 Data Source: Bike Buddy, Spring 2013  
 Date: March 25, 2014

Bike Buddy information provides a unique resource for understanding bicycle commuting in the Austin area. The website was developed to connect beginning and experienced bicycle commuters for potentially riding together, and so the routes represent only commuting trips. Routes were estimated from Bike Buddy origin and destination data using Google Earth's bicycle route algorithm. The data represents entries posted in Spring, 2013.
