

Industrial Hygiene Support Services

The Kansas City District has a very experienced industrial hygiene staff. Currently, the staff has four certified industrial hygienist, three staff members and one supervisor. One of the staff members has had training in lead surveys and abatement procedures.

Over the years several, of the staff have handled various types of indoor air complaints and concerns. Two of the staff are current on their AHERA asbestos project designer certification, and two are current on their AHERA asbestos inspector/manager/planner. Mary Murphy, CIH, one of the senior staff industrial hygienist, has experience as an asbestos counter, many large asbestos inspections and air sampling projects.

In the past five years, the district staff has conducted several asbestos surveys and supported quality control sampling during contracted asbestos removal. Each of the staff members have reviewed and written asbestos survey reports, work plans, and management plans.
