Business	Logisitics	Modeling & Simulation	Application	

Description:

PowerLOG-J 1.x is a Government developed acquisition, logistics, and data management tool for the Logistics Management Information (LMI) and Logistics Support Analysis Record (LSAR). This product is used to develop, evaluate, review, and integrate logistics data for materiel systems, and to generate logistics support summaries such as the Repair Parts and Special Tools Lists (RPSTL), Maintenance Allocation Chart (MAC), Task Analysis, Provisioning Technical Documentation, Bill of Materials, Failure Modes Effects and Criticality Analysis. This solution supports the USAMC Logistics Support Activity (LOGSA) mission.

PowerLOG-J 1.x is installed either on individual computers (client mode) or on an application server (in networked mode). PowerLOG-J 1.x is accessed as a desktop application. In network mode, the application runs on an application server. Data is manually entered to this product, but data can also be imported from legacy data formats (MIL-STD-1552 (PMR data), MIL-STD-1388-2A LSA-036, and MIL-STD-1388-2B LSA-036). In client mode, data is saved to the local hard drive. In a networked installation mode, data is saved to the shareable database on a database server. Data stays internal to the local enclave.

Facts:

- This is a renewal for Certificate 201210921.

CoN Link: https://portal.netcom.army.mil/apps/networthiness/_layouts/NetcomCON/rqstcon2.aspx?requestId=25063

Restrictions:

1. PowerLOG-J 1.x is restricted for use within certified and accredited networks and/or data centers having a current ATO.

POC: netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still networthy. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
