* The workload description of 'Processing Unit/Month' is a combination of the number of allocated processors and additional memory if the standard thresholds are exceeded.

** The 'Server Basic Level 1' and 'milCloud Plus' workload counts are calculated using the same methodology. The workload count is the Processing Unit plus one base unit, to a maximum of five units. Please see the DISA Service Catalog (<http://www.disa.mil/computing/Server-Hosting-and-Virtualization>) for more detailed information on these calculations.
