

Planned NCAISS Technology Refresh

The current DSS National Industrial Security Program (NISP) Common Access Information Security System (NCAISS) will undergo an upcoming planned technology refresh. The functionality of the updated NCAISS application will remain the same as is currently available; however, some minor visual differences in the user interface (i.e., look and feel) will occur. The following screenshots are intended to highlight an NCAISS user's homepage before and after the update, highlighting key visual differences.

Existing NCAISS Interface
