

GLOBAL SUPPORT CENTER

LOGSA'S FACE TO THE FIELD

ARMY AIRLIFT CLEARANCE AUTHORITY

- Airlift Offering and Challenge Cost Avoidance Reports.
- Conducts studies to improve economy and efficiency of operations.
- Provides Customer Assistance:
 - Cargo Track and Trace
 - Ensure Transportation Data Integrity
 - Provide guidance on air offerings and DTR coding.
- Maintains communication with theater POCs for modal determinations on Army challenged cargo.
- Collaborates with COCOMs and Enterprise to develop courses of action on critical shortfalls.

- Expedites priority Army cargo via green sheet and purple sheet requests.
- Provides Port Assistance Liaison at McGuire and Dover AFB.
- Publishes Customer Advisories.

ARMY EXPERT AUTHORIZED STOCKAGE REVIEW TEAM (EXASL TEAM)

Provides a centralized, standardized and logical approach to demand planning and stockage requirements determination for Tactical and Fixed Based Authorized Stockage Lists (ASL) for the Army (AC, ARNG, USAR)

"The Army's Premier Option for 'ALL' Stockage Determination Requirements in the Army Below National/Wholesale Level"

- Provides Supporting Units and their SSAs with the "right stockage, optimal performance and improved combat readiness!"
- Places emphasis on Readiness Drivers..., Parts Deadlining Combat Systems
- Analyzes ASL performance, identifies specific SSAs performance issues on all IPG fill rates, demand satisfaction, readiness driver fill rates, and recommends solutions

ARMY OIL ANALYSIS PROGRAM (AOAP)

The AOAP's mission is to enhance combat readiness for war-fighters globally by extending the life of oil wetted components, detecting impending failures early before catastrophic failure occurs, and providing Life Cycle Management Commands the data required to make enhancements to weapon systems.

- Oil Analysis monitors the health of engines, transmissions, gear boxes, and hydraulic systems identifying mechanical issues before they become catastrophic.

- AOAP's "On Condition" oil analysis determines the quality of the oil and prevents unneeded oil changes resulting in significant savings in cost of oil disposal, new oil, and labor over the entire life of a system.

- AOAP Labs strategically stationed all over the world.
- Deployable Mobile labs provide flexibility and rapid response to warfighter needs.
