#### What's Changing and Why?

The Navy Training Management and Planning System (NTMPS) Maintenance Update 1B-5 (MU1B-5) afloat release contains a total of four changes that will provide a visible impact to the Sailor. These four changes are described in detail in this information sheet, along with screenshots that highlight the important new information that is displayed in the Fleet Training Management Planning System (FLTMPS) Afloat application and the Afloat version of the Electronic Training Jacket (ETJ).

The enhanced functionality that has been added to the FLTMPS Afloat application and the Afloat version of the ETJ are the direct result of feedback received from you, the Sailors. The following changes have been requested for some time now and we are glad to finally deliver these improvements. You asked and we listened!

#### When can I expect the new NTMPS MU1B-5 release?

**Fall of 2012**

### NTMPS MU1B-5 Capabilities

**IMPORTANT: The following afloat systems are installed onboard your ship. If any of these systems are not available, please contact your ship's IT system administrator.**

- FLTMPS Afloat screen now displays name and designated grade rate
  - ✓ Displays the rate and name of the user currently logged into FLTMPS
  - ✓ Ensures the profile being used for reports run in FLTMPS Afloat are defaulted to the current user's profile and Unit Identification Codes (UICs)
  - ✓ Also enhances trouble shooting efforts for the Navy Information/Application Product Suite (NIAPS) System Administrator, Distance Support (DS) NIAPS, and NTMPS Support
- NTMPS Afloat (NAFL) Load Status page displays critical Datamart build information
  - ✓ Displays critical information about the NAFL Datamart installed on the afloat NIAPS server to the FLTMPS Afloat Load Status page
  - ✓ Enhances trouble shooting efforts for the NIAPS System Administrator, DS NIAPS, and NTMPS Support

## NTMPS MU1B-5 Capabilities (continued)

- ✓ This is a maintenance fix to enhance trouble shooting efforts by NIAPS System Administrators, DS NIAPS, and NTMPS Support. However, the FLTMPs Afloat Load Status page will also be accessible to users and will display self-explanatory information such as UIC and SWP Release Version (e.g., MU1B-4)

### FLTMPs Afloat NAFL Datamart Page Display

1.) User name and rate now displayed

2.) Critical information about the NAFL Datamart now displayed

### NIAPS NeL Afloat Verification Report

- ✓ Provides capability to verify that all AILE course completions are replicated ashore and properly documented in the Integrated Learning Environment (ILE)
- ✓ Creates FLTMPs Afloat reports that provide capability to track the status of AILE course completions being properly recorded in the ILE/LMS

### NTMPS MU1B-5 Capabilities (continued)

- Provide shipboard users a visual indication in the Afloat Electronic Training Jacket (ETJ)
  - ✓ Displays a visual indicator in a user's Afloat ETJ to identify all courses that have been completed in the afloat LMS (AILE/NeL) environment that are pending replication to the shore LMS (ILE/LMS) for official documentation in the user's record
  - ✓ The visual indicator will change to reflect the official documentation in the user's record after the shore LMS passes the record(s) to the NAFL Datamart, and the NAFL Datamart is replicated and updated on the ship

**Training Data**

NAME: ABH1 TEST RECORD1

NeL Afloat Data Flow

Note 1. A Navy eLearning Afloat course highlighted in yellow with a source code of "NLN-PEND" indicates that the course completed via NIAPS is pending official entry into the Ashore ETJ. Once documented in the Ashore ETJ, yellow highlighting will be removed and source code will reflect "NLN-AILE".

Note 2. It can take up to two weeks for Navy eLearning Afloat courses completed via NIAPS to be reflected in the Ashore ETJ.

Note 3. If highlighted Navy eLearning Afloat course completions are not entered into the Ashore ETJ within two weeks of completion date, submit a GDSC support request via anchordesk@navy.mil or 1-800-41-TOUCH. Keep your GDSC case number as a reference and follow up if you do not receive support within 48 hours. IMPORTANT: When submitting a GDSC support request, notify your Training Officer, as this may represent a technical issue experienced command wide.
