AMM Role Activity Summary Results

Activity Summary Results	
	Projected Losses
	183
Current Onboard	Tentative Gains
1075	0
	Prospective Gains
	49
	Held Billets
	0

Current Onboard = Number of enlisted Sailors onboard reflected in the distribution system

Projected Losses = Number of planned Sailors projected to depart the command at or before P9

Tentative Gains = Number of Sailors the Detailers have Posted to open requisitions

Prospective Gains = Number of Sailors with orders in hand

Held Billets = Billets that the MCA has directed not to be filled

AMM Role Activity Summary Results NEC Requirements

NEC Requirements		
	Total	Gapped
All	481	207
Critical	217	61
	Total	Critical
Bridged	83	35
	Total	Filled
Floating	2	1

Critical NEC = NECs deemed critical for warfighting missions by the TYCOM and approved by USFF

Bridged NEC = Basically: When a Sailor holds a NEC in inventory, is DNECd to it, but is not required for the billet to which they are aligned. The command may have a gapped skill on another billet (even if the billet is filled.) The command may wish to Bridge (DNEC) in order to get readiness credit for the gapped NEC in that member's inventory. The use of Bridging will not stop the gapped billet from generating a requisition.

Floating NEC = Navy Enlisted Classification (NEC) requirement appearing on a billet/position, but which is an activity skill requirement rather than a requirement for a specific billet/position (i.e. SAR Swimmer; Sub Diver). A Floating NEC is considered as a separate skill independent of the billet for which it's attached.

AMM Role Activity Summary Results Quality of Alignment

Quality of Alignment	
QoA 1	58%
QoA 2	16%
QoA 3	13%
QoA 4	0%
QoA 5	11%
QoA 6	0%
QoA 7	1%

Quality of Alignment QoA 1-7

Refer to QoA Rules under Management Tab for more information

This information is used by PERS-4013 and is **not intended** to be a readiness score.

QoAs will trigger alignment locks and unlocks, which in turn will impact automatic realignments, which occur monthly.

AMM Role Activity Summary Results

	Requirement	Personnel	Vacancies
Billets (BA)	1018	939	79
Unfunded Billets	64	15	n/a
Refillable Excess	0	0	0
Non-Refillable Excess	n/a	138	n/a
Alignment Exempt	n/a	0	n/a
Unaligned	n/a	0	n/a
Totals	1082	1092	79

Summary of Billets and Personnel data by Manning Requirement Type (MRT)

Billets (BA): Funded billets (These are the normal billets that the distribution process works to fill).

Unfunded Billets: Billets listed on a command's Activities Manpower Document (AMD) without active funding- normally not filled unless there is excess inventory.

Refillable Excess: Manning Control Authority (MCA) directed additional requirements for distribution- will generate a requisition like a funded requirement.

Non-refillable Excess: Short term directed manning levels above BA – will not generate a requisition

Alignment Exempt: Sailors who are under the administrative control of a given command, but not counting against the overall manning levels for that command (members who have transferred but not reported to new command yet or in a transient account status, i.e. ACC 3xx)

Unaligned: Sailors who are currently unaligned to a Billet (all of these need action)

AMM Role Alignment Summary Results

NEC Requirements		
Filled Floating		1
Floating		2
Bridged		83
Gapped		207
Lock Status		
Soft	Hard	Unlocked
988	1	103

Information displayed in this table replicates information in the Activity Summary Results Table, but includes filters from the Optional Criteria included.

Filled Floating: Number of filled Floating NEC requirements at that command

Floating: Total number of Floating NEC requirements for a given command

Bridged: Number of NEC requirements being covered by Bridging

NEC Manual Data

NEC Code: 036 Series: 888 NEC Termination Date:

Title: SHIPBOARD ENGINEERING PLANT PROGRAM MANAGER

Description:
Administers, manages and evaluates shipboard engineering programs. Reconfigures engineering systems and major components external to the propulsion plant which comes under the cognizance of the Engineering Officer of the Watch (EOOW). Establishes operating conditions and makes recommendations to the engineering officer.

Sequence Code 3: M1 M2 M3 M4 M5 M6 M7 M8 M9 M0

The PG/PL report will display information about the billets that are currently gapped and those with planned losses in the detailing window.

It will also display information about PG member

It will display a TG for those billets which the detailer has "penciled in" a member

It will calculate the gap between the incumbent's loss date and PG's EDA
