

Instructions on sending the file from Flight PCMCIA card:

1. Insert PCMCIA Flight (yellow) card into PC using the PCMCIA card slot on the PC.
2. Copy file (flight.dat) from PCMCIA card to the desktop. The file size should be around 20,481 KB (20.5 MB).
3. Please do not attempt to open file on the card or the one copied to PC; this will corrupt data.
4. Remove the PCMCIA Card from the PC.
5. Send the file to the DCAI Lab via the AMRDEC FTP site <https://safe.amrdec.army.mil/safe/>

Instructions on sending the files from the Video PCMCIA card:

1. Insert PCMCIA Video card into PC using the PCMCIA card slot.
2. Copy the files (video.idx, video.m2t, and video.sts) from the Video card to the desktop. The file sizes should be around:
 - a. video.idx (394 KB)
 - b. video.m2t (2,008,660 KB or 2GB)
 - c. video.sts - (2 KB)
3. Send the files to the DCAI Lab via USACR/SC FTP site or the AMRDEC site.
