Frequently Asked Questions

What is Sociology? What do Sociologists do?

Sociology is the study of social relations, how they are formed and what their consequences are.

Sociologists strive to understand, for example, how norms and values shape peoples' lives; how people organize themselves to forge collective action; how power works in a political system and in everyday life; and how social inequalities are maintained or how social equity is achieved. Sociologists also study past and 'foreign' societies and engage in cross-cultural comparison, deepening our understanding of human diversity.
