understand how the systems perform, and then redesign and optimize their capabilities and performance.

Guilty Plea in Bribery and Kickbacks Case

06-13-2012

A fraud case investigated by agents from the Department of Energy and Department of Health and Human Services Inspectors General has resulted in a guilty plea of bribery and kickbacks involving \$75,000 of Recovery Act funds.

The U.S. Attorney's Office in Rhode Island recently announced that Saul Lemoi, a former senior energy auditor for Comprehensive Community Action Program (CCAP), a nonprofit organization helping the needy, pleaded guilty to bribery charges and to accepting kickbacks of federal weatherization funds.

CCAP, in Cranston, received \$1.5 million in Recovery funds from the Department of Energy for making low-income homes more energy efficient. Lemoi admitted that, in his capacity as senior auditor with CCAP, he steered 41 weatherization projects totaling \$75,000 to Weathertight Solutions, LLC, a general contractor in Cranston.

Lemoi failed to disclose that he held an interest in Weathertight Solutions and that Recovery funds were funneled to him for steering the projects to the company. He also admitted that in many instances he knowingly prepared invoices that did not accurately reflect the work that Weathertight Solutions had done on clients' homes. Many of the invoices submitted bills for work that was not performed.

According to U.S. Attorney Peter F. Neronha, Lemoi had persuaded an individual to found and start Weathertight Solutions with the promise that Lemoi would assist in making sure CCAP would use the new company to perform the easier weatherization projects.

Lemoi faces up to 15 years imprisonment, a fine of \$500,000, and three years parole when he is sentenced on August 23.

Your Utility Bills, Recovery Funds, and a Scam

07-16-2012

Once more, scammers are trying to exploit the Recovery Act to pick the pockets of unwitting Americans.

This time the ruse involves claims that the economic stimulus initiative includes money to pay your utility bills. Not true, as some unlucky people in Delaware discovered after signing up for the bogus claim.

According to the Delaware Attorney General's Office, which so far has received 35 complaints about the fairly elaborate scheme, con artists are contacting people via telephone, fliers, text messages, social media, and, in some cases,

even going door-to-door wearing what appear to be utility company uniforms.

The bait is a claim that the federal government will use stimulus funds to pay your utility bills for one month. To receive the money, you must first "register" and provide your Social Security and bank-routing numbers. In some instances you're also asked to pay a \$100 "enrollment fee." You are then given a phony bank

**Scam
Alert**

2012 Featured Stories—Cont.

Your Utility Bills, Recovery Funds, and a Scam

account with phony routing numbers, which you are told to give to your utility company when signing up online to deduct payment for your current bill from that account.

When the utility company eventually learns that the account is fake, you could be required to pay a late fee, and possibly have your service interrupted. The scam appears to be double-barreled, aimed at stealing both bank-account and personal-identity information.

“Scammers have no problem exploiting the fact that families are worried about paying their bills, but consumers can protect themselves with the right knowledge,” said the Delaware Attorney General, who urged anyone who might be approached “to ask questions, verify information, and always remember that offers which seem too good to be true usually are.”

The Better Business Bureau of Arkansas has posted an alert about the same scheme in that state. The BBB advises the following:

- “Never provide your social security number, credit card number, or banking information over the phone or at your home unless you initiated the contact and feel confident with whom you are speaking.”
- “If you receive a call from someone claiming to be from your utility company and are pressured for immediate payment or personal information, hang up and call the customer service number on your utility bill.”
- “Never allow anyone into your home to check electrical wiring, natural gas lines, or appliances unless you have scheduled an appointment or have reported a utility problem. Also, ask utility employees for proper identification.”

Recovery Awards Expand Wastewater Facilities

07-25-2012

Constructing and upgrading wastewater treatment facilities have been a Recovery priority for both the U.S. Department of Agriculture (USDA) and the Environmental Protection Agency (EPA). USDA's Rural Utilities Service (RUS) allotted \$1.3 billion in Recovery funds for water and wastewater facilities, EPA \$3.9 billion.

Below are five projects that have been funded.

Johnson County, Kansas

According to EPA, which provided an \$18.4 million Recovery loan, improvements made to Johnson County's Douglas L. Smith Middle Basin Treatment Plant (right) constituted “the largest green infrastructure project” in the state. Improvements included a processing system for capturing biogases from waste, and a separate system to more efficiently receive and treat used greases and oils from restaurants and industries (right).

Officials expect the project will yield almost \$600,000 in annual savings for Johnson County customers and will also reduce annual greenhouse gas emissions by more than 9,700 metric tons. A ribbon-cutting ceremony for the new facilities was held in October 2011.

Freeport, Minnesota

RUS awarded a \$1.35 million loan to replace an aging water tower with a larger one and upgrade the water mains and sewer lines in this town of 450 residents. All work was recently completed, and expected public benefits

include increased water pressure, higher water quality, and improved treatment of wastewater. Officials say public safety is also improved through increased water pressure at fire hydrants.

Wolfe County, Kentucky

With the help of an \$892,000 Recovery grant and a matching \$892,000 Recovery loan—both from USDA—Wolfe County officials were able to build a water treatment plant in this Appalachian region of Kentucky. The new plant was needed to meet water quality regulations

Recovery Awards Expand Wastewater Facilities

and provide improved water service to about 7,300 people living in the area. The old water system had outgrown its current capacity. The plant opened in May 2012.

Upper St. Croix Watershed, Wisconsin

Located in the northwest corner of Wisconsin, the Upper St. Croix watershed spans more than 177,000 acres and contains 153 miles of streams and rivers, plus abundant lakes, wetlands, and forests. Solon Springs, a town near the watershed, recently marked the opening of a new waste water treatment facility, which was needed to serve the town's 600 residents and protect the watershed from pollution. USDA awarded Solon Springs a \$1.54 million Recovery loan and a \$727,000 Recovery grant for improving overall water quality management. The U.S. Army Corps of Engineers provided an additional \$1.1 million in Recovery funding.

Kewaunee, Wisconsin

The city of Kewaunee, east of Green Bay, marked the completion of renovations and upgrades to its wastewater treatment plant with a community celebration and ribbon cutting on June 9. The original treatment facility is over 50 years old, exceeding its design life by more than 30 years. The improvements were necessary to bring the facility in compliance with recent requirements set by the Wisconsin Department of Natural Resources, and to meet existing and future wastewater treatment needs of the community.

Improvements included the addition of process units and buildings. The project also included construction of a new laboratory/administration and headworks building that will include screening, grit removal equipment, flow metering, raw influent pumps, motor control equipment, and aeration blowers. USDA Rural Development funded the project with a combined Recovery loan and grant totaling \$6.9 million.

Wheels Up—Completed Recovery Projects

07-31-2012

To date more than 8,200 of the Department of Transportation's (DOT) Recovery-funded projects have been completed. While many involve roads and bridges, either repaired or newly constructed for car, truck, and pedestrian traffic, some projects have been aimed at improving infrastructure for another popular form of travel—flying. Here are three completed projects, one for land, two for air:

Denver—I-70/Central Park Boulevard Interchange

Using \$12 million in DOT Recovery funds, Denver built a new bridge and interchange to provide direct access from the city's east side to commuter arteries I-70 and I-270. The Central Park Boulevard and bridge project, 14 months in the making, opened last November and has not only added new lanes with the interchange, but also 12-foot pedestrian walkways. Officials say the project has provided new access to a wide range of commercial land opportunities.

Atlanta—Hartsfield-Jackson International Airport Parking Apron

The world's busiest airport added a new 12-gate terminal in 2009. DOT provided \$14 million in Recovery funds to build a needed additional parking area for large aircraft, which airlines are increasingly using for long hauls, particularly international routes. Construction began in September 2009 and was completed in May 2011.

Boston—Logan International Airport Runway Rehabilitation

Runways and taxiways at Logan International had deteriorated to the point of showing cracking, rutting, and other signs of fatigue. The city used \$12.5 million of DOT Recovery funding to replace the worn pavement, providing a smooth ground-ride for airplanes and better drainage systems to channel water runoff. The replacement pavement is a mix of new types of asphalt and recycled asphalt "for environmental and sustainability advantages," DOT said.

Recovery Funds Give Head Start a Leg Up

08-29-2012

More than \$2 billion in Recovery funds allocated for Head Start and Early Head Start allowed the Department of Health and Human Services (HHS) to reach an additional 61,000 children and families—6,000 more than originally anticipated—beyond the one million children and families the programs normally serve every year.

The Recovery Act earmarked \$1 billion for Head Start and \$1.1 billion for Early Head Start. Together, the two federal programs promote school readiness for kids age five and under from low-income families. Both programs focus on language, literacy, and general knowledge skills as well as enhancing physical health and social/emotional development.

In addition to funding those goals, the Recovery money allowed the two programs to:

- Increase staff salaries,

- Improve staff training,
- Upgrade Head Start centers and classrooms,
- Increase hours of operation, and
- Enhance transportation services.

All \$2.1 billion has been paid out, distributed among each of the 50 states (including Native American tribal nations), six territories, and the District of Columbia.

Head Start was established in 1965 for eligible four- and five-year-old preschoolers and their families. The program has enrolled more than 25 million children since its inception. Early Head Start was established in 1995 for children three and under and pregnant women because of scientific evidence that a child's earliest years are extremely important to healthy development.

Recovery Funds Amtrak Renovations

09-06-2012

Amtrak has almost completed 154 projects that were funded by a \$1.3 billion Recovery grant awarded by the Department of Transportation (DOT). The projects included an array of long-needed improvements, enhancements, and repairs; one completed project has already won a prestigious international award.

DOT's Federal Railroad Administration specified that the Recovery grant was to be used for capital investment. Accordingly, Amtrak allocated funds to five overall categories:

- Station work
- Equipment overhaul
- Infrastructure (mainly track) improvements
- Security enhancements
- Maintenance

Highlights

Renovation of the Wilmington, Delaware train station posed the challenge of modernizing the 100-plus-year-old facility while retaining its historic Victorian-style architecture. The project included detailed restoration to various parts of the station, including the grand staircase in the lobby and the historic waiting rooms on the second floor. A larger concourse, a new passenger information display

Amtrak's renovated station in Wilmington, Delaware has won a Brunel Award for design.

system, new LED lighting, and a more energy-efficient heating/cooling system are among the many changes incorporated into the station.

Soon after renovations were complete in March 2011, the station won a prestigious Brunel Award from the Association of American Railroads and the International Union of Railways. The annual Brunel competition “recognizes and promotes the best in railway architecture, engineering, landscape and environmental design, product design, locomotive and car design, graphic arts, and corporate branding amongst the world's railways,” the award announcement said.

Recovery Funds Amtrak Renovations

Replacement of another century-old structure, the Niantic River Bridge in Connecticut between East Lyme and Waterford, has been among Amtrak's most complex Recovery projects. The Niantic Bridge is one of the oldest moveable bridges in the country, built in 1907 and in continuous operation since as a key link for passenger and freight rail traffic between New York and Boston. Because it was not economical to repair the bridge, it required full replacement to provide reliable rail operation.

An entirely new, two-track drawbridge (right) is under construction 58 feet south of the original bridge. Tracks leading to and from the old bridge on both sides have had to be realigned to the new one, and vertical under-clearance above the water is being increased from 11.5 feet to 16 feet. Retaining walls are also being built. The Niantic Bridge replacement is one of about a half-dozen Amtrak projects still underway but nearing completion. Officials expect the new bridge to be in service this fall, at which point the old bridge will be removed.

The Recovery grant further allowed Amtrak to refurbish and return to service 60 corridor cars, 20 long-distance cars,

and 15 locomotives that had been in storage. Also, Amtrak was able to build two new maintenance facilities—one in Hialeah, Florida, the other in Los Angeles.

Amtrak reports that ridership is up 3.7% for the period of October 2011 through March 2012, and officials say the rail line could not support its current level of ridership without the 80 cars and 15 locomotives now back in service.

EPA IG Says Recovery Funds Should Be Returned

09-24-2012

The Environmental Protection Agency (EPA) Inspector General (IG) recommends that the agency should recoup \$9 million in Recovery funds from Cascade Sierra Solutions (CSS) and that EPA should consider suspending/debarring the organization from doing business with the federal government.

The nonprofit had been awarded a Recovery grant intended to support emission reductions of diesel truck engines.

In a report issued September 4, the EPA IG stated that costs claimed by CSS, based in Eugene, Oregon, were not "reasonable, allocable, and allowable" per the terms and conditions of the Recovery grant. For example, the IG found that CSS' financial management system pertaining to cash draws, revolving fund accounting, project costs,

and progress reporting failed to meet federal requirements, and that procurements did not meet federal competition or cost/price analysis requirements.

In a written response to the report, EPA said it had "initiated corrective actions to address some of the weaknesses identified.... The agency has placed CSS on reimbursement status for the active assistance agreements to restrict access to available federal funds."

EPA also issued a stop-work order "until CSS can demonstrate that their financial system can effectively record and report the source and application of funds associated with the grant project."

While disagreeing with some of the IG's findings, CSS "planned to document compliance with EPA procurement regulations," the IG report said.

Three Are Convicted of Fraud Involving Recovery Funds

10-04-2012

Extensive investigations by Inspectors General and U.S. Attorneys resulted in guilty pleas from three Missouri business owners who falsely claimed to be service-disabled veterans in order to win special federal contracts of more than \$5 million in Recovery Act funding.

One defendant brazenly pretended to be a service-disabled veteran decorated for combat wounds suffered in the Vietnam War. The other two falsely claimed to be service-disabled vets and also bribed a federal official with \$20,000 of goods and services that included “entertainment at a local gentlemen’s club,” according to prosecutors.

All three defendants defrauded the federal government’s Service-Disabled Veteran-Owned Small Business Program (SDVOSB Program), which awards government contracts to companies owned by service-disabled veterans. All contracts were awarded through the Department of Veterans Affairs.

Federal officials state that, when applying for contracts under the SDVOSB Program, Warren K. Parker of Blue Springs, Missouri submitted a resume that fraudulently claimed he was a war hero who had been awarded three Silver Stars and three Purple Hearts, among other citations, for his service in Vietnam. His construction firm was able to win \$6.7 million—\$4.9 million in Recovery funds—in SDVOSB Program contracts.

Investigators later found that Parker had served in the Missouri National Guard during the Vietnam War but had never left the state. Parker pleaded guilty to fraud and was ordered to pay \$6.8 million in restitution. He is scheduled

for sentencing on October 9 and could receive up to 30 years imprisonment.

The two other defendants, Joseph Madlinger and Michael Woodling, partners in a St. Louis contracting firm, set up a shell-company they falsely said was owned and operated by service-disabled veterans. Additionally, Madlinger and Woodling bribed Russell Todd, an official at the St. Louis VA Medical Center, who helped steer SDVOSB Program contracts to the shell-company. Todd accepted “approximately \$20,000 in luxury baseball tickets, meals and entertainment at a local gentlemen’s club,” the U.S. Attorney for the Eastern District of Missouri said.

The shell-company was able to secure \$3.4 million in SDVOSB Program contracts, including a Recovery-funded contract for \$654,000 for work on the VA Medical Center.

Woodling was sentenced to three years of probation, issued a \$60,000 fine, and ordered to pay restitution of \$1.5 million. Madlinger was sentenced to 24 months in prison and received a \$50,000 fine; his restitution is still to be determined. Todd was sentenced to 15 months in prison.

The cases were investigated by the Offices of Inspector General for the Department of Veterans Affairs, the General Services Administration, and the Small Business Administration. Assistant United States Attorneys for the State of Kansas, as well as the Eastern District of Missouri also participated.

New Rural Medical Center Funded by Recovery Loan

10-17-2012

A \$3 million Recovery loan from the U.S. Department of Agriculture (USDA) has funded the construction of a new medical center for the town of Pecos in north-central New Mexico.

The planned 15,000-square-foot Pecos Valley Medical Center will replace a much smaller facility currently in use. The existing building suffers from structural defects and has struggled to keep pace with an increasing number of patients among the 8,200 residents in the area.

Project officials estimate the new facility will provide service to 5,500—6,000 patients or approximately more than 16,000 annual visits—up from current capacity for only 3,400 patients with 12,000 annual visits.

Construction is proceeding in two phases:

- I—A new building with 10 exam rooms, two treatment bays, space for coordinating care for diabetes and behavioral health, a main lobby, and a parking lot.
- II—An adjoining building for radiology and a pharmacy along with additional parking.

The Recovery-financed USDA Rural Development Community Facilities loan, to be repaid over 40 years, will underwrite Phase I only. Pecos officials are still trying to raise the \$4 million that Phase II is expected to cost. TA Cole and Sons of Albuquerque is the general contractor selected for Phase I, which is expected to be completed in spring 2013.

Recovery Tax Credit Helps Open New Plant

10-24-2012

A nearly \$25 million Recovery Act tax credit helped General Electric transfer its manufacturing operations of hybrid water heaters (below) from China to Kentucky's Louisville Appliance Park, making it the first new plant opened there

in more than 50 years. Kentucky state and local governments put up \$17 million toward construction costs.

The majority of Recovery projects are funded by stimulus contracts, grants, and loans, while Recovery tax credits—about \$300 billion total—are most often used to offset losses from the recession or to provide for energy efficiency. But in this case, GE used a sizeable tax credit to offset construction costs of the new facility, which GE says can make the product more competitively than in China.

GE's hybrid water heater combines energy-saving heat-pump technology with traditional electric heating elements, requiring less than half the amount of energy needed to operate a conventional electric water heater. The hybrid "and other recent investments at Appliance Park has also created hundreds of highly skilled salaried jobs in fields like engineering, industrial design, and manufacturing," the company said.

IRS Can't Document \$394,000 in Recovery Payments

11-07-2012

The Internal Revenue Service lacks supporting documentation for at least \$394,000 in Recovery-funded payments to contractors and possibly as much as \$928,000, the Treasury Inspector General for Tax Administration (TIGTA) has found.

The IRS received \$203 million in Recovery funding to pay for the oversight of 56 tax provisions mandated in the stimulus legislation. The agency used some of the money to hire contractors to reprogram computer systems, update tax forms and publications, and provide customer assistance to taxpayers regarding the Recovery tax credits. But agency officials "did not obtain required documentation supporting all billed labor charges," according to the recently released TIGTA report.

"Our review of a statistically valid sample of \$1 million in labor charges identified that the IRS did not have documentation supporting \$394,430 of the invoiced labor hours that were paid," the report states. "Applying the results of our analysis to the \$5.3 million in labor charges for the procurement in which unsupported payments were identified, TIGTA estimates a total of \$927,992 may have been erroneously paid."

However, TIGTA officials found that the IRS had obtained proper documentation supporting \$34,000 in travel expenses claimed by contractors.

The agency agreed with the report's recommendations to tighten policies and procedures regarding contractor invoicing, and IRS officials plan to review those charges that TIGTA identified as lacking proper documentation.

2012 Featured Stories—Cont.

Segment of Recovery Funded High-Speed Rail System Completed

11-14-2012

One of the first major projects for the High-Speed and Intercity Passenger Rail (HSIPR) program, which is underwritten heavily by Recovery Act money, was recently completed.

Upgrades and repairs to 190 miles of track on Amtrak's Vermonter line were completed not only on time, but also within budget, the Department of Transportation (DOT) announced. The project, which received \$52.7 million in Recovery funds and \$5 million from New England Central Railroad, will result in increased speeds, reduced travel time, greater reliability, and an increased

number of trains traveling each day within Vermont, DOT said.

Upgrades included heavier continuously welded rails, repairs to more than 50 bridges, new tie installation, and ballast work. These improvements reduce the running time by about a half hour and increase track weight-capacity from 263,000- to 286,000-pound freight cars.

The new rail for the project was produced at Steel Dynamic Inc.'s plant in Columbia City, Indiana.

CBO Estimates the Current Impact of Recovery Act

11-28-2012

According to the Congressional Budget Office, which produces independent analyses of the federal budget and economic issues, the Recovery Act provided jobs for at least 200,000 people and possibly as many as 900,000 during the third quarter of 2012. Similarly, the gross domestic product (GDP) increased between 0.1 and 0.7 percent during the same period and the national unemployment rate was lowered between 0.1 and 0.5 percent also as a result of the Recovery initiative, CBO added.

By comparison, CBO reported in August that for the second quarter of 2012 between 200,000 and 1.2 million jobs were attributable to the Recovery Act, GDP increased between 0.1 and 0.8 percent, and the unemployment rate was lowered between 0.1 and 0.6 percent.

CBO analysts arrived at their estimates by:

- looking at recorded spending to date along with estimates of other Recovery effects on spending and revenues,

- using evidence about the effects of previous similar policies, and
- drawing on various mathematical models that represent the workings of the economy.

CBO's estimated range of total jobs is greater than the number shown on Recovery.gov for the same period (135,455) because only prime recipients of Recovery funds report jobs funded for contract, grant, and loan awards. Jobs at the sub-recipient level may or may not be reported, and jobs at the vendor level are not reported. Nor do recipient or sub-recipient reports measure or reflect effects that tax cuts, entitlements paid out, and other parts of the Recovery initiative may have on employment.

The CBO report has provided estimates on total jobs and the impact on the unemployment rate for every quarter since Congress passed the Recovery Act in February 2009 and also projects estimates for the remainder of 2012 and through the end of 2013.

White House Grants Inspectors General (IG) Request to Keep Unused Recovery Funds

11-07-2012

The IGs of the agencies distributing Recovery Act awards were appropriated specific funds to cover expenses for the additional oversight required under the Recovery Act. After the Recovery Act was enacted, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank) was passed and mandated that any Recovery funds not used by December 31, 2012, had to be returned to the Treasury.

However, Dodd-Frank also stated the President could waive repayment of any unused funds should he determine that repayment would “not be in the best interest of the nation.”

Six Inspectors Generals requested waivers from repaying \$11.5 million in unused Recovery Act funds.

In a notice published November 27 in the Federal Register, President Obama said that he was granting the waiver “based on the following considerations: The requesting Inspectors General are tasked with overseeing investigations that can take multiple years to complete, and the oversight work often begins in earnest during the final phases of a project.

“In some cases, the awards that the Inspectors General oversee will continue to outlay past December 31, 2012. The \$11.5 million unobligated balance will allow Inspectors General the needed flexibility to effectively combat waste, fraud, and abuse. Therefore, in accordance with section 1306 of the Dodd-Frank Act, I am waiving the requirements for repayment of unobligated funds.”

The agencies of the requesting Inspectors General:

- Department of Commerce
- Department of Housing and Urban Development
- Department of Transportation
- Treasury Inspector General for Tax Administration
- National Science Foundation
- Small Business Administration

Con Artists Steal Direct Deposit Social Security Payments

12-20-2012

The Social Security Administration (SSA) has opened “multiple investigations across the country” into theft of beneficiary payments involving direct deposit bank accounts, SSA Inspector General Patrick P. O’Carroll, Jr. told the House Ways and Means Committee. The Recovery Board recently provided data analysis to SSA Inspector General (IG) investigators, who as of December 17 have received more than 28,000 reports of questionable changes to beneficiaries’ direct deposit accounts.

“These reports have involved either an unauthorized change to direct deposit information, or a suspected attempt to make such a change,” O’Carroll testified. In November 2012, his office was receiving about 59 reports a day.

The scam works like this: Criminals obtain personal identity information of mostly older SSA beneficiaries usually through some type of deception, such as government-employee impersonation, telemarketing ruses, or bogus announcements of sweepstakes winnings. The scammers then use the beneficiary’s personal information to change

their direct deposit record either by contacting SSA directly or more frequently through financial institutions, to include prepaid debit card entities.

In one case, an 86-year-old man received a letter saying he had won \$3.5 million and that he should call the included phone number to provide necessary information for receiving the money. Soon after calling, “the man did not receive his scheduled Social Security payment, so he contacted SSA, only to learn that his benefits were diverted to a different account,” O’Carroll said. “He was issued a replacement payment, but the man reported that the ordeal caused two months of hardship, as he was forced to obtain a bank loan to pay his rent and for other living expenses.”

SSA has since revised guidelines for handling requested changes to a beneficiary’s bank information, but most requests come by phone. As O’Carroll pointed out, “Accurately verifying an individual’s identity over the phone

**Scam
Alert**

2012 Featured Stories—Cont.

Con Artists Steal Direct Deposit Social Security Payments

presents more challenges to SSA staff than a face-to-face verification in a field office; thus, the risk of fraudulent record changes increases when staff processes requests over the phone.”

SSA IG officials have made recommendations for reducing such risk, including delaying direct deposit changes for a

certain period of time and generating automatic emails to inform beneficiaries that changes have been made.

O’Carroll also urged beneficiaries to be wary or suspicious of offers or “winnings.” And beneficiaries should notify their local SSA office as soon as they notice their monthly payment is late.

Roofing Contractor Pleads Guilty to Recovery Fraud

12-27-2012

A roofing contractor in Boise, Idaho, was ordered to pay a \$65,000 fine and sentenced to three years of probation for fraudulently obtaining a Recovery-funded contract.

According to court documents, Construction Services Corporation (CSC) made false claims regarding its eligibility for the federal government’s HUBZone program, which encourages economic development in historically underutilized business zones through set-aside contracts. To qualify for the small-business-only program, a firm must be owned by at least 51 percent by U.S. citizens and at least 35 percent of employees must live in the specific HUBZone area where the work is to be done.

As a result of its false claims, CSC was able to obtain a \$274,283 Recovery contract from the Department of Agriculture in January 2010 for roofing work on a research facility in Corvallis, Oregon.

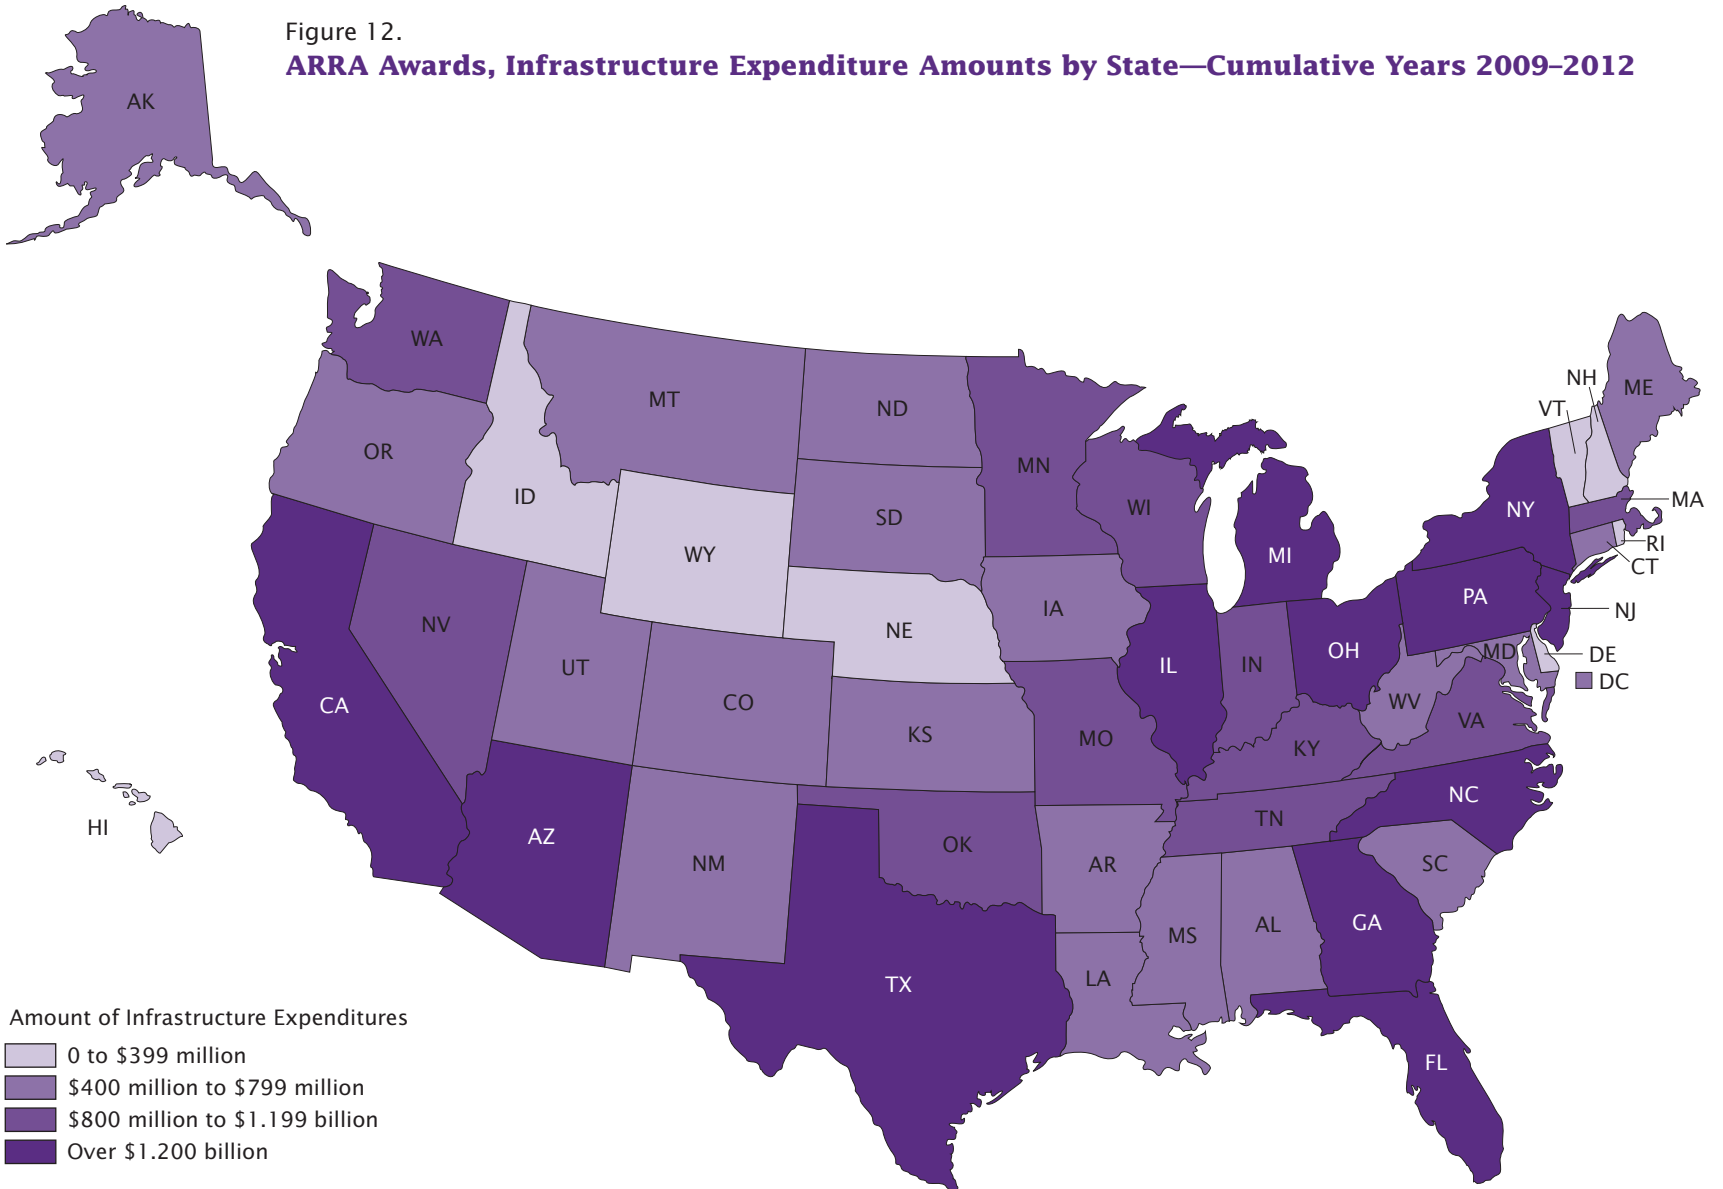

CSC performed and completed the work later that year.

CSC pled guilty to wire fraud and making a false statement to the government, according to U.S. Attorney Wendy J. Olson.

“Construction Service Corporation violated the public trust,” said Olson. “By falsely representing its eligibility for a federal contracting preference, this defendant obtained federal funds that should have gone to a contractor that was actually prioritizing economic development in underserved areas. This case was brought to its successful conclusion through the cooperative investigative work of many federal agencies, all of which well understand the need to protect taxpayers’ money.”

323117	Books Printing	25	25	—	—
323119	Other Commercial Printing	3	3	—	—
324110	Petroleum Refineries	19,208	19,208	—	—
324121	Asphalt Paving Mixture and Block Manufacturing	9,124	7,819	1,305	—
324122	Asphalt Shingle and Coating Materials Manufacturing	9,240	9,240	—	—
324191	Petroleum Lubricating Oil and Grease Manufacturing	688	19	669	—
325110	Petrochemical Manufacturing	41,380	25	41,355	—
325120	Industrial Gas Manufacturing	39,004	1,256	37,747	—
325182	Carbon Black Manufacturing	135	—	135	—
325188	All Other Basic Inorganic Chemical Manufacturing	31,821	—	31,821	—
325193	Ethyl Alcohol Manufacturing	402,235	—	299,080	103,155
325199	All Other Basic Organic Chemical Manufacturing	113,813	50,067	63,746	—
325211	Plastics Material and Resin Manufacturing	4,800	2,631	2,169	—
325222	Noncellulosic Organic Fiber Manufacturing	150	—	150	—
325311	Nitrogenous Fertilizer Manufacturing	150	—	150	—
325314	Fertilizer (Mixing Only) Manufacturing	500	—	500	—
325320	Pesticide and Other Agricultural Chemical Manufacturing	3,009	3,009	—	—
325411	Medicinal and Botanical Manufacturing	7,789	4,999	2,790	—
325412	Pharmaceutical Preparation Manufacturing	171,103	167,713	3,390	—
325413	In-Vitro Diagnostic Substance Manufacturing	50,827	50,627	200	—
325414	Biological Product (except Diagnostic) Manufacturing	106,741	96,075	10,666	—
325510	Paint and Coating Manufacturing	439	340	99	—
325520	Adhesive Manufacturing	250	—	250	—
325611	Soap and Other Detergent Manufacturing	22	22	—	—
325620	Toilet Preparation Manufacturing	82	—	82	—
325920	Explosives Manufacturing	9	9	—	—
325992	Photographic Film, Paper, Plate and Chemical Manufacturing	185	185	—	—

See note at end of table.

331111	Iron and Steel Mills	4,353	4,302	51	—
331210	Iron and Steel Pipe and Tube Manufacturing from Purchased Steel	27,014	27,014	—	—
331221	Rolled Steel Shape Manufacturing	4	4	—	—
331312	Primary Aluminum Production	123	123	—	—
331314	Secondary Smelting and Alloying of Aluminum	204	104	100	—
331315	Aluminum Sheet, Plate and Foil Manufacturing	4	4	—	—
331316	Aluminum Extruded Product Manufacturing	2,872	1,722	1,150	—
331319	Other Aluminum Rolling and Drawing	24	24	—	—
331491	Nonferrous Metal (except Copper and Aluminum) Rolling, Drawing and Extruding	3,111	111	3,000	—
	Secondary Smelting, Refining and Alloying of Nonferrous Metal (except Copper and Aluminum)	1,304	—	1,304	—
331511	Iron Foundries	14	14	—	—
331522	Nonferrous (except Aluminum) Die-Casting Foundries	4	4	—	—
332111	Iron and Steel Forging	260	—	260	—
332112	Nonferrous Forging	15	15	—	—
332114	Custom Roll Forming	294	294	—	—
332116	Metal Stamping	426	426	—	—
332212	Hand and Edge Tool Manufacturing	218	218	—	—
332214	Kitchen Utensil, Pot and Pan Manufacturing	100	100	—	—
332311	Prefabricated Metal Building and Component Manufacturing	6,629	6,629	—	—
332312	Fabricated Structural Metal Manufacturing	108,526	108,526	—	—
332313	Plate Work Manufacturing	2,277	6	2,270	—
332321	Metal Window and Door Manufacturing	1,680	1,284	395	—
332322	Sheet Metal Work Manufacturing	739	339	400	—
332323	Ornamental and Architectural Metal Work Manufacturing	341	341	—	—
332410	Power Boiler and Heat Exchanger Manufacturing	15,380	4,017	11,363	—
332420	Metal Tank (Heavy Gauge) Manufacturing	5,015	5,015	—	—
332439	Other Metal Container Manufacturing	75	4	71	—
332510	Hardware Manufacturing	1,708	1,708	—	—
332618	Other Fabricated Wire Product Manufacturing	3,159	3,159	—	—
332710	Machine Shops	822	822	—	—
332721	Precision Turned Product Manufacturing	2	2	—	—
332722	Bolt, Nut, Screw, Rivet and Washer Manufacturing	187	187	—	—
332811	Metal Heat Treating	3	3	—	—
	Metal Coating, Engraving (except Jewelry and Silverware) and Allied Services to Manufacturers	285	35	250	—
332813	Electroplating, Plating, Polishing, Anodizing and Coloring	102	—	102	—
332911	Industrial Valve Manufacturing	77	77	—	—
332912	Fluid Power Valve and Hose Fitting Manufacturing	18	18	—	—
332913	Plumbing Fixture Fitting and Trim Manufacturing	694	694	—	—
332919	Other Metal Valve and Pipe Fitting Manufacturing	28	28	—	—
332992	Small Arms Ammunition Manufacturing	128	128	—	—
332994	Small Arms Manufacturing	1,974	1,879	94	—
332996	Fabricated Pipe and Pipe Fitting Manufacturing	28	28	—	—
332997	Industrial Pattern Manufacturing	71	71	—	—
332998	Enameled Iron and Metal Sanitary Ware Manufacturing	15	15	—	—
332999	All Other Miscellaneous Fabricated Metal Product Manufacturing	3,344	3,344	—	—
333111	Farm Machinery and Equipment Manufacturing	1,634	1,634	—	—
333112	Lawn and Garden Tractor and Home Lawn and Garden Equipment Manufacturing	620	620	—	—
333120	Construction Machinery Manufacturing	10,530	10,433	97	—
333210	Sawmill and Woodworking Machinery Manufacturing	5	5	—	—
333220	Plastics and Rubber Industry Machinery Manufacturing	120	—	120	—
333293	Printing Machinery and Equipment Manufacturing	24	13	10	—
333294	Food Product Machinery Manufacturing	70	70	—	—
333295	Semiconductor Machinery Manufacturing	6,029	2,984	3,046	—
333298	All Other Industrial Machinery Manufacturing	19,880	19,880	—	—
333311	Automatic Vending Machine Manufacturing	4	4	—	—
333313	Office Machinery Manufacturing	18	18	—	—
333314	Optical Instrument and Lens Manufacturing	4,010	2,211	1,800	—
333315	Photographic and Photocopying Equipment Manufacturing	559	553	7	—
333319	Other Commercial and Service Industry Machinery Manufacturing	79,283	79,283	—	—

See note at end of table.

Appendix 1.

**ARRA Award Amounts (\$) by Type by NAICS or NTEE Activity Code
Cumulative Amounts, February 17, 2009–December 31, 2012—Cont.**

[In thousands of dollars]

Activity Code	Activity Description	Total	Contracts	Grants	Loans
Manufacturing—Cont.					
333411	Air Purification Equipment Manufacturing	24	24	—	—
333414	Heating Equipment (except Warm Air Furnaces) Manufacturing	6,399	5,665	734	—
	Air-Conditioning and Warm Air Heating Equipment and Commercial and Industrial Refrigeration Equipment Manufacturing	19,100	10,263	8,838	—
333511	Industrial Mold Manufacturing	150	—	150	—
333512	Machine Tool (Metal Cutting Types) Manufacturing	7,158	7,158	—	—
333513	Machine Tool (Metal Forming Types) Manufacturing	44,553	44,027	526	—
333515	Cutting Tool and Machine Tool Accessory Manufacturing	22	22	—	—
333518	Other Metalworking Machinery Manufacturing	8	8	—	—
333611	Turbine and Turbine Generator Set Units Manufacturing	37,865	31,754	6,111	—
333612	Speed Changer, Industrial High-Speed Drive and Gear Manufacturing	5,928	5,928	—	—
333613	Mechanical Power Transmission Equipment Manufacturing	76	76	—	—
333618	Other Engine Equipment Manufacturing	642	642	—	—
333911	Pump and Pumping Equipment Manufacturing	10,543	10,543	—	—
333912	Air and Gas Compressor Manufacturing	944	944	—	—
333913	Measuring and Dispensing Pump Manufacturing	11	11	—	—
333921	Elevator and Moving Stairway Manufacturing	6,958	6,071	887	—
333922	Conveyor and Conveying Equipment Manufacturing	436	436	—	—
333923	Overhead Traveling Crane, Hoist and Monorail System Manufacturing	34,244	23,094	11,150	—
333924	Industrial Truck, Tractor, Trailer and Stacker Machinery Manufacturing	883	295	319	269
333991	Power-Driven Handtool Manufacturing	87	87	—	—
333992	Welding and Soldering Equipment Manufacturing	276	26	250	—
333993	Packaging Machinery Manufacturing	96	96	—	—
333994	Industrial Process Furnace and Oven Manufacturing	11	11	—	—
333995	Fluid Power Cylinder and Actuator Manufacturing	520	520	—	—
333996	Fluid Power Pump and Motor Manufacturing	4	4	—	—
333999	All Other Miscellaneous General Purpose Machinery Manufacturing	3,937	3,837	100	—
334111	Electronic Computer Manufacturing	102,021	54,894	47,127	—
334112	Computer Storage Device Manufacturing	11,160	10,960	200	—
334113	Computer Terminal Manufacturing	184	84	100	—
334119	Other Computer Peripheral Equipment Manufacturing	21,886	21,070	816	—
334210	Telephone Apparatus Manufacturing	7,569	7,252	317	—
	Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing	11,736	9,762	1,975	—
334290	Other Communications Equipment Manufacturing	5,460	3,424	2,036	—
334310	Audio and Video Equipment Manufacturing	2,096	2,002	94	—
334411	Electron Tube Manufacturing	2,000	—	2,000	—
334413	Semiconductor and Related Device Manufacturing	1,178,806	63,702	25,382	1,089,722
334414	Electronic Capacitor Manufacturing	8,505	—	8,505	—
334416	Electronic Coil, Transformer and Other Inductor Manufacturing	183	—	183	—
334419	Other Electronic Component Manufacturing	3,764	2,290	1,475	—
334510	Electromedical and Electrotherapeutic Apparatus Manufacturing	21,737	16,750	4,987	—
	Search, Detection, Navigation, Guidance, Aeronautical and Nautical System and Instrument Manufacturing	319,617	319,349	268	—
334511	Automatic Environmental Control Manufacturing for Residential, Commercial and Appliance Use	31,279	6,869	24,410	—
334512	Instruments and Related Products Manufacturing for Measuring, Displaying and Controlling Industrial Process Variables	25,662	22,987	2,675	—
334513	Totalizing Fluid Meter and Counting Device Manufacturing	2,946	134	2,812	—
334514	Instrument Manufacturing for Measuring and Testing Electricity and Electrical Signals	13,489	6,518	6,971	—
334515	Analytical Laboratory Instrument Manufacturing	120,838	110,484	10,354	—
334516	Irradiation Apparatus Manufacturing	44,426	41,442	2,984	—
334517	Watch, Clock and Part Manufacturing	10	10	—	—
334518	Other Measuring and Controlling Device Manufacturing	28,808	28,609	199	—
334519	Software Reproducing	635	635	—	—
334611	Magnetic and Optical Recording Media Manufacturing	3,006	3,006	—	—
334613	Electric Lamp Bulb and Part Manufacturing	5,003	398	4,605	—
335110	Residential Electric Lighting Fixture Manufacturing	181	29	152	—
335121	Commercial, Industrial and Institutional Electric Lighting Fixture Manufacturing	16,744	14,697	2,047	—
335122	Other Lighting Equipment Manufacturing	737	92	645	—
335129	Electric Housewares and Household Fan Manufacturing	243	—	243	—
335211	Household Cooking Appliance Manufacturing	183	—	183	—
335221	Household Refrigerator and Home Freezer Manufacturing	2,097	55	2,043	—
335222	Other Major Household Appliance Manufacturing	75	15	60	—
335311	Power, Distribution and Specialty Transformer Manufacturing	31,864	31,371	493	—
335312	Motor and Generator Manufacturing	10,817	10,696	121	—
335313	Switchgear and Switchboard Apparatus Manufacturing	42,210	42,210	—	—
335314	Relay and Industrial Control Manufacturing	2,494	2,494	—	—
335911	Storage Battery Manufacturing	624,448	522	623,926	—
335912	Primary Battery Manufacturing	35,000	—	35,000	—
335921	Fiber Optic Cable Manufacturing	6,048	48	6,000	—
335929	Other Communication and Energy Wire Manufacturing	4,833	—	4,833	—
335931	Current-Carrying Wiring Device Manufacturing	219	219	—	—
335932	Noncurrent-Carrying Wiring Device Manufacturing	15	15	—	—
335991	Carbon and Graphite Product Manufacturing	100	—	100	—
335999	All Other Miscellaneous Electrical Equipment and Component Manufacturing	21,190	7,832	13,358	—
336111	Automobile Manufacturing	446,452	192,487	253,965	—
336112	Light Truck and Utility Vehicle Manufacturing	145,550	105,942	39,549	60
336120	Heavy Duty Truck Manufacturing	13,404	577	12,519	308
336211	Motor Vehicle Body Manufacturing	11,389	10,418	971	—
336212	Truck Trailer Manufacturing	533	533	—	—

See note at end of table.
