U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG

CAP-14-Marquette, MI

Description

The City of Marquette is located along Lake Superior in the upper peninsula of Michigan. Shoreline erosion had destroyed portions of the rock revetment adjacent to the coastal road Lakeshore Drive that serves Marquette. The damaged revetment has severely compromised the road and threatens city utility infrastructure. Multiple road closures occurred in fall 2014 due to flooding and debris washing ashore from the damaged revetment. The road was closed for the majority of winter 2014-15. Temporary measures have not functioned well and storms continue to damage the revetment barrier, displace stone into the street, and wash revetment stone into the lake. This project would involve shoreline protection along Lakeshore Boulevard. The City indicated that there remains a great need and interest in the project as of August 2015 and recently supplied photographs showing damage from a December 2015 storm.
