What is eOPF ?

The eOPF solution provides electronic, Web-enabled access for all Federal Agency staff members to view eOPF documents. All employees are able to view their own OPF through the eOPF solution. eOPF includes security measures to ensure the integrity of the system. For example, users are able to view their own eOPF documents, but not modify the documents. All activity performed in the eOPF solution is logged and can be accessed through various reports by authorized users. The eOPF provides an audit trail capability, including a mandatory log that documents when and why an authorized user has reviewed an eOPF.

Key Benefits of eOPF:

- Enhanced portability and security of personnel records
- Provides increased employee awareness and accountability through email notification of Personnel Actions (SF-50s)
- Immediate access to OPF forms and information for a geographically dispersed workforce
