

Fight the Bite!

Preventing the Spread of **Mosquito-borne Illness**

== Malaria
Dengue fever
Japanese encephalitis

Control Mosquito Breeding:

- ✓ Eliminate places where mosquitoes can lay eggs
- ✓ Reclaim land by filling and draining
- ✓ Eliminate standing water sources
- ✓ Introduce special fish that eat mosquito larvae
- ✓ Treat large bodies of standing water with larvicides

Preventing Mosquito Bites

- ✓ Use insecticide-treated bed netting
- ✓ Apply insect repellents
- ✓ Apply screens to dwellings
