A.1 Sample Topology Diagrams

All topologies must include:

* Topology date
* CCSD (preferably near premise router)
* IP addresses for all devices within the enclave, and the following devices must include additional information specific to them:
  * Firewalls: manufacturer, model, and software/firmware version
  * IDS: manufacturer, model, and software/firmware version
  * Servers: server function (i.e., OWA, Web Server, etc.) and operating system (including most updated Service Pack installed on system)
 * Workstations: operating system (including most updated Service Pack installed on system)
