## I-PAS 2015 Lansing IDEP Investigations

### Description

The project is located in the state's capital, Lansing, Michigan. In order to maintain compliance with their National Pollutant Discharge Elimination System (NPDES) permit, the City of Lansing is required to investigate its municipal stormwater outfalls for illicit discharges. The purpose of this project is to complete illicit discharge investigations for 75 outfalls that will be sampled for: E-coli; surfactants; ammonia; pH; specific conductivity; hardness; fluoride and temperature. Any outfalls identified as having a potential illicit discharge will be further tracked in an effort to identify its source.
