

**US Army Corps  
of Engineers**  
Kansas City District

# *Environmental Services*

## **Environmental Cleanup**

Since 1981 the Kansas City District has worked for many DOD departments, and other federal agencies such as the EPA, on cleaning up the environment. Our team consists of some 120 professionals dedicated to environmental programs. We also have extensive Hazardous, Toxic and Radioactive Waste (HTRW) contracting capability. Our staff of 30 project managers lead technical project teams and provide our customers with single point accountability and financial responsibility.

## **Technical Support**

The Kansas City District has one of the Corps' largest staff of specialized environmental disciplines including; chemists, environmental engineers, geotechnical engineers, chemical engineers, cost engineers, industrial hygienists, risk assessors, health physicists, hydrogeologists, environmental attorneys, and construction managers. Our project teams focus on customer needs, regulatory requirements, quality products and meeting high technical standards.

## **HTRW Capabilities - Restoration**

- Installation Restoration Program (IRP), Formerly Used Defense Sites (FUDS), Formerly Utilized Sites Remedial Action Program (FUSRAP), CERCLA/Superfund, Brownfields
- Studies, investigations, designs, asbestos/lead surveys
- Field oversight and direction of investigation and remediation contractors
- Preparation of closeout reports for regulator acceptance
- Analytical quality assurance

## **HTRW Capabilities - Compliance**

- Resource Conservation and Recovery Act (RCRA), Toxic Substances Control Act (TSCA), Underground storage tanks, building demolition and environmental planning
- Technical Assistance - engineering, regulatory, community relations, legal, real estate

## **HTRW Capabilities - Innovative Contracts/Support Services**

- Pre-placed design/construction contracts
- Hazardous Waste Disposal Contracts
- Site Characterization Analysis and Penetrometer System (SCAPS), In-house drill crews
- Integrated GIS capability
- Performance Based Contracting (PBC)
- Full-time Innovative Technology Advocate
