

Parsons is an industry leader in delivery of engineering, technical, construction, and management services, specializing in infrastructure, environmental, and defense/security. Founded in 1944, we deliver professional services, design/design-build, program/construction management, and innovative alternative delivery solutions to federal, regional, and local government agencies, as well as to private industrial customers worldwide.

We represent the Missile Defense Programs of the National Security and Defense Division of Parsons and we focus on A&AS support to the Missile Defense Agency. Our specific interests include support related to:

- system engineering,
- test (flight, ground, infrastructure),
- warfighter strategic integration,
- operations support,
- warfighter operational support,
- weapons and missile systems,
- space engineering,
- M&S,
- lasers
- system engineering,
- intelligence services,
- C3BM, acquisition,
- logistics,
- international affairs,
- threat,
- analysis & reporting,
