Ready Now and into the Future

Each New Year offers the opportunity to assess where we have been, where we are and which way we're heading. In naval terminology, it's time to review our charted course and adjust speed and heading as needed.

The Navy Reserve has come a long way since September 11, 2001; Today the Reserve Force and Active Component work as one Navy. Across the force, the Navy Reserve has refined procedures, policies and systems while removing barriers to service. With more than 70,000 mobilizations in support of overseas contingency operations, as well as a decade of both periodic and urgent operational support, Reserve Component Sailors have demonstrated they are both ready and accessible. Reserve Sailors want to serve and the Navy values their capabilities. They have performed superbly and it has not gone unnoticed, even at the highest levels.

"Because our Navy Reserve is ready, innovative and agile, we can assign capabilities and missions to our Reserve Component with confidence," said Admiral Jonathan Greenert, Chief of Naval Operations in his confirmation testimony to Congress. "The Navy Reserve should be a regular part of our worldwide deployment cycle, as well as performing the Navy's predictable, part-time missions, where appropriate."

Navy Reserve readiness, innovation and agility keep Sailors at the leading edge. For example, Selected Reserve Sailors are literally writing the book on the shipboard operation and tactical employment of the MQ-8B Fire Scout, a Vertical Takeoff and Landing Unmanned Aerial Vehicle (VTUAV). In 2011, Reserve Sailors took part in the Fire Scout deployment with Helicopter Anti-Submarine Squadron Light 42 (HSL-42) aboard USS *Halyburton* (FFG 40). It was a dynamic and successful deployment from start to finish.

In addition to helping rescue merchant sailors from pirates and enforcing United Nations resolutions to stop the flow of illegal weapons into Libya, the MQ-8B operators on USS

Key Messages to Remember

The Reserve and Active Components work as one Force.

With more than 70,000 mobilizations in support of overseas contingency operations, as well as a decade of both periodic and urgent operational support, Reserve Sailors have demonstrated they are both ready and accessible.

Navy Reserve Sailors have demonstrated they are both ready and accessible; they have performed superbly; and it has not gone unnoticed, even at the highest levels.

Halyburton pushed the unmanned helicopter to its operational limits, setting records for maximum altitude, range, and endurance. Another group of Reserve Sailors will soon deploy as part of HSL-60 aboard USS *Simpson* (FFG 56) to continue exploring this exciting new technology. We will have even more exciting opportunities in the future.

If you want to be a part of missions like the Fire Scout, ask yourself what your best skills are and look for opportunities to put them to work, even if it means doing something different. Work outside your comfort zone. As a World War Iera Navy recruiting poster said, "Don't just read American history, make it!"

Technology and missions change; the Honor, Courage & Commitment of our Sailors remains constant. In choosing a life of service, each Sailor has also chosen to be held to the highest standards of integrity, respect, discipline, preparedness, dedication and accountability captured in the Navy Core Values, the Navy Ethos and our Navy Reserve Force Motto: *Ready Now. Anytime, Anywhere*.

Quotable Quote

"Because our Navy Reserve is ready, innovative and agile, we can assign capabilities and missions to our Reserve Component with confidence. The Navy Reserve should be a regular part of our worldwide deployment cycle, as well as performing the Navy's predictable, part-time missions, where appropriate."

> Admiral Jonathan Greenert Chief of Naval Operations
