

Cayuse SP Quick Start

Cayuse SP Quick Start; 3 Quick Steps to Building a Proposal in Cayuse SP

Cayuse SP provides a single point of entry for proposal data and any documents that are required for internal review. It does not, however, link directly to sponsor websites, nor does it change the way that proposals are submitted, whether that is through Cayuse 424, Grants.gov, a sponsor website, e-mail, or paper.

The Cayuse SP module is used for Proposal routing prior to Proposal submission. Cayuse SP was designed to manage research operations and provides a framework to track and report on the sponsored programs activity. It is essentially an electronic routing system for Proposal review and approvals and replaces UNT's paper Routing Form for approvals.
