

## **Workshop on Response of Louisiana Marsh Soils and Vegetation to Diversions - February 23, 2011**

### **Location**

- LITE Auditorium, University of Louisiana at Lafayette, Lafayette, LA.

### **Purpose**

Based on the current scientific understanding of the effects of freshwater diversions on LA marshes, to develop a consensus to inform coastal managers of expected soil and vegetation responses, and to identify gaps in our understanding to inform future research priorities and management strategies.
