

PERMANENT PARTY BARRACKS

FORT LEONARD WOOD, MISSOURI

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG

Fort Leonard Wood is the site of a significant effort to improve the lives of junior enlisted soldiers by constructing several new apartment-style permanent party barracks that provide more privacy and provide a modern look and feel to the soldiers' barracks. With the design and construction of each barracks, the Kansas City District coordinated with the Corps of Engineers' Fort Worth Center of Standardization to ensure a high level of consistency throughout the process.

Individual apartments consist of private sleeping areas with walk-in closets and shared laundry, storage, bathroom and kitchen in each unit.

With two phases complete, the final phase is under construction. All phases required the refurbishment of an existing electric substation to provide adequate electrical service for the entire complex. Each phase is approximately \$24 million to complete.
