

Overview

- **Program Objective:** Reduce tobacco use by increasing the number of designated tobacco-free areas on an installation or reducing the number designated tobacco use areas.
- **Point of Contact:** OSD/HA
- **Total Force Fitness Domains:** Behavioral, Medical, Social

Program Description

This initiative increases the number of designated tobacco-free areas on an installation or reduces the number designated tobacco use areas. This initiative also requires ensuring the display of regulated signage announcing tobacco free zones and designated tobacco use areas.

Implementation Progress

The following installations are implementing this initiative

- Fort Bragg
- Fort Meade
- Fort Sill
- March ARB
- Quantico
- 29 Palms
- New London
- Joint Base Pearl Harbor-Hickam

Performance Measures

Number of designated tobacco areas over time

Additional Information

Union opposition, issues of enforcement and required policy changes have made this initiative a challenge to implement at various installations.

This initiative was demonstrated in Yokota Air Base in Japan and led to lower smoking rates.
