ARMY NATIONAL GUARD

SIDPERS-ARNG HANDBOOK FOR COMMANDERS

Summary. This pamphlet provides procedures, responsibilities, and administrative instructions for Commanders at all levels of organizations serviced by the Standard Installation/Division Personnel System Army National Guard (SIDPERS-ARNG). Whenever the word "he" is used in this regulation it is intended to include both the masculine and feminine genders, unless otherwise indicated.

Applicability. This pamphlet applies only to the Army National Guard (ARNG).

Impact on the New Manning System. This pamphlet does not contain information that affects the New Manning System.

Internal Control Systems. This pamphlet is not subject to the requirements of AR 11-2. It does not contain internal control provisions.

Supplementation. Supplementation of this pamphlet is not authorized unless prior approval is received from Chief, National Guard Bureau. Send requests and recommendations to Chief, National Guard Bureau, ATTN: NGB-ARP-CS, 5600 Columbia Pike, Falls Church, VA 22041-5125.

Interim Changes. Interim changes are not official unless authenticated by the Executive, National Guard Bureau. Interim changes will be destroyed on their expiration dates unless sooner rescinded or superseded by a formal change.

Suggested Improvements. Users are invited to send comments and suggest improvements on DA Form 2028 (Recommended Changes to Publications and Blank Forms) to NGB-ARP-CS, 5600 Columbia Pike, Falls Church, VA 22041-5125.

*This pamphlet supersedes NGB Pam 600-8-20, 1 May 1985.

CHAPTER 1

An Overview of SIDPERS-ARNG

1-1. **SIDPERS Objectives.** SIDPERS-ARNG, The Army National Guard Standard Installation/ Division Personnel System has been designed to meet the primary objectives listed below:

- a. To support the Commander.
- b. To provide service to the soldier.
- c. To provide strength accountability.
- d. To maintain accurate and timely data.
- e. To facilitate mobilization.
- f. To support pay related services.
- g. To provide retirement points accounting data.

1-2. **What SIDPERS-ARNG Is.** SIDPERS is a standard, automated personnel management system designed to provide personnel data at STARC Headquarters, division, brigade, group, battalion and unit levels.

1-3. **Who Makes SIDPERS Work.** Everyone in the Army National Guard has a key role in the success of the SIDPERS System.

a. **The Individual Soldier.** The soldier is the most important asset we have. The soldier provides the personal information and updates when necessary for SIDPERS-ARNG. The soldier verifies the information in SIDPERS-ARNG to ensure that it is accurate and reflects his or her personal and professional qualifications.

b. **The Commander.** The commander must ensure procedures are established to obtain and safeguard personnel data. The individual soldier cannot take the active role he should unless you, as commander, are committed to ensuring the system is being operated according to regulation. Keeping SIDPERS-ARNG information current can only be done if personnel transactions are processed in a timely manner. You can then use this data to lead your soldiers. Special emphasis must be given to prompt reporting of strength related personnel data, i.e., gains, losses, separations, promotions, demotions, and transfers. Your command involvement is the key to the overall success of SIDPERS-ARNG.

c. **Your State SIDPERS Interface Branch (SIB)** is the organizational element of the Military Personnel Office (MILPO) in the Adjutant General's Office that operates the system for you.

d. The Data Processing Installation (DPI) is located within the USP&FO and is the element responsible for operation and maintenance of the hardware and software which supports SIDPERS-ARNG.

e. National Guard Bureau (NGB). At the NGB level, the Data Management Branch of the Army National Guard Personnel Center is the proponent agency for SIDPERS-ARNG. This organization, in cooperation with National Guard Information Management Agency, prepared the systems functional design specifications and is responsible to monitor and operate the system at this level.

1-4. What SIDPERS-ARNG Does. SIDPERS-ARNG provides personnel management information to you about your people. This will assist you in the accomplishment of your mission. SIDPERS will provide this information in the form of preformatted reports (see Appendix A). SIDPERS-ARNG also:

a. Provides information to update the master SIDPERS-ARNG data base at NGB level.

b. Receives information from the Vertical--The Army Authorization Documents System (VTAADS), and from the Unit Identification System/Force Status and Identity Report (US/FORSTAT), systems which are managed by the Directorate of Training at State level.

c. Performs a strength accounting function at the unit level, i.e., appointments, enlistments, departures, attachments, separations, etc.

d. Provides Mobilization information to Department of The Army and other US Government agencies.

e. Provides USAFAC, thru your State Military Pay Section, information necessary for the Joint Uniform Military Pay System (JUMPS).

f. Provides retirement points accounting data to enable commanders to better counsel their soldiers on benefits to be gained through retirement from the Army National Guard.

1-5. SIDPERS Reports. SIDPERS-ARNG can produce a variety of reports to assist you in meeting your personnel management responsibilities. Your local SIB can provide assistance with your unique report requirements.

CHAPTER 2

The Mechanics of SIDPERS

2-1. **Sources of Data.** Information for SIDPERS is received from many different sources:

a. Your unit Full Time Support Personnel or Battalion Personnel and Administration Center (PAC) provides information by means of source documents on gains, losses, and personnel changes as reflected in paragraph 3-3.

b. The MILPO provides qualification and personnel management information.

2-2. **The SIDPERS Processing Cycle.** SIDPERS files are normally updated daily. Reports for state and organization use may be scheduled as a part of each SIDPERS update. In addition to the scheduled reports, certain automatic reports, including transaction registers are produced in each update. These reports display the results of the processing update, indicating the success or failure of the various personnel actions submitted by the Full Time Support Personnel, PAC, MILPO and the SIB. Any transactions rejected by the system must be corrected by the SIB or originator and submitted for processing at a later update.

2-3. **Files Reconciliation.** The SIDPERS Personnel File (SPF) is currently reconciled against selected data on the NGB data base to ensure that like information is being used by the NGB staff to make personnel management decisions. Discrepancies are provided to the local SIB for necessary update or correction. This is one of many features used to check accuracy and the timeliness of SIDPERS data.

2-4. **SIDPERS Publications.** The publications regulating SIDPERS-ARNG and SIDPERS-ARNG transactions are listed in Appendix B. An updated unit library to include administrative publications is a necessity for a successful program.

CHAPTER 3

Input Procedures - Unit Level

3-1. **Introduction.** This chapter provides guidance on unit/intermediate headquarters level input of new or changed information into the SIDPERS-ARNG system. SIDPERS-ARNG requires changes in the individual's status or qualification to be reported directly to the SIB from the activity where the change took place (i.e. battalion level promotions are submitted directly from battalion headquarters to the SIB). However, certain actions will continue to be reported from the unit level (i.e. unit level advancement/promotion, address change, change in marital status, etc.). Timely submission of changes is imperative since SIDPERS-ARNG generates pay related transactions to the military pay branch.

3-2. **Reference.** The primary reference for reporting SIDPERS-ARNG changes at unit level will be NGB Pam 600-8-1.

3-3. **Description of Source/Substantiating Documents.** Source documents requiring changes to SIDPERS at the unit level fall into three groups:

a. **Personnel changes.** Submission of a personnel change transaction is critical for accurate personnel reporting as well as for pay. Some examples of documents/actions are:

- (1) Accession packets (OFF/WO/EM).
- (2) Discharges/Transfer orders.
- (3) Promotion/Reduction orders.
- (4) Extension of Enlistment (DA Form 4836).
- (5) MOS change orders.
- (6) Initial Active Duty Training (IADT) Departure/Return Orders
- (7) Active Duty Special Work (ADSW) Departure/Return Orders
- (8) Security Clearance Certificates (DA Form 873)
- (9) Military Education Completion Certificate.
- (10) Personnel Action DA Form 4187. This form serves as a source document for transactions for which substantiating documents are not usually available. Examples of items which may be reported on DA Form 4187 are:

a. Marital status/dependency changes.

- b. Change tax exemptions/withholding
- c. Change duty position/status
- d. Advancement of grade
- e. Change of civilian education level or status
- f. Change of employer/occupation
- g. Miscellaneous changes (i.e. religious denomination)
- h. Miscellaneous corrections (i.e. date of birth, ethnic group/race. etc.)

b. Organizational Changes. MTOE/TDA changes will be provided to SIDPERS from the Readiness Management Officer, Plans, Operation and Training Section at the STARC Headquarters. Reorganizations, additions, and deletions must be made to the SIDPERS Organizational File (SOF) and the SIDPERS Authorized Strength File (SASF) as appropriate. These files are an integral part of output products produced by SIDPERS-ARNG. Submission of these changes are required since duty position changes and duty position qualifications impact directly on the Unit Manning Report.

c. Retirement Points Accounting System (RPAS) Changes. Prompt submission of changes to correct errors or discrepancies in the RPAS record is essential. A few items subject to change are reflected below:

- (1) Errors or missing information on unit training assembly.
- (2) Errors or missing information on AD, ADT, ADSW or AT attendance.
- (3) Errors or missing information on correspondence course completion for those schools serviced by USATSC.
- (4) Errors or missing information on correspondence course completion for those schools not serviced by USATSC.
- (5) Documents to verify correspondence course completion for those schools not serviced by USATSC.
- (6) Documents to substantiate retirement points earned from prior service that have not been previously verified.

3-4. Transmittal of SIDPERS Input. NGB Form 3815, SIDPERS Input and Control Data - Authentication and Transmittal will be used to transmit source documents, DA Form 4187 and other miscellaneous type documents.

3-5. Classification and Safeguarding Personnel Information.

Information/source documents to support SIDPERS will not be classified. Source documents, military personnel records, and information of a personal nature will be stored, handled and transmitted in accordance with AR 340-16 and AR 640-10. Information of a personal nature may be disclosed or released only to authorized personnel in accordance with AR 340-17 and AR 340-21. Once the documents have served their purpose they will be disposed of IAW applicable directives. Should destruction be accomplished it will be by burning, shredding or by other appropriate means.

CHAPTER 4

Performance Management Reports

4-1. **Introduction.** NGB is aware of the value of performance reports in helping to correct unfavorable trends and exploit favorable approaches in the reporting of soldiers data from your command. If the data entered into SIDPERS is late or incorrect, it directly affects your ability to manage your unit. Performance reports should be helpful in performing personnel management responsibilities. They are not a mass of data which you would be forced to decipher and draw conclusions from but rather reports that will:

- a. Indicate input was received and processed at the SIB.
- b. Provide your unit administrators with a check on the timeliness, accuracy, and correctness of reports.
- c. Indicate certain actions that must be taken.
- d. Provide an automated suspense of personnel actions about to expire or that have expired.

4-2. **Performance Reports.** Listed below are the two performance reports which will enable you to better analyze your unit SIDPERS-ARNG performance and timeliness. They will provide the necessary information for direct additional emphasis towards those areas found to be marginal or deficient.

- a. **Personnel Transaction Register by Unit (GPDF-0880).** This report will be provided to each unit after a data base update cycle with a monthly summary at the end of each month. Its purpose is to provide the unit with a record of all personnel transactions and their status, i.e., if they have been processed or not. In the case of unprocessed transactions, the report will provide the originator with an error mnemonic which will identify the error in the transaction which caused it to not process. This error mnemonic will serve a dual purpose in that it will inform the originator of the error made so that it can be corrected, and it will provide the Commander with the hard data to analyze the quality of inputs being provided to the SIB. Based on this analysis, you can initiate corrective procedures such as requesting further SIDPERS training for your personnel or counselling your staff as to improper work habit. It also provides a basis for commending effective personnel.

- b. **Personnel Actions Past Due (GPFM-0860).** This is a monthly report which will provide you with a listing of specific personnel actions which have not been acted upon during the allotted processing time and as a result, are considered to be past due. The importance of this report as an aid to you cannot be overemphasized.

c. Appendix A provides a list of the SIDPERS-ARNG output reports followed by facsimiles and descriptive information that are provided to the units.

4-3. RPAS Reports. Listed below are the RPAS reports that will enable you to better counsel your soldiers on benefits to be gained through retirement from the ARNG. Details on RPAS are found in NGR 680-2. Samples of all the following reports are at Figures 4-1 through 4-5.

a. **NGB Form 23A, Army National Guard Current Annual Retirement Points Accounting Statement.** This is a statement provided at the end of each retirement year or upon separation, interstate transfer, or assignment to Inactive National Guard. It is a complete listing of all retirement points earned, whether the points are verified or not, and a statement indicating approximately how much retired pay he would be entitled to upon completion of 20 years creditable service or service until age 60.

b. **NGB Form 23A1, Army National Guard Retirement Points Supplemental Detailed Report.** This is a detailed report of retirement points earned during the last retirement year. The data will be available from 1 April 1987 or date of implementation, whichever is later. It includes dates of Inactive Duty Training (IDT), Active Duty (AD), Active Duty Training (ADT), Full Time Training Duty (FTTD) performance, and Army Correspondence Course completions.

c. **NGB Form 23B, Army National Guard Retirement Points History Statement.** This is a statement provided the soldier upon initial establishment of the RPAS record or upon request. It is a complete listing of all retirement points earned, whether the points are verified or not.

d. **NGB Form 23C, Army National Guard Retirement Points Statement.** This is a statement provided the soldier upon application for retired pay. It is a complete listing of all retirement points earned, whether the points are verified or not. It has a certification of accuracy by the SIB Chief or RPAS NCO and will be attached to the DD Form 108, Application for Retired Benefits.

e. **NGB Form 23D, Notification of Eligibility for Retired Pay at Age 60.** This is a letter notifying the soldier of his/her eligibility to retired pay at age 60. It is generated from the Retirement Points Accounting History File upon attainment of 20 years creditable service. It will have NGB Form 23B, NGB Pam 600-5, and the Survivors Benefit Plan summary attached to it.

1. This is to notify you that, having completed the required years of service, you will be eligible for retired pay upon application at age 60 in accordance with the provisions of Title 10, U. S. Code, Chapter 67. Your eligibility for retired pay may not be denied or revoked on the basis of any error, miscalculation, misinformation, or administrative determination of years of creditable service performed unless it resulted directly from fraud or misrepresentation on your part. Notwithstanding the forgoing, the number of years of creditable service upon which retired pay is computed may be adjusted to correct any error, miscalculation, or administrative determination, and when such a correction is made you will be eligible for retired pay in accordance with the number of years of creditable service, as corrected, from the date retired pay is granted.

2. In the event you are now or later become entitled under any other provisions of the law to retired pay from an armed force or retained pay as a member of the Fleet Reserve or Fleet Marine Corps Reserve, you will not be entitled to retired pay under the provisions of 10 U.S.C. 1331.

CHAPTER 5

What You Can Do To Help

5-1. **Commanders at all Levels.** Command knowledge of, and personal involvement in, SIDPERS-ARNG procedures are the key to successful people management. You should:

- a. Assure prompt reporting of soldier information. Next workday reporting of strength information is essential.
- b. Insist on prompt resolution of errors by your staff.
- c. Eliminate manual handling delays of your unit's/PAC's inputs to the SIB.
- d. Insist on an aggressive, effective program for the individual soldier's review and correction of his Personnel Qualification Record.
- e. Ensure the soldier reviews the NGB Forms 23 series upon receipt. Assist him in resolving any errors or discrepancies.

5-2. **Commanders Originating SIDPERS-ARNG Actions.** Particular attention should be directed to several output reports generated and distributed to your unit. Among these are the Personnel Actions Past Due (GPFM-0860), the Officer/Warrant Officer Suspense Listing Master (GPFQ-1240), the Enlisted Suspense Listing Master (GPFQ-1620), the Expiration Term of Service Report (GPFQ-1630), and the Unit Manning Roster (GPFM-1710). Through your routine review of these reports, you can ensure the accuracy and timeliness of your unit's SIDPERS transactions and resolve discrepancies before they become serious personnel problems, especially if pay becomes a factor. Note also that missing data is just as invalid as erroneous data and can seriously jeopardize the quality of your management information.

APPENDIX A

SIDPERS-ARNG OUTPUT REPORTS

This appendix provides a listing of the SIDPERS-ARNG output reports that will be provided to the unit level.

GLOSSARY

Purpose. This glossary includes definitions of terms, acronyms and abbreviations which are used in this pamphlet. This glossary attempts only to provide a standard meaning for those terms that have some special significance in a SIDPERS environment. Terms and definitions explained in AR 310-25 and AR 310-50 are not included in this glossary.

SIDPERS TERMS AND DEFINITIONS

Cyclic Report. A cyclic report is produced throughout a twelve (12) month period for the different grades or needs.

Data Base. All of the data files that are included in SIDPERS.

Error Notification. Error notice transmitted to the unit as a result of errors detected during edit and update operations performed at the SIB.

Literal. A set of alpha/numeric characters which have been previously set up in an automated storage area. Used to identify data elements as actions on printed records.

Mnemonic Code. Abbreviated form of a word (pronounced like "new" "monic") which looks like the word being abbreviated, i.e., ARR (arrival), DPRT (departure). This is an instruction code using conventional abbreviations to facilitate easy recognition.

Originator Code. Identifies organization, section, or individual requesting data from, or submitting data to, SIDPERS. It consists of three characters and is assigned by the SIB.

Retirement Points Accounting System (RPAS). The automated method utilized to ensure timely recording and verifying of all retirement points earned during an Army National Guard soldiers's retirement year.

SIDPERS Interface Branch (SIB). SIB is based on the structure of the organization. In accordance with the operating TOE/TDA, the interface element of SIDPERS may be a division, a branch or an element (satellite unit). SIB consists of three organizational elements: Headquarters, Input-Output Control and Files Management. The SIB controls and monitors the SIDPERS operations.

Transactions. Report of the occurrence of an event (i.e., promotion) or data change.

Type Transaction. This term is only used in a narrative description of file maintenance actions to be performed.

Unit Processing Code. UPC is a five character code used to identify ARNG units. Each unit in the ARNG has a single unique UPC, which is the UIC code minus the "W", i.e., a UIC of WP3RSO would be UPC P3RSO.

Update. Modification of a file with current information according to a specified procedure. Applies to all current changes, additions and deletions to a file.
