

FIU Business Career Fair

In support of DLA's formal partnership with Florida International University in Miami, DLA recruiters attended the FIU College of Business Career Fair on March 24, 2016. The event drew 67 employers and 794 students. With DLA being the only federal employer represented, there was a steady stream of students eager to learn more about DLA and our entry-level career development program, Pathways to Career Excellence (PaCE). In addition to excellent grades, students who visited the DLA booth had directly related majors in finance, human resources, supply chain management, logistics, marketing, management information systems, and international business – very fertile ground for DLA recruiting. DLA signed a partnership agreement with FIU on March 28, 2014 as a strategy to expand the diversity of DLA's workforce. FIU has a student population of approximately 50,000, of which almost 80 percent are minorities and more than 60 percent are Hispanic. FIU ranks first in the nation for awarding baccalaureate degrees to minorities.
