## A. DIALING INSTRUCTIONS

### 1. TO CALL LOCAL

NOTE: Local calls dialed with the R.I. area code, 401, will incur charges.

For on-base telephone calls, dial seven-digit number.

For off-base telephone calls, dial 99 + seven-digit number.

### 2. TO CALL LONG DISTANCE

NOTE: Long Distance calls will incur charges. For long distance calls, dial 98 + 1 + Area Code + seven-digit number.

### 3. TO CALL DSN

For CONUS DSN calls, dial the seven-digit DSN number.

FOR OCONUS DSN calls, dial the DSN area code + seven-digit DSN number.

For the Global DSN Operator, please dial 560-1110.

A complete DSN directory can be found online at <http://www.disa.mil/Services/Network-Services/Voice/SBU-Voice/Directory>

DSN Area Codes: AFRICOM: 311

CONUS: 312

EUROPE: 314

PACIFIC: 315

ALASKA: 317

CENTRAL: 318

CANADA: 319 (VOICE); 509 (VTC)

### Regular Toll Service

NOTE: DO NOT use regular toll service to call areas reachable via DSN or tie-lines.

Local calls dialed with the R.I. area code, 401, will incur charges.

Direct Dial within Rhode Island ..... 99-1 Area Code & Number

Outside Rhode Island ..... 99-1 Area Code & Number

There is no access to an outside operator from a base phone.

### 4. ASSISTANCE

For Base Information..... 841-3456 (Auto Attendant)

For Verizon Directory Assistance Inside R.I.

Long Distance and Toll-Free Numbers..... 99-411

NOTE: There is a 55 cent charge for each call made to Directory Assistance.

### 5. TO TRANSFER INCOMING CALLS

Depress the "transfer" button in the receiver rest of your telephone instrument. Dial the five-digit number to which you are transferring the call. When you hear the dial tone, depress the "transfer" button and hang up your phone. The call will automatically be transferred.

### 6. CONFERENCE ARRANGEMENTS

Conference arrangement circuits are included in the telephone system. Conference service is provided at

no cost, although toll charges will be billed for each long-distance call. Conference service is that of furnishing simultaneous connections among three to seven telephone stations, including a long-distance party, if required on the connection, either on the basis that each may communicate with all the others or that one station is the transmitting station and all others are receiving stations. Further information is available at the Telephone Office, 841-7202.

Conference service is available to all component commands and associated activities located on the east side of Narragansett Bay who are currently served via the NAVSTA Central Telephone Office.

## B. REGULATIONS

### 1. USE OF THE TELEPHONES DURING AN EMERGENCY

Telephones shall not be used during a general emergency or a condition of disaster, except for emergency official calls. Do not call the operator for information concerning the condition of the emergency, as this information will not be furnished. Incoming and outgoing calls will be challenged by the operator. Calls not identified as "emergency calls" will not be completed until the emergency is over. Calls in progress are monitored; those which are found not to be emergency official calls will be disconnected without notice and reported to heads of activities concerned for disciplinary action. All telephone users are urged to refrain from dialing other telephones unless calls are essential. This is necessary to prevent overloading and jamming of the automatic equipment. If your telephone should ring, answer it promptly, and make your conversation as brief as possible. At no time should classified information be discussed on a non-secure phone.

### 2. PERSONAL CALLS

Navy telephones will be used for official calls only. The use of official telephones for personal purposes at government expense is unauthorized and violators will be subject to disciplinary action. Public telephone booths have been placed at convenient locations for the use of personnel desiring to place unofficial calls. Personal calls in excess of \$1,000 per month or \$100 per call may be prosecuted. Lesser charges may be filed for lesser offenses.

### 3. TELEPHONE MONITORING

Department of Defense (DOD) telephone communications systems are provided for the transmission of official government information only and are subject to telephone security monitoring and telephone communications support equipment monitoring at all times. The use of DOD telephone communications systems constitutes consent to telephone communications security and management monitoring.

Telephone communications security monitoring is defined as listening to or recording telephone communications on DOD-dedicated systems or the common-user systems of the Defense Communications System, by any means, for the purpose of determining whether the systems are functioning properly or being used for other than official purposes.

Telephone communications management monitoring is defined as monitoring by government or contractor personnel for the purpose of normal operations, maintenance and repair of telephone trunks, lines and equipment.

### 4. LONG-DISTANCE OFFICIAL LINES

Instructions on the authorization for placing long-distance telephone calls have been issued by many Navy commands. These instructions should be consulted prior to the placing of long-distance telephone calls. Long-distance calls for personal use are not authorized under any circumstances.

### 5. LEASED LONG-DISTANCE LINES

Leased lines to Newport are available for official use, as are DSN circuits. These lines have been installed in an attempt to reduce long-distance toll charges, as well as for control of availability of circuits to these points. It should be noted that these services are not free. Therefore, the use of these circuits should be governed by the intent of the same rules and regulations afforded commercial toll calling.

### 6. DEFENSE SWITCHED NETWORK (DSN)

**General.** The DSN is the principal long-haul, voice communications network used by the Department of Defense (DOD) providing non-secure direct distance dialing service worldwide through a system of government-owned and leased automatic switching facilities. The purpose of DSN is to handle essential command and control, operations, intelligence, logistic, diplomatic and administrative traffic.

**Precedence.** The Joint Uniform Telephone Communications Precedence System is directed for use by all authorized users of voice communications facilities of the Department of Defense. Since the effectiveness of the system depends upon cooperation on the part of persons authorized to employ it, users must be familiar with the purpose to be served by each level of precedence category and the types of calls that may be assigned the respective precedence.

### Use of the DSN

- a. Will be authorized for only official communications.
- b. Will be restricted to:
  - (1) Only those calls that are essential requiring a timeliness that cannot be obtained by other means (mail/message) and would stand the scrutiny afforded a commercial toll call.
  - (2) The minimum time required to accomplish the official business and will not normally exceed five minutes.
  - (3) The use of a precedence level in consonance with the subject matter of the call as established in the Joint Uniform Telephone Communications Precedence System.
  - (4) Voice-data, facsimile and graphic service in DSN will normally not exceed a continuous transmission time of 15 minutes nor a total transmission time of one hour during normal business hours. Due to the limited availability of DSN circuits, violators will be disconnected without notice.

- c. Will NOT be authorized for:
- (1) Use directly or indirectly by any non-appropriated fund activities (clubs, exchanges, CBQs and other unofficial activities) provided telephone service at post, camp, station or base level except when provided by the Joint Chiefs of Staff.
  - (2) Calls within an installation, metropolitan area, or those confined geographical areas where other existing government-provided local telephone service is adequate.
  - (3) Unofficial or personal calls.
  - (4) Off-net extension of calls into the commercial system at a distant PBX-PABX, except where such extension has been previously approved by the local authority controlling the switchboard.
- d. Precedence and Inter-Area DSN Calls. Precedence DSN service is not available through the Newport telephone office.
- e. DSN User Trouble Reporting. When trouble is encountered by users while utilizing DSN, the following procedures should be taken:
- (1) Retain the circuit connection and report the trouble immediately to the local operator via another telephone.
  - (2) Give the details of the DSN trouble as follows:
    - (a) Your extension number and location.
    - (b) The DSN number and location of the called party.
    - (c) Brief description of trouble and the time it occurred. Items requiring repair, such as frayed cords and broken telephone parts, are not DSN trouble and should be reported directly to 841-7202.

## 7. TELEPHONE OWNERSHIP

Most telephone instruments and equipment are NOT government property. This equipment is leased to the Navy by commercial vendors in accordance with contract agreements governed by the legally established tariffs of the state of Rhode Island. Theft or misuse of the equipment could result in criminal charges. Commanding officers are responsible for assuring that telephones and associated equipment are used in accordance with Navy regulations and the Rhode Island tariffs. Users are not authorized to do their own telephone wiring without express permission of the NAVSTA telephone office.

### Request for Telephone Service

NAVSTA has been designated as the Activity Providing Telephone Service (APTS) for all Newport area Navy commands and activities. All requests for telephone service must be submitted to the Base Telephone Office, Building 76CC.

All requests for telephone service will be made in writing (typed) using the Telephone Service Request (TSR) or by typed memorandum using a similar format. Requests must be signed by a person authorized to obligate funds for your command. Oral requests and handwritten requests are not acceptable except in cases of emergencies. Requests for emergency service must be confirmed in writing as soon as possible.

Customers should allow up to two (2) weeks for the Base Communications Office to complete routine TSRs (adds, moves, changes, etc). Customers should allow up to 48 hours for the Base Communications Office to complete trouble calls.

Each request will be evaluated in accordance with the policies promulgated by the chief of naval operations and the Navy Telephone Manual. It is essential that the requested service and equipment be completely described and that information justification as to its military necessity be provided. A valid point of contact must be listed on each request. The base administrative telephone officer is available for assistance in the planning and preparation of the request required.

### Busy Conditions

The NAVSTA Telephone System is designed for efficiency as well as economy, but it does have its limitations. During peak hours of 9 to 11 a.m. and 1 to 3 p.m., many calls may be blocked. Data transmission and long telephone calls should be made during non-peak hours whenever possible. Excessive busy conditions on any phone may indicate an equipment problem and should be reported to the Telephone Office, 841-7202, whether it is a phone that you are calling or a report that your phone is always found to be busy.

### "911" Service

"911" emergency calling service (fire, ambulance, police) is implemented in Rhode Island. It is possible to access this service from an on-base telephone by dialing "911." It is of utmost importance that you remain on the line to answer any questions the dispatcher may have. Fraudulent use of 911 service may be grounds for criminal charges.

## C. TELEPHONE SYSTEM SPECIAL FEATURES

### 1. USING YOUR TELEPHONE

#### Special Restrictions

The Newport naval complex telephone system is ideally designed for single-line phones. If you have a multiple-line phone (key set) where several people share the extensions or the phone is answered by a central answering service, many of the features are not recommended. For instance, if you activate automatic callback and someone else answers the phone when the call back comes through, they will not know whom the call is for. Multiple-line phones might not ring three short rings for a callback and it will be impossible to distinguish between a call and a callback. Many of the special features are available from touch-tone phones only.

#### Features Requiring Special Dial Codes

Dial codes are simply instructions to your telephone system that you wish to activate or cancel a specific feature. Remember, you must always listen for DIAL TONE or RECALL DIAL TONE before dialing a dial code or telephone number. Otherwise, the system will not respond to your request.

### Distinctive Ringing

Distinctive ringing is a feature of the telephone system that is available on all single-line sets and some multiple-line key sets. Sometimes it is useful to know if a call is coming from on-base or off-base. With the base phone system, the type of ringing tells you where the call is coming from. One ring repeated every few seconds means the call is coming from on-base. Two short rings repeated every few seconds tells you the call is from off-base. Three short rings repeated every few seconds indicates a system callback.

### Non-Distinctive Ringing

Electronic phones, multiple-line phones that have a central answering position, or multiple-line phones where a common bell rings for several extensions will have non-distinctive ringing and only ONE ring will be heard instead of the distinctive ringing listed above.

### Which Codes to Use

The telephone system is actually a group of telephone switches combined into a single network. Not all features are available at all telephones. When in doubt, or if you wish to arrange for user training, call the telephone office at ext. 7202.

### 2. CALL FORWARDING – ALL CALLS

Call forwarding allows you to redirect your incoming calls to another phone within the base telephone system. All calls to your phone will ring at the designated phone. Use call forwarding when you are going to be away from your desk, or you do not wish to be disturbed.

#### To Use Call Forwarding (Analog sets)

- a. Lift the handset and listen for dial tone.
- b. Dial the call forwarding code \*22 and listen for dial tone.
- c. If forwarding to a local phone number, dial 99 + 1 + area code + then the 7-digit number to which your calls are to be forwarded and listen for confirmation tone.
- d. If forwarding to a long distance phone number, dial 98 + 1 + area code + then the 7-digit number to which your calls are to be forwarded and listen for confirmation tone.
- e. Hang up immediately. Your calls will be forwarded. If you hear the siren (intercept) tone at steps 2 or 3 it may mean:
  - (1) Call forwarding has already been activated.
  - (2) Dial the call forwarding cancel code #22 and listen for confirmation tone.
  - (3) Hang up immediately. The forwarding is cancelled.

#### To Use Call Forwarding (Digital sets)

- a. Lift the handset and listen for dial tone.
- b. Dial the call forwarding code \*22 and listen for dial tone.
- c. Dial the number of the phone from which you are call forwarding.

- d. If forwarding to a local phone number, dial 99 + 1 + area code + then the 7-digit number to which your calls are to be forwarded and listen for confirmation tone.
- e. If forwarding to a long distance phone number, dial 98 + 1 + area code + then the 7-digit number to which your calls are to be forwarded and listen for confirmation tone.
- f. Hang up immediately. Your calls will be forwarded. If you hear the siren (intercept) tone at steps 2 or 3 it may mean:
  - (1) Call forwarding has already been activated.
  - (2) Dial the call forwarding cancel code #22 and listen for confirmation tone.
  - (3) Hang up immediately. The forwarding is cancelled.

You may still place calls from your phone when call forwarding is in effect. You cannot forward calls to an outside number. You can only forward calls to another telephone in the base telephone system. When your telephone is in the call forwarding mode the phone will “ping” every time a call has been forwarded. You cannot answer the call. The “ping” is there to remind you that your calls are being forwarded.

You may forward your calls to only one other phone at a time. However, several people may forward their calls to the same phone. If a person is forwarding their calls to you, you cannot forward their calls to another phone. Even if you activate call forwarding from your phone, the first person’s call will ring at your phone.

Call forwarding should be cancelled from the phone that activated it. It cannot be cancelled from the phone receiving the forwarded calls. You can activate call forwarding to another phone even if that phone is busy at the time.

### 3. CALL COVERAGE

Call coverage is similar to call forwarding. It allows your calls to be redirected to another telephone whenever your telephone is busy or you don’t answer within a predetermined number of rings. Call coverage has many different options available, all of which must be programmed by the base telephone office into the telephone system. If you have a need for call coverage, contact the base telephone office in writing with a detailed description of your requirements. The telephone office will contact you to answer any questions and to arrange for user training.

### 4. CALL HOLD

Call hold provides a way to place a call on hold without the use of a hold button. Of course, if your telephone still has a hold button, it will work the same way it always did. But whether you have a hold button or not, you can still use the feature. Use call hold when you wish to look up information, consult privately with a third party, alternate between two parties on hold, or when you already have a call on your line and you wish to activate another feature without disconnecting the call.

#### To Put a Call on Hold, Assume a Call is Already on Your Line

- a. Depress the switchhook and listen for recall dial tone. Do NOT hang up.

#### To Return to Your Held Call

- a. Depress the switchhook and listen for confirmation tone. Resume conversation.

#### To Consult Privately with a Third Party, Assume a Call is Already on Your Line

- a. Depress the switchhook and listen for recall dial tone.
- b. Dial third party’s number and wait for party to answer. If you receive a busy signal or your party does not answer just hang up. Your phone will ring. Answer and resume your conversation with the first party who is now back on the line. Either or both parties may be outside the base telephone system.

You may only have one party on hold at a time. You cannot hang up to transfer a call or depress the switchhook to form a three-way conversation after you have used call hold. You must return your held call first and then follow the procedures for transfer or three-way conversation.

### 5. CALL PICKUP

Call pickup allows you to answer a phone ringing at another location without leaving your desk. The ringing phone must be in your call pickup group. A call pickup group may be programmed by the base telephone office at your request. The base telephone office will be able to tell you which phone numbers you can “pick up.”

Assume that you are at your desk and you hear a phone ringing at a nearby desk. You do not have the ringing phone number available on your telephone set. With the call pickup feature, you can answer the ringing phone without leaving your desk.

#### To Use Call Pickup (When Your Phone is Idle)

- a. Lift the handset and listen for dial tone.
- b. Dial the call pickup code \*33. The call is immediately directed to your phone.
- c. Identify yourself and begin conversation.

#### To Hold a Call and Use Call Pickup

- a. Depress the switchhook and listen for recall dial tone.
- b. Dial the call pickup code \*33. The call is immediately directed to your phone.
- c. Identify yourself and begin conversation.
- d. Hang up to return to held call. Your phone will ring.
- e. Answer and resume conversation. If you hear siren (intercept) tone or fast busy tone at step 3, hang up to return to your held call.

#### Siren (Intercept) Tone May Mean

- a. You cannot pick up calls to that phone (check your pickup).
- b. The caller has hung up.
- c. The call has already been answered.

Fast busy tone means another feature has been activated on that phone that temporarily prohibits you picking up the call.

When you pick up a call, it becomes your call and does not remain on the called phone. Once you pick up a call, you can handle it like any other call to your phone. This means, for instance, that you can transfer the call to another telephone.

### 6. THREE-WAY CONVERSATION AND TRANSFER

Three-way conversation and transfer are variations of one feature. Both begin by depressing the switchhook, which excludes your present party from the call (places the call on hold), and give you a recall dial tone so that you can dial a third party.

You may transfer a call to another person without the assistance of the telephone operator or your attendant. Assume that you have a call on your line that you wish to transfer:

- a. Depress the switchhook and listen for dial tone.
- b. Dial the number of the party to whom you wish to transfer.
- c. When the party answers, announce the call and hang up. The call is transferred.

You should never transfer a caller from outside the base telephone system to another party outside the base telephone system. If a call is transferred to a toll phone number, the person making the transfer will be liable for the toll charges. Some transfers are automatically restricted.

The three-way conversation feature allows you to add a third party to an existing call and works very much like the transfer feature:

- a. Depress the switchhook and listen for dial tone.
- b. Dial the number of the party you wish to add to your call.
- c. Party answers. Depress the switchhook and all three parties are connected. If any party hangs up, the remaining two parties can continue talking.

You are limited to a total of three parties; yourself and two other people on a three-way call. There is no restriction on the nature of the other two calls on the conference, either or both of the other parties may be inside or outside the base telephone system.

If you cannot reach the third party for any reason, you should depress the switchhook to return to your held call. Depress the switchhook twice if the third party is outside the base telephone system. The first depression always brings your original party back on the line, and the second depression releases the outside or second line (very important if it was a toll call!).

### 7. LAST NUMBER REDIAL

The last number called can be redialed by pressing the last number redial access code \*99.

This feature is not yet available on all phones.
