

# Reserve Sailor Guide to CMS-ID Alerts

Alerts are time-sensitive messages displayed in CMS-ID to inform you of policy-related actions that are required as you approach your Projected Rotation Date (PRD) or other significant deadlines. System-generated alerts are displayed when you log into CMS-ID and must be acknowledged before you proceed into the system. Acknowledged alerts are then captured in your Alert History, accessible through your Personnel Detail.

CMS-ID Alerts are programmed to be triggered on a specific schedule; if you do not log into CMS-ID frequently, you may notice a “stack” of alerts being delivered all at once when you do log in. Because CMS-ID Alerts are time sensitive, you can optimize their usefulness by keeping your Work Email address up to date and selecting the email option for delivery of alerts. You can do both on your User Profile page in CMS-ID, as illustrated below:
